62,39 LIBRARY, U.S. Department of Agriculture, Washington, D. C. HIGH GRADE SEEDS

BRECKS' Real AGENCY 51& 52 NO'RTH MARKET ST. BOSTON

CONNECTED WITH THEIR SEED STORE AND AGRICULTURAL WAREHOUSE, EST. 1822.

HE success attained by our Real Estate Agency satisfies us that the department has filled a long-felt want; the same high standard that obtains in the general business, established nearly 100 years, is adhered to in this department.

Our territory is covered by a well-trained corps of twenty agents, men of standing in their respective communities, who are well informed as regards the real estate on the market for sale in their districts and its value. Their services are at your command and, on appointment, they will meet you at the railroad station with team.

If you wish to sell your property, a postal card will bring our local agent, or we will send blank for description by return mail. No charge for listing. Better list your properties NOW to insure sales.

• Send for our illustrated catalogue of farms and country places just issued. Contains over 400 descriptions and 50 photographs; free on application.

Breck's Horticultural and Agricultural Registry

Employers and Employees in these lines will be served at 51 and 52 North Market Street, as formerly, where competent assistants will use every endeavor to give satisfaction to all who favor us. Approved GARDENERS, FLORISTS, FARM MANAGERS, COACHMEN, SUPERINTENDENTS OF COUNTRY ESTATES, PUBLIC AND OTHER INSTITUTIONS, MEN FOR GENERAL WORK ON COUNTRY PLACES, etc., will here find prompt, efficient and courteous service, while employers of such help can rest assured that only persons who have been deemed worthy of entry in our register will be recommended to them.

As no charge is made to either employer or employee for the services of Breck's Horticultural and Agricultural Registry, our desire being to improve the service in the general interest of our business, we solicit your hearty co-operation, and it cannot be better expressed than through a liberal use of the facilities we offer.

Breck's Bureau of Registry and Information

LOCATED AT 406 WASHINGTON ST., BOSTON

Supplies through its MERCANTILE DEPARTMENT approved Bookkeepers, Cashiers, Stenographers, Salesmen, Clerks, Shippers, Entry Clerks, Boys, Porters, Janitors, Watchmen, Hotel Help, Engineers, Firemen, etc., Help for Institutions and Hospitals, and through its WOMEN'S MERCANTILE DEPARTMENT approved Women Bookkeepers, Cashiers, Stenographers, Saleswomen, Young Women for Office Work, Matrons, Nurses, etc.

When this Bureau was established in 1890 our purpose was to secure to employers a better class of help than they had been obtaining. Rapid growth and many voluntary statements testify to its convenience and the high grade of employees furnished.

Through our large clientage we can serve both employer and employee more promptly and satisfactorily than can any house not having our resources. The knowledge gained through experience is at the service of employers who desire our aid or advice in the selection of suitable persons for the places they wish to fill.

On application we will mail circulars descriptive of our Bureau, and blank forms whereon employers and employees can state particulars necessary to guide us in supplying their wants.

In order that Breck's Bureau might be most conveniently located for our mercantile patrons, both men and women, we recently secured commodious quarters at No. 406 Washington Street, which we fitted up in an appropriate and attractive manner. Here our manager, Mr. Wm. E. McGerigle, with an experienced and courteous corps of assistants, is prepared to give the best service in Boston or the country to all persons desiring employees or employment in mercantile lines.

Bear in mind that no person is sent out from our Bureau whose previous record for character and habits has not been carefully investigated and approved.

Yours respectfully,

Telephone, Richmond 1660

ANNUAL DESCRIPTIVE CATALOGUE

= OF =

High Grade Seeds

TO OUR CUSTOMERS

HE fact that for ALMOST A CENTURY we have carried on a successful and continually growing business, both in the line of Seeds and Agricultural Implements, proves conclusively the genuineness of our claim that we deal only in HIGH GRADE GOODS.

We take this opportunity to thank our friends for their many generous favors during the past year and to solicit their continued patronage in the future.

Free Delivery Anywhere in the United States. We deliver free to any Post-office, Railroad, Express Office or Freight Station at our expense, except where otherwise noted, vegetable and flower seeds at the pkg., oz., ¼-lb., ½-lb. and 1-lb. prices; bulbs at the single and dozen rates; books and other publications. If Beans, Corn and Peas are to be sent by mail or express, charges prepaid, please remit, in addition to price, at the rate of 8c. per pint and 15c. per quart.

Orders. We would impress on our friends the importance of sending us their orders early. Please do not wait until Spring, when we are so busy that there is sometimes unavoidable delay in filling orders.

Register Your Name for Next Year's Catalogue. We request all interested persons who visit our store to register their name and address on the books provided for that purpose. This kindness will be appreciated and will be an advantage to our patrons as well as ourselves.

Notice. While we exercise the greatest care to have all Seeds, Plants, Bulbs and Nursery Stock of the best kind, we do not give, and our agents and employees are forbidden to give, any warranty, express or implied. If you do not accept the goods on these terms, you must return them at once, and all payments therefor will be refunded.

JOSEPH BRECK & SONS (Corporation).

We issue the Following Publications and will gladly mail any of them free on application: Annual Catalogue and Gardener's Guide, published in January, Holland Bulbs and Plants, published in September, The Lawn, The Garden (Sixth edition), New Method Sweet Pea Culture, Success with House Plants, Points for Poultry Raisers, Catalogue of Agricultural Hardware, Implements, Machines and Woodenware, Illustrated Catalogue of Farms and Country Places.

GOLDEN ROLL OF HONOR

"A continuous business relationship of 40 years or more is certainly a fair test of integrity and honorable dealing."

THE continued growth of our Golden Roll of Honor is very gratifying to us. It is one of the sources of strength which enables us to maintain the standard that satisfies so many thousands of customers. It indicates the mutual confidence that exists between our patrons and ourselves. It shows that our methods are right, and that we supply our trade with "the best goods at fair prices."

It shows that our methods are right, and that we supply our trade with "the best goods at fair prices."

Our business, established over eighty years ago by the grandfather of the Brecks now in control, is still conducted under the same roof, but with its growth it has spread on all sides, so that we now occupy the entire block bounded by North Market Street, Merchants Row, North Street and Bendall's Lane. Five floors of 10,000 square feet each constitute our salesrooms, offices and accommodation for a working stock for our retail business.

Our great storehouse of eight floors in the massive State Street block affords facilities for carry-

ing and handling goods for our wholesale trade.

For this growth we are in a great measure indebted to the friends who constitute our Golden Roll of Honor, and to the many new customers they have made for us through their recommendations. We take this opportunity to thank all our friends for their many favors, and we beg to assure them that no effort will be spared to maintain the high standard of goods and service.

This year we are privileged to add to our list the names of six more valued customers whose pho-

tographs we reproduce on opposite page.

We print below recent additions to our already large list of Golden Roll of Honor friends who have traded with us forty years or more.

PLEASE NOTICE. We will esteem it a special favor if parties who have traded with us for forty years and upwards will advise us of the fact, with particulars as to length of time of their dealing with us, and of any features of interest that may be connected with the same during these long periods of years. One cannot but agree that when a silvery haired customer remarks to us, as is not infrequently the case, "I have traded with this house, father, son and grandsons," 40, 50 or even 60 years, as the case may be, the relation between us is a little more than that of mere buyer and seller, and that it is not surprising we feel it to be so.

Turnip		April to August	1/2	Thin to 4x18	60 to 75 "

1908—BRECK'S—1908 High Grade Novelties in Vegetable Seeds

BRECK'S HUB ASPARAGUS ROOTS.

No garden is complete without a bed of this popular vegetable; a great many of the best Asparagus beds in New England are made from the planting of this variety. The roots we offer are two years old, and we would suggest to any of our customers intending making a bed, to plant Breck's Hub Asparagus Roots.

Price, \$1.25 per 100. \$10.00 per 1000.

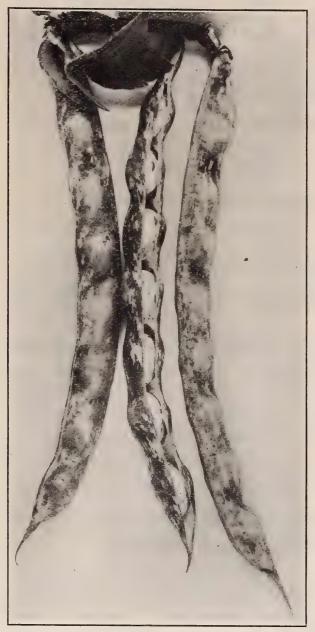

DIRECTIONS FOR MAKING ASPARAGUS BED.

An asparagus bed may be made from one or two year old roots, planted in April and May, or in October for fall planting. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly two feet. Plant the roots in rows four feet apart, leaving about 12 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow. Every fall a liberal dressing of coarse manure should be spread after the tops have been cut, and in spring forked in. The second season after planting the bed may be cut two or three times. Do not cut too closely, as the roots require the benefit of some foliage. Seed may be sown in April in drills one inch deep and one foot apart.

We have for sale a book on asparagus culture by F. M. Hexamer; price 50 cts.

Your Hub Asparagus is the most prolific I have ever seen, producing fifty per cent more than other roots planted alongside, which were procured from another source; and the quality is equal to the quantity.

P. W. C., Hyde Park, Mass.

Breck's Ruby Colored Dwarf Horticultural Bean.

BRECK'S Special Strain Brunswick Cabbage.

After many trials our grower has succeeded in producing this splendid strain of Brunswick Cabbage. The heads are large, solid and uniform in size, averaging 15 lbs. each. From seed planted in the field June 5th, the crop was ready to harvest October 1st. Pkt. 10 cts.; oz. 50 cts.; ½ lb \$1.50; lb., \$5.00.

BRECK'S Private Stock Warren Stone Mason Cabbage.

We consider this selection of this popular variety the best yet offered. It is grown in Essex County, Massachusetts, especially for our trade. It has few loose leaves, is very round and perfectly solid. Great care is exercised in selecting perfect heads from which to save seed. We recommend *Breck's Private Stock* as the best and most popular that is offered in the Boston market. Pkt. 10 cts.; oz. 40 cts.; ¼ lb. \$1.50; lb. \$5.00.

Breck's Ruby Colored Dwarf Horticultural Beans.

Enormously productive and will not spot or rust; vines of a branching habit, often having short runners. Leaves large, of bright green color; pods large, long and curved, green when young, but as the beans become ripe they turn a beautiful ruby color.

Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.

Dwarf Horticultural Wax Beans, Rust Proof.

A splendid bean and very productive. The vine is of strong and vigorous habit, bearing the pods well up from the ground, and thus being protected by the foliage they will not rust. Pods about 6 in. long, of a beautiful waxy yellow, delicious in flavor and stringless.

Pkt. 10 cts.; pt, 25 cts.; qt. 45 cts.

Dwarf Horticultural Wax Bean.

BARKER'S STRAIN EDMANDS BLOOD BEET.

Barker's Strain Edmands Beet.

A superior strain of Edmands Blood Beet, of splendid shape, uniform in size and of a dark red color. Its flesh is of exquisite tenderness and is free from any stringy or woody characteristics. The color is very deep crimson and is ringed or marked in a beautiful manner, making it very attractive when sliced for the table. Can be sown as late as July 20th with good results.

Customers wishing an early and finely flavored beet should include some of this seed in their order.

BRECK'S Market Garden Danvers Half-Long Carrot.

The seed we offer of this popular variety is of superior quality and carefully selected from the choicest stock. The carrot is of a rich dark orange color, very smooth and handsome, and from its length is easier to dig than the longer varieties. Pkt. 10 cts.; oz. 20 cts.; ½ lb. 75 cts.; 1 lb. \$2.50.

BRECK'S Paris Golden or Self-Blanching Gelery.

This strain has become deservedly popular. Many leading growers use it exclusively. Already many gardeners who planted it last season have bought for spring of 1908. The seed is originator's stock, French grown. It contains only a very few green plants, and is of unusually firm, crisp quality. Our customers consider it without a peer. Pkt. 10 cts.; oz. 50 cts.; ½ lb. \$1.50; lb. \$6.00.

BRECK'S Forcing White Spine Gucumber.

This strain is, without doubt, the best in all respects that is brought to the Boston market. The fruit is of uniform size and color, and is of mild flavor, very firm texture, with few seeds. It is a pedigree strain selected by an Arlington market gardener for a great many years. Pkt. 25 cts.; oz. \$1.00; ½ lb. \$3.00.

BRECK'S EARLY HARVEST SWEET CORN.

Breck's Early Harvest Sweet Corn.

BRECK'S WABAN LETTUCE.

An excellent variety of the loose heading type, very crisp and tender and of fine flavor. The outside leaves are slightly curled, with reddish brown edges. It is of quick growth and can be planted in the open ground extremely early.

Per pkt. 10 cts.; oz. 40 cts.; 1/4 lb. \$1.00.

May King Lettuce.

Extra large, round, solid heads, light green outside, with golden yellow heart, very tender and of fine flavor, excellent for forcing. Pkt. 10 cts.; oz. 40 cts.

See Special Offers on third page of cover.

We introduced this corn to our customers in 1906, and we are pleased to announce that since then it has proved a wonderful success, as our patrons cannot speak too high-ly of its merits.

ly of its merits.

We claim for it two distinctive qualities that will appeal to all lovers of this popular vegetable:—first, extreme earliness—it will mature 53 days from time of planting; second, deliciousness of flavor—it is superior in sweetness to any corn on the market.

Pkt. 10 cts.; pt. 20c.; qt. 35c.

Breck's Yellow Globe Onion.

We believe we are safe in saying that threefourths of all the Onion seed now offered is California grown. This fact accounts for the low price and also for the frequent disappointment met with in the crop, late ripening, flat and scallion bulbs being common results.

The strain we here offer is totally different. It is home grown and has been brought to the highest state of excellence by continued selection and care in growing. There is more of it sown by the leading onion growers of New England, who know what the market wants and what brings the highest prices, than all other special strains combined. We will take pleasure in furnishing to interested persons the names of a sufficient number of these leading growers who plant Breck's Yellow Globe to convince them of the facts. Pkt. 10 cts.; oz. 30 cts.; ½ lb. \$1.00; lb. \$3.00.

Ailsa Craig Onion.

We offer a very fine strain of this popular onion. It is large in size, yellow in color and a good keeper. We recommend it very highly to those who like raw onions on account of their pungent flavor. Per pkt. 10 cts.; oz. 50 cts.; ½ lb. \$1.50.

Breck's Waban Lettuce.

Breck's Old Glory Pea.

Sutton's Excelsior Peas.

A dwarf, early, wrinkled sort, height about 15 inches, pods large and well filled, a very heavy cropper and of delicious flavor. A favorite with growers who require large quantities. Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.; pk. \$3.00.

Admiral Dewey Pea.

This is without exception the largest podded pea of which we have any knowledge, and when to this is added heavy cropping and highest quality, it can readily be seen that it stands at the head of the late varieties. Height, $3\frac{1}{2}$ feet, foliage, vine and pod rich, dark green; remarkably healthy and vigorous, producing in abundance pods of largest size, frequently six inches in length, beautifully shaped,

Breck's Old Glory Pea.

Extra Early and Weather-proof.

Awarded First Prize Massachusetts Horticultural Society.

The pronounced success of our Old Glory Pea proves that it is the best pea on record; it is practically in a class by itself, and is without an equal, either as a market sort or for the home table. Our patrons who grow this variety are enthusiastic in praise of its early growing qualities and great productive powers. Pkt. 10 cts.; pt. 25 cts.; qt. 45 cts.; pk. \$3.00.

The "Old Glory" Peas purchased from you outdid everything that I ever planted in that line. I planted five or six different varieties and have tried them all. One-half acre lot planted with three pecks "Old Glory" seed yielded ninety-six bushels of handsome pods. Very truly yours,

> CARL F. KOCH, Market Gardener, Saugus, Mass.

Sutton's Excelsior Pea.

well filled with peas of largest size, tender and first-class flavor; seed green and wrinkled. Undoubtedly the best of all the class of long vine, large podded peas. Pkt. 10 cts.; pt. 20 cts.; qt. 35 cts.; pk. \$2.25.

Breck's Prize Strain Warty Hubbard Squash.

Awarded First Prize Massachusetts Horticultural Society.

We were fortunate in securing the entire stock of this splendid prize strain. The squash is larger than the old Hubbard, retaining all of its good features, being more prolific, and with a hard, green, warty shell, rendering it an excellent keeper. Pkt. 5 cts.; oz. 15 cts.; ½ lb. 50 cts.; lb. \$1.50.

Livingston's New Coreless Tomato.

The most perfect shaped canning variety ever produced. Large size, globe shaped, full at stem end, bright red, a strong grower and big cropper. Offered this season in packets only. Packet 20 cts.; 3 packets, 50 cts.

A field of Breck's "True Turkestan Alfalfa Clover," Grown on Cherry Hill Farm, Beverly, Mass.

BRECK'S TRUE TURKESTAN ALFALFA CLOVER.

LFALFA or Lucerne Clover is now commencing to find favor in the East; hitherto our eastern dairymen and farmers were a little skeptical as to the results obtained from planting this valuable clover. It has been demonstrated that splendid crops may be gathered from sowing Breck's True Turkestan Alfalfa at the rate of THIRTY POUNDS PER ACRE. Sow in spring as soon as the ground gets warm. Sow broadcast. Do not cover seed too deep.

Alfalfa grows best on a deep sandy loam with a loose sub-soil. The land must be well drained. It is a deep feeder. Plow the ground thoroughly, the deeper the better.

Alfalfa will grow in favorable soil anywhere from sea level to 7000 feet elevation.

It will not thrive on an acid soil; overcome acid condition with lime. Cut when first blossoms appear; cut in afternoon, allow it to wilt, put up in cocks, cover with hay caps, move each day until cured. Do not cut too late in the season.

From United States Government tests, one acre of alfalfa hay has produced as much beef as 9575 pounds of timothy hay, or almost two acres of timothy. It has produced as much beef as 11,967 pounds of red clover or equal to one and three-fourths acres.

For dairy cattle there is no forage that equals alfalfa. It is palatable, rich, easily digested.

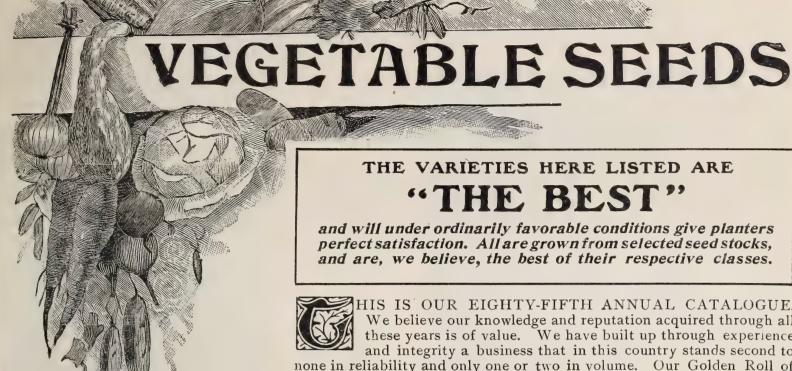

The feeding of alfalfa hay in winter gives the milk and butter a rich yellow color.

The Alfalfa seed furnished by you two years ago has proved a wonderful success. This year from an area of six acres I cut from first crop 20 tons 324 lbs. The first cutting was made June 8th; since then I cut three more crops and they were very satisfactory growths which I fed green to our cows. I certainly can recommend your strain of Alfalfa Clover to all your customers.

Yours truly,

HENRY FIELDEN, Supt. Cherry Hill Farm, Beverly, Mass.

Price per lb. 25 cts.; per 100 lbs. 22 cts. per lb.

THE VARIETIES HERE LISTED ARE THE BEST"

and will under ordinarily favorable conditions give planters perfect satisfaction. All are grown from selected seed stocks, and are, we believe, the best of their respective classes.

HIS IS OUR EIGHTY-FIFTH ANNUAL CATALOGUE. We believe our knowledge and reputation acquired through all these years is of value. We have built up through experience and integrity a business that in this country stands second to

none in reliability and only one or two in volume. Our Golden Roll of Honor shows that we are both able and willing to satisfactorily serve the gardening and farming public, else we would not be privileged to retain

these gentlemen as customers for such periods of years. We always consider our goods our best recommendation; and they continually bring us new patrons. If you have not had experience with our goods, or methods of doing business, surely some of your neighbors can tell you of them. If you desire "the best," inquire, and if results warrant it, send us a trial order and you will be satisfied.

Note.—Prices may vary as the season advances. Ours will always be as low as the lowest for goods of equal

quality.

Artichoke.

German, Artischoke.—French, Artichaut.—Spanish, Alcachofa.

Culture.—A rich sandy loam is desirable, but any soil made fine by deep culture, and enriched with plenty of well rotted manure, will answer. Sow seed in hot-bed early in spring, in rows six inches apart; transplant when large enough into boxes or pots. After danger of frosts is past plant in the open ground, two feet between the plants and three feet between the rows.

This method of cultivation will produce heads for culinary purposes by September. Seed may, if desired, be sown in the open ground in May, but the little tender plants should be given protection

until the cold weather of spring has passed.

Plants raised from seed sown outdoors will not give edible heads until the second summer. One ounce of seed will sow 30 feet of drill.

Large Green Globe. The best and most popular sort. Pkt. \$0.10 oz. \$0.35 1/4 lb. \$1.00 .10 " Early Purple, or Violet

Jerusalem Artichoke.

A species of sunflower (Helianthus tuberosus). A tuber that thrives well upon light dry soil and is cultivated for feeding sheep and swine. It is also used for pickles. The tops when cut and cured make an excellent dry fodder. It is propagated by tubers, which should be set in rows four to five feet apart and one foot apart in the rows. Three bushels are required to plant an acre. Qt. 25 cts.; pk. \$1.00 net.

Asparagus.

German, Sparget.—French, Asperge.—Spanish, Esparragos. (For price on Asparagus Roots, see Vegetable Plants.)

An asparagus bed may be made from one or two year old roots, planted in April and May, or in October. The bed should be made very rich with well-rotted manure, and thoroughly worked over to a depth of nearly two feet. Plant the roots in rows four feet apart, leaving about 12 inches between the plants in the row. Lay the roots flat in trenches, spreading them well, and using care to have all the crowns placed in the same direction. Cover lightly at first, gradually filling the trenches as the plants grow. Every fall a liberal dressing of coarse manure should be spread after the tops have been cut, and in spring forked in. The second season after planting the bed may be cut two or three times. Do not cut too closely, as the roots require the benefit of some foliage. Seed may be sown in April in drills one inch deep and one foot apart. One ounce of seed will sow 60 fe.t of drill.

Beans-English.

German, Grosse Bohnen. - French, Feve de Marais. - Spanish, Haba.

Plant as early in spring as the ground can be worked. The rows should be three feet apart; set the seed in the rows six inches deep, four inches apart. As the pods get formed, top the plants, thereby preventing too much sunning to vine.

Broad Windsor. The best variety for general use. Pkt. 10 cts.; qt. 35 cts.; pk. \$2.00.

Beans-Dwarf or Bush.

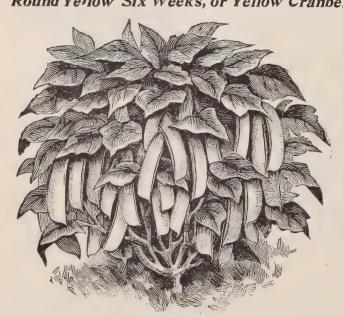

German, Bohne. - French, Haricot. - Spanish, Frijorenano.

To afford a regular succession of crops throughout the season, plant every two weeks, from about the beginning of May to the end of summer; but not until the soil becomes warm, as they are very sensitive to cold-Plant in rows 18 inches apart, two inches deep; cultivate frequently, but only when dry, as the scattering of earth on the foliage or pods, when moist, will cause them to become damaged with rust. One quart will plant 100 feet of drill.

Beans-Pole or Running.

German, Stangen Bohne .-- French, Haricots à Rames .--Spanish, Jidas.

It is desirable to make the planting of Pole Beans at least a week later than the first planting of the bush sorts, as they are more tender. Plant in hills three to four feet apart, putting four or five beans in a hill, and leaving space in the centre for the pole. A liberal quantity of well composted manure in each hill is of value. One quart of Limas will plant 100 hills. One quart of the smaller seeded sorts about 200 hills.

Five pounds Mangel or Sugar Beet at 28 cents per pound. Ten pounds Mangel or Sugar Beet at 25 cents per pound.

Borage.

The young leaves of this annual are used as a salad, or boiled like spinach. Sow in the spring, in light soil, and thin out to eight inches apart. The flowers are a pretty blue and afford excellent food for bees throughout a long season. Borage, pkt. 5 cts.; oz. 20 cts.

Borecole or Kale.

German, Blatterkohl. - French, Chou Vert. - Spanish, Breton.

Sow early in the spring in prepared beds, covering the seeds thinly and evenly; transplant in June, and treat in the same manner as for cabbage. They are extremely hardy, and will endure quite a low temperature. The Siberian variety is also sown in September for early greens. One ounce will sow 150 feet drill.

Dwarf Green Curled Scotch. Leaves of a bright green and very tender and closely curled. The quality is improved if the plants are touched by frost before being used. Pkt. 5 cts.; oz. 10 cts.; 1/4 lb. 25 cts.; lb. 80 cts.

Dwarf Brown. Similar to the preceding, but of darker color, very hardy.

5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 80 cts.

Siberian or German Greens. Sown in fall for spring use. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 20 cts.; lb. 70 cts.

Tall Green Curled Scotch. Similar to the dwarf, but of more vigorous growth. Pkt. 5 cts.; oz. 10 cts.; ¼ lb. 25 cts.; lb. 80 cts.

Broccoli.

German, Spargelkohl. - French, Chou Brocoli. - Spanish, Broculi.

This vegetable closely resembles the cauliflower, but is hardier. Like cabbage and cauliflower, it succeeds best in deep, rich, moist soil and in cool weather. The

Green Curled Scotch Kale.

seed should be sown at the same time and the plants receive the same general culture as cabbage. Broccoli completes its growth from seed in from 120 to 140 days; five to ten degrees of frost will not injure the plants when they are approaching maturity. One ounce of seed will produce about 1.500 plants.

Early Purple Cape. Hardy, heads of medium size, and co	ompact	Pkt.	Oz.	1/4 lb.
formation		.10	.35	1.25

In regard to the seeds I bought of you last spring, will say I never planted any better; I had a fine garden, my truck was first-class, also the seeds I sold; they all speak in very high praise of Breck's seeds. I have bought of all the leading seeds-men in the country, but your seeds are the best I ever used. They are without a peer, and I shall want more in the spring.

You can use this recommend as you like

Richmond, Maine.

Yours for prosperity, A. B. REED.

Brussels Sprouts.

German, Sprossenkohl.—French, Chou de Bruxelles.—Spanish, Berza de Brusela.

Species of the Cabbage family. It produces along the whole length of the stem Paris Market Brussels Sprouts. small sprouts resembling miniature cabbages. These heads are a great delicacy boiled in the same way as cauliflower. Seed should be sown about the middle of May in a seed bed, and the plants afterwards set out in rows two feet apart and cultivated like cabbage. Being small and hard, the sprouts are not in the least affected by frost. One ounce of seed produces about 1,200 plants.

Aigburth. The finest variety. Pkt. 5 cts.; oz. 20 cts.; ½ lb. 60 cts. Improved Paris Market. A most desirable strain. Pkt. 5 cts.; oz. 15 cts.; ½ lb. 50 cts.

Chervil.

German, Gartenkerbel.—French, Corfeuil.—Spanish, Cerafolio de Cafe.

Chervil, Curled. An aromatic sweet herb that resembles parsley. The young leaves are used in soups and salads. Sow evenly, in May, in drills half inch deep, one foot apart. 5 cts. per pkt.; 10 cts. per oz.; \$1.00 per lb. Chervil, Tuberous Rooted. Sow in May or June, after treatment same as for carrots. 5 cts. per pkt.; 20 cts. per oz.; \$1.50 per lb.

"The Winchester" Savoy Cabbage.

Cabbage.

German, Kopfkorl. — French, Chou Pomme. — Spanish, Berza. (For price on Cabbage Plants, see Vegetable Plants.)

All that Cabbage requires is the soil to be rich, deep, well-drained, and abundantly manured. For the early kinds, plant 30 inches between the rows and 16 in thes between the plants. For the late kinds, three feet between the rows and two feet between the plants. For very early use, sow in January or February, in hot-beds. Set out when the plants are strong enough into other hot-beds, or set in cold-frames in March. Transplant when danger from frost is past to the open ground. For a succession, sow in the open ground last of March or early in April. The late or winter crop seed can be sown in May and the plants set out in July. One ounce of seed produces 2,500 plants.

BRECK'S SAVOY CABBAGE "The Winchester"

The Cabbage for the market gardener to grow. The seed we offer was obtained after many years' careful selection from the best heads only. Seed planted as late as June 20th will mature about the middle of October; heads large, of splendid shape, fine flavor, and as a keeper for win-ter use it is unsurpassed. Pkt. 15 cts.; per oz. 75 cts.; per 1-4 lb. \$2.50.

BRECK'S WHITE BOUQUET CAULIFLOWER.

Cauliflower.

German, Blumenkohl.—French, Chou-fleur.—Spanish, Coliflor. (Price on Cauliflower Plants, see Vegetable Plants.)

Cauliflower is the most delicate and delicious of the Cabbage family. For the production of the cauliflower a rich, deep loam is required, a low moist situation being preferable. A liberal supply of water when possible produces very marked results. Seed of the very early variety should be sown in a hot-bed in February or March and set out by the end of April. For later supply, sow seed in May, choosing a cool, moist place. When large enough, transplant, making the rows about $2\frac{1}{2}$ feet apart, and 18 inches between the plants. Transplanting should be done in damp weather. To destroy the cauliflower-maggot, try one ounce of sulphuret of potassium dissolved in one gallon of water. Heat the liquid to about 100 degrees, and apply a tablespoonful to the stalk of the plant just above the ground. One ounce of seed produces about 2,500 plants.

Carrots.

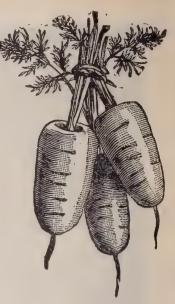

German, Mohre. - French, Carotte. - Spanish, Zanahoria.

Early Scarlet Forcing.

Guerande, or Oxheart.

Early Scarlet Horn.

Danvers Half-

Long, Stump Rooted. Carrots are grown largely both for feeding to stock and culinary purposes; the long varieties used for the former, the "Horn" and medium sorts for the latter. The "Horn" sorts can be grown on thin soil and are mostly for early use. The others prefer deep, sandy loam that was well manured the previous year for some other crop, such as potatoes or onions. Sow in April or May or for late crops for table use, up to the end of June, about one inch deep in drills 15 inches apart for garden sorts. The rows in field cultivation should be two feet apart. Thin out the plants from three to eight inches apart, according to variety. One ounce of seed is sufficient for 100 feet of drill, four pounds to an acre.

Cardoon.

German, Kardon. — French, Cardon. — Spanish, Cardo Hortense.

Cardoon is grown for the midrib of the leaf, which requires to be blanched in the same manner as celery. Sow early in spring, where the plants are to remain, in drills three feet apart, and an inch and a half deep, and thin out the young plants to a foot apart in the drills.

Large Smooth Spanish. Grows about four feet high

Pkt. Oz. Lb. \$0.05 \$0.20 \$2.00

Chicory.

German, Cichorie. — French, Chicorée. — Spanish, Achivoria de Cafe.

Large Rooted. Sow and treat in the same manner as carrots. This is the chicory of commerce used to mix with coffee. The roots are taken up, washed, cut in small Pkt. Oz. 1/4 1b. pieces and carefully dried before being used \$0.05 \$0.10 \$0.30

Witloof. Sow in May or June in drills, thin out to six inches apart, treat as *Endive* until end of summer, when it should be banked up

Collards, or Colewortz.

German, Blatterkohl. - French, Chou Cabu. - Spanish, Cabu.

Sow seed as for cabbage, in June, July and August in succession. Transplant when one month old into rows three feet apart and two feet apart in the rows. This vegetable is closely allied to the Cabbage family, used as greens; it is grown to a considerable extent in sandy sections, particularly in the South. One ounce of seed will produce about 3,000 plants.

Georgia. Per pkt. 5 cents; oz. 10 cents; lb. \$1,00.

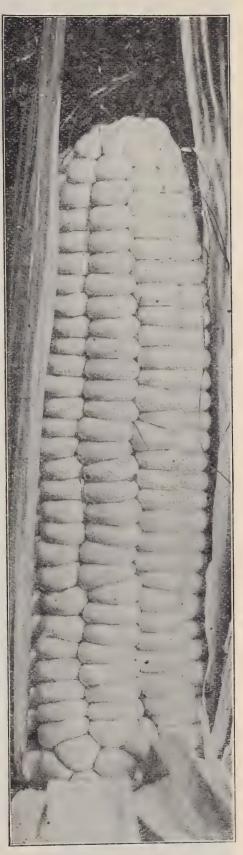

Large Rooted Chicory.

Corn.—Sweet.

German, Mais.—French, Mais.—Spanish, Mais.

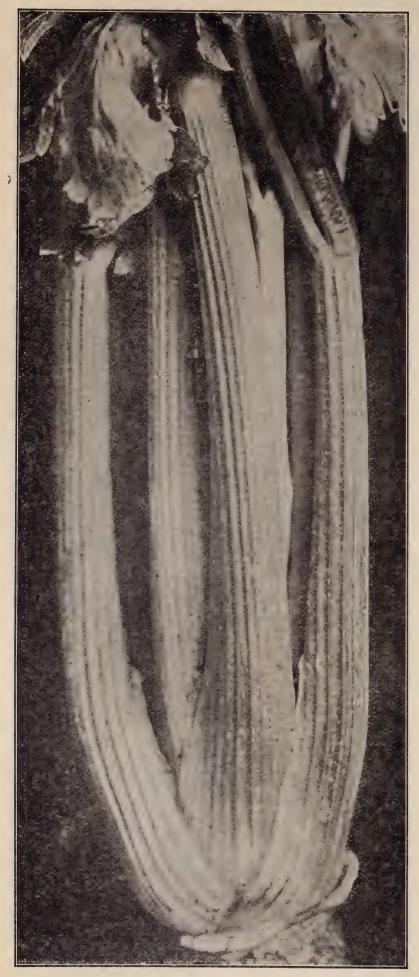

A rich, warm soil is best, especially for the earlier varieties, which ordinarily should not be planted before the middle of May. Successive plantings may be made until July. Plant in hills three or four feet apart each way, according to the height of the variety. One quart will plant about 200 hills.

We supply p	ackets of	corn	at 10 d	ts. each.

Corn Salad, or Fetticus.

German, Lammersalat. - French, Mache. - Spanish, Macka Valerianilla.

Used as a salad. It is sown very early in spring, rows one foot apart, and is fit for use in six or eight weeks. For early spring use sow in September, and winter in cold-frames, or cover with litter. One ounce will sow 100 feet of drill. Large=Leaved. Per pkt. 5 cts.; oz. 10 cts.; lb. 50 cts.

Celery.

German, Sellerie. - French, Celeri. - Spanish, Apio. (For price on Celery Plants, see Vegetable Plants.)

Sow seed the first or second week in April in hot-bed or cold-frame. As soon as the plants have attained a height of three inches, transplant in prepared border, setting them four inches apart. In order to secure "stocky" plants, cut off the tops once or twice before again transplanting into richly manured soil, in rows four feet apart, and from seven to nine inches plant to plant. Keep down all the weeds, and as fall approaches draw earth up to the plants, keeping the stalks well together. When well blanched it is ready for use. For winter use it is usually placed in frames and covered with litter, or stored in pits or cold cellars. Some of the varieties, such as Golden Self-Blanching and White Plume, may be blanched by simply placing a board 12 to 15 inches wide on edge on each side of the row, and to hold them in place tack bits of laths across the rows at the top. The turnip-rooted variety does not require blanching, and may be planted in rows one foot apart. One ounce of seed produces about 3000 plants.

Cress.

German, Gartex und Brunnen Kresse, — French, Cresson. — Spanish, Masiuerzo.

Control of this black of the Spring season, when Pkt. Oz. 1/4 lb. Lb. Curled, or Peppergrass. The popular sort. Sow thickly in drills in the spring season, when Pkt. the ground is in good working order. As the plants rapidly run to seed, repeat sowings at intervals of about two weeks. One ounce will sow about 100 feet of drill

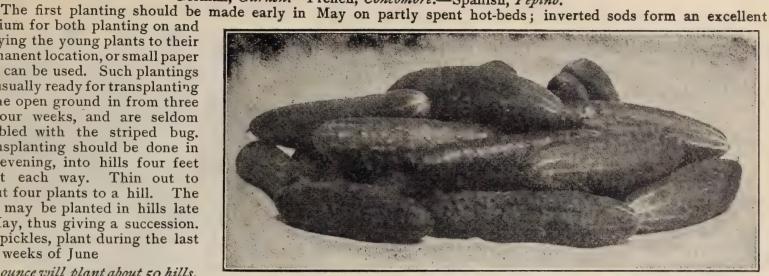

Upland Cress. A perennial variety, flavor pungent, resembling Water Cress. Sow in drills \$0.05 \$0.10 \$0.20 \$0.50 one foot apart, in April .25 .75 Water Cress. This succeeds only in damp soils on the borders of ponds or streams, or where its roots are partially submerged in water. Seed should be sown about a quarter of an inch deep. The plants are rapidly propagated by root extension and self-seeding. . .10 4.50 .40 I.25 See Special Offers on third page of cover.

Cucumber.

German, Gurken.-French, Concombre.-Spanish, Pepino.

medium for both planting on and carrying the young plants to their permanent location, or small paper pots can be used. Such plantings are usually ready for transplanting to the open ground in from three to four weeks, and are seldom troubled with the striped bug. Transplanting should be done in the evening, into hills four feet apart each way. Thin out to about four plants to a hill. The seed may be planted in hills late in May, thus giving a succession. For pickles, plant during the last two weeks of June

Dandelion.

German, Pardeblum. - French, Pisse-en-lit. - Spanish, Amargon.

Sow seed in May or June, in drills half an inch deep and 12 inches apart. Cultivate, to keep down the weeds during summer, and the following spring the leaves will be fit to cut. Upon the approach of severe weather cover with litter, which should be removed early the following spring. Dandelion that has been blanched is much more tender and entirely lacks the bitter flavor of the plant matured in the open. The blanching is accomplished by placing two boards inverted V-shape over the rows. One ounce will sow 200 feet of drill. One pound will sow an acre.

American Improved Dandelion. Pkt. Oz. 1/41b. Lb. American Improved. Large, fleshy leaves \$0.10 \$0.50 \$1.75 \$6.00 French Garden .20 .70 2.25 .05 Thick-Leaved French. Large and tender .40 1.25 4 00

Egg-Plant.

German, Eierpflanze. - French, Aubergine. - Spanish, Berengena.

(For price of Plants, see Vegetable Plants.)

Sow in hot-bed early in spring, and transplant when two inches high into another bed or small pots. Plant out three feet apart when weather is perfectly settled and warm. Keep the plants watered for a few days after transplanting until they begin to show signs of being established. One ounce will produce about 1,000 plants.

Endive.

German, Endivien. - French, Chicorée. - Spanish, Endivia.

Sow for an early supply about the middle of April. As it is used mostly in the fall months, the main sowings are made in June and July. When up, thin out to eight inches apart, and water well afterwards if dry. When the leaves are six to eight inches long, blanch by gathering together and tying near the top with yarn or raffia. This must be done when the plants are quite dry or they will rot. Before cold weather, take up carefully with a ball of earth to each plant, and place close together in a cold frame or cellar for use. Keep dry and give plenty of air, or they will rot. One ounce will sow 150 feet of drill.

Lettuce.

German, Lattich-Salat. - French, Laitue. - Spanish, Lechuga.

(For price on Lettuce Plants see Vegetable Plants.)

The most easily grown of all open-air plants used for salads. It requires a warm soil that has had a liberal dressing of well-rotted manure and abundant moisture. To be of satisfactory quality, the growth should be rapid and vigorous. Seed may be sown in a frame in February or March, the plants set out as early as the ground can be worked, as light frosts will not injure them. Set the plants nine inches apart in the rows, and 18 inches between the rows. For successive crops, sowing may be made every two weeks up to the end of August. To grow Cos successfully the seed must be sown early in a hot-bed, and when large enough transplanted to a cold-frame in order to have good plants ready to set out when the ground becomes workable. They require tying for a few days, when grown, to blanch them. Breck's Boston Market, Big Boston and Hittinger's Belmont are varieties especially suitable for growing under glass. One ounce of seed will pro-

duce about 4,000 plants. All the Year Round. Medium size, firm heads that do not readily run to seed \$0.05 \$0.15 \$0.40 \$1.25 .25 Big Boston. Mushroom.

German, Champignon. - French, Champignon. - Spanish, Hongo. (Our special offers do not apply to Mushroom Spawn.)

Mushrooms.

Mushrooms may be grown in cellars, out-houses, sheds, nder greenhouse benches. The temperature should range between 55 and 60 degrees. Use a mixture of equal weights, fresh horse droppings and loam that has no manure in it. Before placing this mixture in the bed turn it over every day for a week, so that it does not heat violently, and be careful to keep it under cover, so that it cannot get wet. Then begin to make the bed by spreading thin layers of the mixture, and pound each firm, until you have in all a depth of eight to ten inches; leave it thus for a few days

until the heat runs up to 100 degrees or over and then declines to 90 degrees; when this point is reached it is ready for spawning, which is done by making holes three or four inches deep and 12 inches apart each way; into each hole put a piece of spawn about as large as a hen's egg and fill in the hole with compost. At the end of 10 or 12 days the spawn will have run through the whole bed. There should then be spread over the entire surface about two inches of fresh loam. Over all place a few inches of straw. All that remains to be done is to keep the temperature as near 60 degrees as possible. Ordinarily, if the conditions are right, mushrooms will appear in about six weeks and continue to come for about a month. In the event of the surface of the bed becoming very dry sprinkle it freely with water at a temperature of about 100 degrees. After the crop has been taken off the bed, it should receive a dressing of fresh loam to a depth of half an inch, thoroughly firmed, over the entire surface, and when dry a sprinkling with water as above recommended, and a second crop will soon be had. A brick of English spawn is sufficient for nine square feet of bed.

Mushroom Spawn. Original English Milltrack, superior to all others. Lb. 15c.; 50 lbs. \$5.00; 100 lbs. \$9.00.

Mushroom Spawn. Genuine French Virgin. Lb. 50 cts.; 100 lbs. \$45.00.

Mushroom Spawn. American pure culture. Per brick, 25 cts.; per doz., \$2.50.

"How to Grow Mushrooms," by Faulkner, the most practical work, \$1.00. "Mushroom Culture," by Robinson, 50c. · See Special Offers on third page of cover,

Melon (Musk):

German, Melone. - French, Melon. - Spanish, Melon.

Melons prefer a warm, light, sandy loam; being tender, plantings should not be made before the middle of May. Plant about six seeds, half-inch deep, in hills five to six feet apart each way. The hills should have at least a peck of well-rotted compost thoroughly stirred into each of them before the seed is planted. When well grown thin out to three plants in a hill. If an earlier crop than this method of cultivation allows is desired, the directions given for growing early cucumbers may be followed. Slug shot, tobacco dust, coal ashes or dry lime are excellent to sprinkle over the young plants to prevent the attack of insects. One ounce will plant about 60 hills. Two pounds will plant an acre.

Melons for Forcing (Imported Varieties).

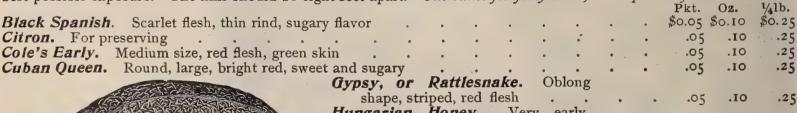

Invincible Scarlet. Form globular, orange-red when ripe, fine flavor. Pkt. 25 cents. Sutton's A-1 Improved. Scarlet fleshed variety of delicious flavor. Pkt. 25 cents.

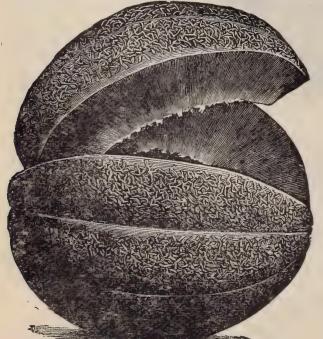

Mango. Vine orange or vegetable peach, size, shape and color of an orange, thick, meaty flesh .05

Melon (Water).

French, Melon d'eau. — German, Wassermelone. — Spanish, Sandia.

Watermelons require the same general treatment as musk-melons; but being more tender they should have the best possible exposure. The hills should be eight feet apart. One ounce for forty hills; three pounds for an acre.

Miller's Cream Musk Melon.

.25 .25 Hungarian Honey. round shape, brilliant red flesh .10 .25 Ice Cream. Medium size, solid, scarlet flesh, fine flavor .60 .TO -20 Mountain Sweet. One of the best for general culture .05 .25 Phinney's Early. A standard sort for New England, bright-red flesh, sweet and tender .05 .10 .25 Stokes' Early. Good quality, early Sweetheart. Very large, fine quality Vick's Early. Early, medium size, .05 .IO .25 .25 .IO .05 oblong form, pink flesh .05 .25 Martynia.

The seed pods are used for pickling, and should be gathered when green and tender. Plant in the open ground the last week of May in rows two feet apart, making hill one foot apart in the rows; place several seeds in each hill, and when well up thin out to one plant. The seed may also be sown in a hot-bed, and the seedlings afterwards transplanted. One ounce will plant 50 hills. Pkt. Oz. 41b. Lb.

Mustard.

German, Senf. - French, Moutarde. - Spanish, Mostaza.

Cultivated for salad. The leaves are used like cress when very young. Sow thickly in rows at different times from April to June, and cut when about two inches high; for use during winter, it may be sown at intervals in boxes, in the greenhouse, or in a frame. One ounce will sow 40 feet of drill. Pkt. Oz. 1/4 lb. Brown or Black. More pungent in flavor than white . \$0.05 \$0.10 Chinese. Leaves twice the size of the ordinary white mustard, of a deeper green, flavor pleasantly sweet and pungent, and desirable as a salad .05 .15 .30 1.00 . . . White London .05 JO.

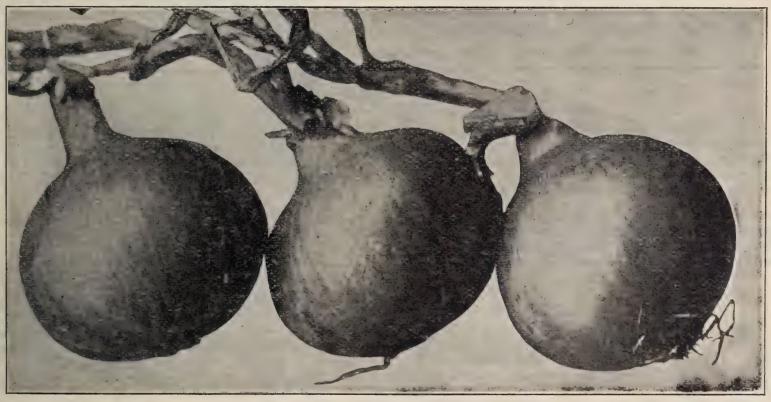

Nasturtium, or Indian Cress.

German, Indianische Kresse. - French, Capucine. - Spanish, Capuchina. Cultivated both for use and ornament; the seeds while young and succulent are picked and used as capers. The young leaves are also useful in salads. The many beautiful colored flowers, which bloom freely all summer, add a charm to the garden. One ounce will sow 40 feet of drill. Pkt. Oz. ¼lb. Lb. . \$0.05 \$0.15 \$0.60 \$1.75 **Dwarf.** Good for borders Tall. Excellent for covering fences, trellis-work, etc. . .05 .15 .50 1.50 For complete list of finest flowering sorts, see page 98.

Okra, or Gumbo.

German, Essbarer. - French, Gumbo. - Spanish, Quibombo.

This vegetable is of the easiest culture, and grows freely, bearing abundantly in any ordinary garden soil. Sow early in May, in drills two inches deep, thin out the plants to about three feet apart. One ounce will sow 40 feet of drill. Oz. Lb. Pkt. 1/2 lb. **Dwarf Green.** Early and productive, tender pods . \$0.05 \$0.10 \$0.25 \$0.75 Tall Green. Later than the foregoing, an immense cropper, pods extra large and tender .25 .IO .05 -75 .25 White Velvet. Large, creamy-white pods, very tender .05 .IO

Breck's Yellow Globe Danvers Onion.

Onion.

German, Zweibel. - French, Ognon. - Spanish, Cebolla.

The onion thrives best in rather strong, deep, loamy soil, which should be well enriched with old well-rotted manure or compost, or what is better, deeply trench, add manure the autumn previous to sowing, and lay upon ridges during the winter to soften. Sow the seed thinly in drills about one-quarter inch deep and one foot apart. To ensure quick and safe germination after sowing the seed, the drills should be trod along evenly with the foot, and then raked even, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed. When three inches high, thin to three inches apart. Hoe frequently. Where the hoe cannot be used, the soil should be stirred with the fingers, other-

	weeds will quickly grow up and choke the crop. <i>One ounce</i>

The Yellow Globe Danvers Onion Seed I purchased of you last year gave me excellent satisfaction—from an area of 12 feet by 22 feet I gathered three barrels of good merchantable onions. Other seed included in my order was entirely satisfactory.

Yours truly,

M. R. NEWCOMB, Damariscotta Mills, Maine.

Parsley.

German, Petersilie.—French, Persit.—Spanish, Perejil.

Soak the seeds a few hours in tepid water, and sow early in the spring in drills one foot apart; thin out the plants to three or four inches apart; a single row forms a very good edging for bed or walks. The seed germinates very slowly, and sometimes two or three weeks will elapse before the plants make their appearance. To preserve in winter, transplant to a light cellar or cold-frame. The Turnip-Rooted variety should be thinned out while the plants are quite young, and afterwards treated the same as carrots. One ounce to 150 feet of drill.

Hamburg, or Turnip-Rooted. Roots used for flavoring soups	•	•		.05	.10	.25	-75

Parsnip.

German, Pastinake.—French, Panais.—Spanish, Pastinaca.

Sow thick in April, in rows 18 inches apart, and one inch deep, in a rich, deep soil, well manured the previous fall, or with fine manure early in March. When the plants are two or three inches high, thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a sufficient quantity for winter use, leaving the rest in the ground until spring to be dug up as required. One ounce for 100 feet of drill; five pounds to an acre.

Pumpkin.

German, Kurbis.—French, Courge.—Spanish, Calabaza.

The pumpkin is now little used except for agricultural purposes, the squashes being so much sweeter, drier and finer grained for the kitchen. The farmer however finds the pumpkin a serviceable addition to his feed. The most common and least troublesome method of cultivation is to plant among the corn in hills eight feet apart, four seeds in a hill.

Peas.

German, Erbse. - French, Pois. - Spanish, Chicaros.

Peas come earliest to maturity in light, rich soils, but for a general crop a deep loam or moderately heavy soil is better. Sow the smooth sorts as early in spring as the ground can be worked, and make successive sowings every ten days, the wrinkled sorts being given the preference as soon as the ground is warmed up. Plantings of the earlier sorts, such as Breck's Excelsior, may be made through July and even up to the 10th day of August with reasonable hope of a crop. Sow in rows, from two to five feet apart, according to the height of the variety. One quart of peas will sow about 100 feet of drill.

The seeds of the sorts to which an asterisk (*) is prefixed

are wrinkled.

See Special Offers on third page of cover.

Potatoes.

(Prices subject to market changes.)

Special prices on large quantities quoted on application.

offers do not apply on potatoes. Of the many varieties of potatoes that claim public favor, we have

selected only a few, and these the best in cultivation. We aim to include in our list only those sorts which we have found by actual test are worthy of cultivation. Orders will be booked as received, and shipped in rotation, after danger of freezing is over; and as potatoes are of a perishable character, we assume no responsibility for damages incurred in transit, but we will, of course, exercise the greatest care to guard against sudden changes in the temperature. All the potatoes we offer are grown from selected stock especially for seed purposes.

They are calculated to give he best results to planters, and when compared with common stocks will more than pay in increased crop for the small extra cost of seed, while the quality will be better and more uniform. Ten to 12 bushels will plant an acre.

Rhubarb.

German, Rhabarber. - French, Rhubarbe. - Spanish, Rhubarbo Bastardo. (For price of Rhubarb Roots see Vegetable Plants.)

Sow early in the spring, in drills a foot apart, thinning out to about the same distance apart in the rows when a few inches high. In fall, or the following spring, transplant into deep, rich soil about three feet apart each way. If propagated by dividing the roots, it may be done either in fall or spring, planting it at the same distance apart as given above.

Linnæus. Early, large, and tender. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 50 cts. Victoria. Very large, later than Linnæus. Pkt. 5 cts.; oz. 20 cts.; ¼ lb. 50 cts.

Radish.

German, Rettig, Radieschen. - French, Radis, Rave, Petit Rave. - Spanish, Rabano.

Radishes require a light, rich, sandy loam; heavy or clayey soils not only delay their maturity but produce crops much inferior, both in appearance and especially in flavor. For a constant supply, sow from the middle of March until September, at intervals of two or three weeks. For an early supply they may be sown in a hot-bed in February. For winter radishes, sow the seed about beginning of July, and keep the roots during winter in a cool cellar, covered with earth. They should be placed in cold water an hour or so before using. One ounce of seed will sow 100 feet drill; 10 lbs. per acre.

Spinach.

German, Spinat. - French, Epinard. - Spanish, Espinaca.

Spinach likes a rich soil, and should be sown for a main crop in August or September. When cold weather sets in, it should be protected from frost by covering it with straw and brush. Sow the seed of New Zealand Spinach (which must be scalded and soaked in hot water before sowing) in hills three feet apart each way, three or four seeds in a hill. This is fit for cutting all summer. One ounce will sow 50 feet of drill; 12 pounds per acre.

Pkt. Ωz . 1/4 lb. \$0.05 \$0.10 \$0.15 \$0.40 .05 OI. .15 .35 .05 1.00 .35 .05 .10 .15 Prickly, or Winter. Recommended for fall sowing .05 .IO .15 -35 Monstrous Viroflay. Salsify, or Oyster Plant.

German, Boksbart. - French, Salsifis. - Spanish, Ostra Vegetal.

The demand for Salsify is increasing from year to year, as its delicious qualities are becoming known. It is used stewed, boiled, or fried, and sometimes as a salad sliced raw in

vinegar with salt and pepper. When cooked it has an oyster flavor, and is commonly called "Vegetable Oyster." The directions for growing and keeping are the same as for parsnip. One ounce will sow 50 feet of drill; 10 lbs. to the Pkt. Oz. ½ lb. Lb.

\$0.10 \$0.20 \$0.50 \$1.50 Breck's Improved Long White. Roots of medium size, white and smooth Mammoth Sandwich Island. Twice as large as the preceding, and of fine quality . .20 .50 1.50 .IO

Tobacco.

Connecticut Seed-Leaf. Best adapted to the climate of the Northern and Middle States . .05 .25 2.00 .30 3.50 Havana. Imported seed

Tomato.

German, Liebsapfel. - French, Tomate. - Spanish, Tomate.

(For Tomato Plants, see Vegetable Plants.)

The seeds should be sown in a hot-bed about the first week in March, in drills five inches apart and half an inch deep. When the plants are about two inches high, they should be set out about four or five inches apart in another hot-bed. About the middle of May the plants may be set in the open ground; they are planted for early crops on light, sandy soil, at a distance of three feet apart, in hills in which a good shoveful of rotten manure has been mixed. On heavy soils, which are not suited for an early crop, they should be planted four feet apart. Water freely at the time of transplanting, and shelter from the sun for a few days until the plants are established. One ounce will produce about 2000 plants.

.05 .10 .20 .50

Purple-Top Flat Strap Leaf

best; no manure should be applied at the time of sowing, unless it be well-decomposed compost, or the roots would be liable to be bad-flavored. The ground should be dug or ploughed deep and made mellow and fine. Sow the seed of the flat sorts broadcast, and rake in evenly. After they are well up, thin to six or eight inches apart, and keep them clear from weeds. The Ruta Baga sorts should be sown in drills 15 inches apart, and for winter use may be sown from the 20th of June to the middle of July, on land that has been well manured for other crops in spring; thin out as for the early crop. One ounce will sow 150 feet drill. Two pounds will sow one acre in drills. One pound will sow one acre broadcast. Pkt. Oz. 1/4 lb. Lb.

Breck's King Seed Oats.

The King Seed Oats introduced by us last year proved a wonderful success. Our many customers who grew them are enthusiastic in their praise. This splendid large variety of oats have filled a long felt want among the farmers and growers of grain. Many planters make the common mistake of sowing oats that are used for feeding purposes, and are usually disappointed in their crop.

In Breck's King Seed Oats we have a variety of vigorous growth; the straw is of good length, very firm, does

not lodge easily and is wonderfully productive.

Per Bushel for \$ 1.50 10 " 13.50 5 Bushels for \$ 7.00 20 " " 26.00

A Field of Breck's "King Seed Oats" being Harvested at Alta Crest Farm, Spencer, Mass.

We append below one of the many testimonials commending the valuable qualities of these oats.

I consider your new King Oats to be the best that I have ever grown. The straw is stiff and strong, and the heads are long and filled to the tip with very plump, heavy kernels.

ARTHUR H. SAGENDORF, Alta Crest Farm, Spencer, Mass.

MISCELLANEOUS SEEDS. For Forage Grops, Plowing Under, Etc.

OUR SPECIAL OFFERS DO NOT apply on goods under this heading.

The farmers of New England hitherto have not paid sufficient attention to, or given the many new and valuable plants for these purposes anything like a fair trial, but have been satisfied to get along with the old time fodder corn and Hungarian. We want every Agriculturist to plant, even if only in a small way, one or more of the sorts named in the following list this season. Larger crops of better quality and improved soil conditions will surely result.

Soya Beans. These grow to a height of two and one-half to three feet and have stiff stalks. The beans mature together, so can be cut down and thrashed afterwards. May be fed vines, stalks and all, or stock can be turned into field on them when matured. They are as valuable as a soil improver as clover. When sown broadcast for forage and soil-improving crops, **Soya Beans** should be sown at the rate of one bushel per acre. Sowing them thickly will revent the stalk from growing too coarse,

and enable them to be cut and turned under to better advantage. Sowing for ensilage, it is better to sow in drills with the corn, at the rate of about eight quarts to the acre. Or they can be sown by themselves, in drills three feet apart, at the rate of two pecks per acre, and cultivated. They will make largest yield of beans put in this way.

A large growing, yellow seeded variety, especially suitable for ensilage and plowing under. Breck's Soya. 20 cts.; pk. \$1.00; bu. \$3.50.

Medium Green Soya. An early sort, that is likely to mature its pods in New England. None to offer - crop a failure

Velvet Bean (Dolichos multiflorus). Used by the farmers of Florida and other Southern States as a forage plant and also as a fertilizer plant for turning under. It is planted in rows four feet apart and one foot in the row, two or three beans in a place, as soon as danger from frost is past. We do not believe the beans will ripen in ordinary seasons in Massachusetts, but the crop for forage or turning under will prove valuable. pk. \$1.00; bu. \$3.25

Beggar Weed. Florida or Giant Beggar Weed (Desmodium tertuosum). An erect leguminous annual, growing from three to eight feet high, with abundant foliage, valuable for forage or for soil renovation. It is especially recommended for turning under on light, sandy soils. Sow, after the ground is warm and moist, at the rate of 10 lbs. of seed per acre, and cover very lightly. Lb. 60 cts.; 10 lbs. \$5.00.

Broom Corn, Long Brush Evergreen. Sow 12 quarts per acre, after danger from frost is passed. It succeeds

best in a good, deep, moderately moist soil. Lb. 15 cts.; 10 lbs. \$1.00.

Lupins, Yellow. This succeeds in the poorest soils, and is very valuable for plowing under to improve sandy soil. It makes good forage, either green or as hay. Sow in spring when the ground has become warm, 90 lbs. to the acre. 20 cts. lb.; 100 lbs. \$10.00.

—Blue. Used for plowing under. 20 cts. lb.; 100 lbs. \$10.00.

Millet, Pearl (Penicillaria spicata). A valuable and very productive fodder plant; should not be sown until danger from frost is over. This Millet has frequently been sold at very high prices under the names of Brazilian Millet and Penicillaria Zeavides. Drill, 18 inches apart, 10 lbs. to acre. Lb. 15 cts.; \$10.00 per 100 lbs.

Dwarf Essex Rape.

Prices subject to change without notice.

Farmers of the United States are just beginning to find out what England has known for many years, that the Fodder Rape is the most valuable green feeding plant known, especially for sheep. Dwarf Essex Rape is easily grown and perfectly hardy, and possesses remarkable fattening properties. One acre will pasture 36 head two months, and lambs will mak a gain of eight to 12 pounds a month. **Pigs and cattle are also very fond of it.** The plant is a rank grower and hould have heavy manuring as well as high cultivation. Any corn soil will grow Rape. Sow the seed by the end of June, and the crop can be ready to feed at a season when it is most needed. By sowing different pieces several weeks apart a continuous supply of good feed can be had. When sown in June the Rape will have to be fed during August, though if the first crop were cut about four inches from the ground, there would be a second growth that would be useful after that time. For the breeding flock a piece should be sown about the first week in July, with some even later, and the chances taken on its withstanding the drought. It does well sown with oats. After the oats are cut the Rape grows rapidly. From half an acre there was cut nine and three-quarters tons of green Rape, or it yielded at the rate of 19 tons per acre.

If the soil is rich and clean sow broadcast; if not so clean, sow in drills and cultivate as for corn. Rape is

especially adapted for a catch crop, succeeding well when for any cause other crops have failed; as it, like turnip, makes its growth late in the season, can be sown on stubble, and will furnish excellent pasturage when much

needed in the fall. In drills sow 10 lbs. per acre; broadcast 15 lbs. per acre. Lb. 15 cts.; 100 lbs. \$10.00.

Spurrey (Spergula arvensis). Annual. This plant will grow on land that is too dry and too thin to support clover, and so rapidly that three sowings may be made in one season. The crop may be fed both green and as hay. It is in condition to pasture sheep or cattle on in about six weeks after sowing, and sowings may be made

every month from April to August. Sow broadcast 20 pounds per acre. Per lb. 15 cts.; per 100 lbs. \$10.00. Vetches, Spring Tares (Vicia sativa). Sown broadcast at rate of one to one and a half bushels to the acre, like wheat or barley, and sometimes mixed with oats for soiling. Used in France and Canada as a substitute for peas. Also ground up into flour, after which it is mixed with wheat flour for making bread. A valuable plant. Per qt. 20 cts.; per bush. \$3.00.

BRECK'S SAND OR WINTER VETCH (VICIA VILLOSA) AND GOLDEN CHAFF WINTER WHEAT.

(Our Special Offers do not apply on goods under this heading.)

This mixture of a non-legume and a legume is a very desirable spring green fodder. It will produce excellent crops on poor, sandy soils as well as on good land; grows to a height of four to five feet. It is perfectly hardy throughout the United States, and should be sown in the fall. It is the earliest crop for cutting, being hardier and nearly a month earlier than Scarlet Clover, and a full crop can be taken off the land in time for planting spring crops. Every dairyman and stock-breeder in the United States should have a field of it, and if you try it once you will never be a season without it. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. If more of the fodder mixture has been produced than can be fed green, the balance may be made into hay.

A Field of Breck's Sand or Winter Vetch and Golden Chaff Winter Wheat growing on Cherry Hill Farm, Beverly, Mass.

Seed for the above field was sown broadcast October 1st, at the rate of three bushels wheat and one-half bushel Vetch to the acre, and was harvested June 15th and produced twelve to fifteen tons green fodder to the acre.

Note..—Customers who wish to sow in the spring may use Fyfe spring wheat and spring Vetches (Vicia Sativa) in the same proportion per acre.

PRICES:

The Sand Vetch and Winter Wheat furnished us last year gave excellent satisfaction—we cut from 12 to 15 tons of green fodder to the acre, and not being in a position to use all as green fodder, we cured it and the cattle eat it as well as they eat clover mixed hay. I will want seed enough to sow 15 to 20 acres this fall.

Yours truly.

Beverly, Mass.

HENRY FIELDEN, Supt. Cherry Hill Farm.

Breck's Massachusetts Grown Japanese Barnyard Millet (Panicum Crus Galli).

OUR SPECIAL OFFERS DO NOT apply on goods under this heading.

Barnyard Millet (Panicum Crus Galli) makes a desirable green feed for the first three weeks of August; is an enormous cropper, growing from six to eight feet high. Three crops can easily be had from one seeding in a season; nearly 20 tons of green fodder from three cuttings. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July, broadcast at the rate of 25 lbs. per acre, or in drills 18 inches apart, 15 lbs. to the acre. Price per lb., 10 cts.; per 100 lbs., 8 cts. per lb.

The Massachusetts grown Barnyard Millet purchased from you last spring has given the best of satisfaction. We planted from eight to ten acres, resulting in a crop aweraging fully six feet in height—for the amount of acreage, it has certainly given us more fodder to the acre than anything else, outside of corn. We think so well of it that we shall plant ten acres or so every year. Your struly,

W. A. BLODGETT, Prop. South Lincoln Dairy,

South Lincoln, Mass.

Southern Cow Peas (Vigna Catjang). Make Poor Land Rich.

Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Pea is most popular, especially for medium or light soil. They should be sown in May or June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their full growth. While this crop is very largely grown wherever known, with the results attained from it the wonder is that it is not grown ten times as much as at present. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a

Panicum Crus Galli, Barnyard Millet.

soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers. Nitrogen or ammonia in commercial fertilizers is valued at 15 cents per pound.

Clay, or Wonderful. Has matured in New England. 20 cents qt.; bush. \$3.50. New Era. Early and large yielder. 20 cents qt.; bush. \$3.50. Southern Black. Immense cropper. 20 cents qt.; bush. \$3.50. Southern Black Eye. A favorite variety. 20 cents qt.; bush. \$3.50. Southern Yellow Eye. Early and a heavy cropper. 20 cents qt.; bush. \$3.50. Whippoorwill. One of the earliest. 20 cents qt.; bush. \$3.50.

Northern Field Peas.

Peas, Canada or White Field. Unsurpassed as a green feed for milch cows. Sow with oats or Barnyard Millet. Broadcast two bushels peas and two bushels cats per acre or eight quarts Barnyard Millet. Pk. 60 cts.; bush. \$2.00.

— Green Canada Field. Used like the above. The dried peas are also used for boiling. Pk. 75 cts.; bush. \$2.25.

- Black Eye Marrow. (See page 36.)

White Marrow. (See page 36.)
 Flat Forage (Lathyrus sylvestris). A valuable perennial forage plant, does well on poor, sandy soil, its deeply penetrating roots enabling it to stand severe drought. The forage is relished by all farm stock. Plant the seeds thinly in drills one foot apart. Per oz. 10 cts.; lb. 60 cts.

Sorghum.

(Our Special Offers do not apply on goods under this heading.)

Twenty-five pounds per acre is sown in drills. For dry fodder, broadcast 100 lbs. per acre.

Early Amber Sugar Cane. Ripens where Indian corn matures. Per lb. 12 cents; per 100 lbs. \$7.00.

Red Kaffir Corn, or Sorghum. Non-saccharine. The plant is low, stocky, perfectly erect. The whole stalks, as well as the blades, cure into excellent fodder, and in all stages of its growth is available for green feed. Per lb.

White Kaffir Corn. Per lb. 12 cents; per 100 lbs. \$7.00.

White African Sorghum, African Millet, or White Dhoura. Per lb. 12 cents; per 100 lbs. \$7.00.

GRASSES.

A Field of Breck's Special Grass Mixture for permanent mowing and grazing three years after seeding.

Special attention is called to the fact that by advantageous arrangements with the parties who grow the different seeds for us, we are enabled to make a large reduction in the prices of Permanent Pasture and other Grass Mixtures, without impairing the very high standard of purity and germination that we have always maintained.

"And he gave it for his opinion that whoever would make two ears of corn or two blades of grass to grow upon a spot of ground where only one grew before would deserve better of mankind, and do more essential service to his country, than the whole race of politicians put together."—SWIFT.

We desire to call special attention to the following list of AGRICULTURAL GRASSES, which will, we think, be found very comprehensive, both as to varieties and descriptions. We are devoting a great deal of time to this most important subject, and the department has already become an extensive one with us.

Having learned by experience that the so-called imported grasses which are offered by those making a specialty of them in this country are very far from reliable, both as regards purity and quality, we have found it necessary to import all our seeds of this character direct. We have accordingly made arrangements for our stocks with one of the most prominent growers of Agricultural Grasses on the Continent, who, by virtue of many years' experience in growing seeds of this peculiar character, has become the recognized headquarters for same. This will enable us to furnish our customers with the very best, and that which we know to be free from all adulteration.

Grasses — Continued.

It seems almost unaccountable that at this day, when the different branches of practical agriculture are seemingly so thoroughly understood, that our American farmers should apparently ignore the importance of sowing upon their fields only those kinds of grasses which are adapted to the soil and climate, and which will produce in the shortest length of time a luxuriant crop of the desired character. The list of grasses now in use by most of our farmers can be counted on the fingers of one hand, which showing is indeed a small one, when we take into consideration the many species, valuable because of their respective merits, which should be in constant demand for the various soils and climates of America.

We invite special attention to our "Mixtures" for Permanent Pastures and Mowing Lands, which follow our descriptions. We have endeavored to bring into prominence a few important facts under the head of Mixtures, which, we think, cannot fail to be of interest to any one who is concerned in the laying down of profitable pastures, or who desires to obtain large crops of hay of choice quality from his fields.

Awnless, or Smooth Brome Grass (Bromus inermis). An erect growing perennial that attains a height of from three to five feet.

It is especially recommended for dry and arid soils where the more delicate grasses will not grow. (Per bushel 12 lbs.)

Creeping Bent or Firoin (Agrostis Stolonifera). The distinctive feature of this species is, as the name implies, its compact, creeping, rooting stems. It prefers low bottom-lands, especially if they are somewhat sandy. It is of rapid growth and spreading habit, and the stoloniferous roots form a strong enduring turf, that is positively improved by constant trampling. Being of fine texture, it is one of the most valuable of our lawn grasses. (Per bushe!, 15 lbs.)

Meadow Brome Grass (Bromus pratensis). A hardy perennial useful in mixtures for both mowing and pas-. It should not be sown alone except in poor soil or dry hillsides. It withstands extreme cold and drought, and if cut before flowering it makes a good hay. (Per bushel 18 lbs.)

Timothy (Herd's Grass or Catstail) (Phleum Pratense). Root fibrous on moist soils; on dry soils often bulbous; perennial; flowers in June and July. While this grass is commonly known as Timothy, it is frequently called Herds Grass, as this is the name under which it was originally cultivated. It is, without doubt, a most valuable grass for hay, especially in the North. It thrives best on moist, loamy soils of medium tenacity. Grows very readily and yields large crops on favorable soils. Should be cut just when the blossom falls. The hay is of best quality, yielding, under favorable circumstances, three or four tons per acre. (Per bushel, 45 lbs.)

Orchard Grass (Dactylis glomerata.) Root fibrous; perennial; flowers in June and July. This is one of the most valuable and widely known of all the pasture grasses. Its rapidity of growth, the luxuriance of its aftermath, and its power of enduring the cropping of cattle, all commend it highly to farmers. Thrives well on light soils, and as its roots penetrate to a considerable depth, where the subsoil is favorable, it withstands droughts better than most species on dry sandy soils. It is very valuable to be used in a mixture with Timothy and Clover, and produces splendid crops of hay. This grass is sometimes condemned because of its coarse growth, which is only apparent when

in a neglected condition, but with proper management no grass is more valuable. When pastured Orchard Grass should never be allowed to become coarse, but should be kept closely cropped. In this condition it is highly nutritive, and relished very much by all kinds of stock. (Per bushel, 14 lbs.)

> Kentucky Blue Grass (Meadow Grass, June Grass, Spear Grass), (Poa pratensis). Root creeping; perennial; flowers in June. This valuable grass is very common in the soils of America, and is claimed by some to

be the most valuable of all the grasses in our pastures.

Orchard Grass.

On the other hand, some claim that its creeping root impoverishes the soil. a fact, however, that it grows very luxuriantly, producing the most nourishing food for cattle until late in the season in the North, while in the South abundant herbage is furnished throughout the entire winter. It is a very valuable species in lawn mixtures. Kentucky Blue Grass requires about two or three years to become well set, and does not arrive at perfection as a pasture grass until the sward is at least four years old, hence it is not suited for alternate husbandry, or where the land is to remain in grass two or three years, and be then plowed up. (Per bushel, 14 lbs.)

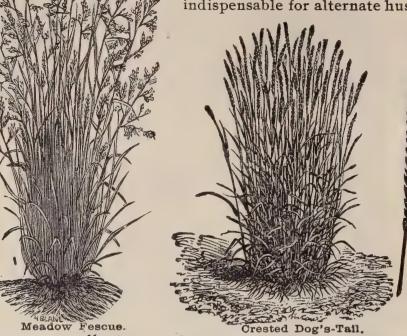

Red Top (Herd's Grass), (Agrostis Vulgaris). Root creeping; perennial; flowers in July. This valuable grass has been commonly cultivated in our fields for over a century. It is a fine permanent grass, and forms a nutritious pasturage when fed close. It is valuable for all wet soils producing a large return in good hay. Red Top is often sown with Timothy and common Red Clover, in which case the Clover soon disappears, followed by Timothy, after which the Red Top usually takes its place, and with some wild indigenous grass forms a close sward. When sown alone three bushels per acre are required, or 15 lbs. of the clean seed. (Per bushel, 10 lbs.)

Fancy or clean seed per bushel, about 40 lbs.

For prices of Agricultural Grasses and Clovers see page 46.

Italian Rye (Lolium Italicum). This is one of the most valuable grasses brought into notice during the present century. In nutritive value, earliness and quickness of growth after it has been mown, it by far surpasses the Perennial Rye Grass. It is, therefore,

indispensable for alternate husbandry; but as it does not last over two years it

s of no use in permanent pastures. The soils best adapted to Italian Rye seem to be those that are moist, fertile, and tenacious, or of a medium consistency, and on such soils it is said to be one of the best grasses known to be cut green, affording repeated luxuriant and nutritive crops. (Per bushel, 18 lbs.)

Fowl Meadow (False Red Top, Duck Grass, Swamp Wire Grass), (Poa serotina). Root slightly creeping; flowers in July and August. This perennial native grass is found on lowlands in many places, though it seldom takes full possession of the soil unless seed is sown. It has been largely introduced into New England, and is particularly adapted to moist, rich soils, such as the borders of rivers, ponds, etc., owing to the fact that an occasional overflow will not injure its growth. It may be mown at any time from June to October, as it never becomes so coarse and hard but the stalk is sweet and tender and eaten without waste.

makes an excellent grass for oxen, cows, and sheep, but is thought too fine for horses. It is easily

made into hay which is of a nutritive character. (Per bushel, 10 lbs.)

Meadow Foxtail (Alopecuris pratensis). Root fibrous; perennial; flowers in May. This is one of the best grasses for permanent pastures, and should always form a fair proportion of the mixtures for that purpose, because of its extremely rapid growth and great nutritive qualities. Thrives best on a rich, strong soil. As the Meadow Foxtail shoots up its flowering stalk much earlier than Timothy, it can be easily distinguished from the latter, which, at first sight, it greatly resembles. It endures the cropping of cattle and sheep probably better than any other variety of grass, making it, as stated above, well-nigh indispensable in all first-class permanent pastures. The nutritive qualities of Meadow Foxtail are most

abundant at time of flowering. (Per bushel, 8 lbs.)

Crested Dog's=Tail (Cynosurus cristatus.). Roots fibrous and tufted; perennial. This is a most valuable permanent pasture grass. It is very tender and nutritious at time of flowering. If, however, it is left until the seed ripens, cattle will not eat it on account of its wiry stems. For parks this grass is well suited, because of its fine, close growth, and pleasant green color. It should form a portion of all mixtures

for lawns. (Per bushel, 28 lbs.)

Meadow Fescue, or English Blue Grass (Festuca pratensis). Root creeping; perennial; flowers in July; one of the most valuable of the Fescue grasses. This grass is well adapted for permanent pastures, and is also sometimes used for alternate husbandry. It grows rapidly in rich and rather moist soils, and makes an excellent pasture grass, its long, tender leaves being much relished by cattle. It should be always sown mixed with other grasses. (Per bushel, 15 lbs.)

Sheep's Fescue (Festuca ovina). Somewhat creeping; perennial; flowers in June and July; especially desirable on light, dry, sandy soils. It is much liked by sheep, and should always enter into the compositions of mixtures for lands on which they are to be pastured. Its compact and fine growth make it suit-

able for lawn mixtures. (Per bushel, 12 lbs.)

Fine-Leaved Fescue (Festuca Tenuifolis). This is really a variety of Festuca Ovina, with much finer leaves. It will grow on very dry and inferior soils, and its dwarf habit of growth and fineness of leaf render it not unsuitable for dry slopes on lawns. It stands grazing well, is very hardy, and lasts long, and may therefore be recommended for

permanent pasture on high and dry situations. (Per bushel, 22

Tall Fescue (Festuca elatior). Root fibrous, somewhat creeping; perennial; flowers in June and July. In appearance this species resembles the Festuca pratensis, but is larger and of stronger growth. It thrives well on moist soils, and yields abundant crops. Cattle and stock eat it greedily. It should form a portion of every mixture for permanent purposes on moist soils. (Per bushel 15 lbs.)

Meadow Foxtail.

Hard Fescue.

For prices of Agricultural Grasses and Clovers see page 46.

Rhode Island Bent (Agrostis canina). Root creeping; perennial; flowers in July. A most valuable permanent grass, largely used in New England for pastures and for lawns. For the latter purpose it is often sown by itself, and if cheapness is an object perhaps it is as good as could be sown, but we recommend the lawn mixture wherever practicable. Soil and treatment same as for Red Top (A. vulgaris). (Per bushel, 10 lbs.)

Fancy or clean seed, per bushel, 40 lbs.

Rough Stalked Meadow Grass (Poa trivialis). Root fibrous; perennial. This grass is valuable on account of its quick growth, productiveness, and nutritive qualities. Grows in perfection on moist, rich soils, and is also well adapted to ground shaded by trees. Grows early in the spring, and continues green until late in the fall. As it delights in shelter, its produce is always much greater when sown with other grasses. Does not thrive well on dry soils. (Per bushel, 14 lbs.)

Perennial Rye (Lolium perenne). A very valuable grass; arrives early at maturity and produces a good supply of herbage, of which cattle are very fond. It grows freely on almost any soil, and shows a very

early spring growth. Although a perennial grass, the root will not live over three or four years, and unless the plant is allowed to reproduce from self-sown seed it will die out in about that time. This is an objection to its extensive use for permanent pastures, but for hay crops it may be introduced to good advantage along with other grasses and clovers.

(Per bushel 24 lbs.)

(Per bushel, 24 lbs.)

Hard Fescue (Festuca duriuscula). This is one of the best grasses of the Fescue family. It is regarded by some as a variety of the Red Fescue, though taller, and the panicle more open. It is found in all the finest permanent pastures of the country, and is much valued for its dwarf habit. It resists the summer drought, and develops remarkable verdure during winter. It should form a part of every mixture for lawn or pleasure grounds, and for permanent pasture and alternate hyphendry. (Per bushel, 14 lbs.)

ture and alternate husbandry. (Per bushel, 14 lbs.)

Red or Creeping Fescue (Festuca rubra). This grass is found growing on light, dry, sandy soils, and from its creeping habit will be found of great value on sandy seacoast lands. It is a grass of better quality than some of the uncultivated species, but is not usually cultivated in this country as an agricultural product, except on elevated speep pastures. (Per bushel, 12 lbs.)

try as an agricultural product, except on elevated sheep pastures. (Per bushel, 13 lbs.)

Sea Mat Grass (Ammophila Arundinacea). Valuable on the sandy seashore, canal and railway banks, etc. Its strong, creeping, matting roots bind the drifting sand into natural embankments against the action of wind and waves. This grass is usually propagated by transplanting in the fall. Where it is necessary to use seed, it should be sown in spring, and ground covered with brush to hold the seed in place until it has taken firm hold. (Per bushel, 15 lbs.)

Upright Sea Lime Grass (Elymus Arenarius). Valuable on the sandy seashore, canal and railroad banks, etc. It tends, with its tough, wide-spreading and thickly matting roots, to form natural and permanent embankments, thus serving to prevent the drifting of the sand, and to protect an exposed shore from wind and waves. It is of no agricultural value. (Per bushel, 12 lbs.)

Sweet Vernal (Anthoxanthum odoratum). Root fibrous; perennial flowers in May. This

Sweet Vernal (Anthoxanthum odoratum). Root fibrous; perennial flowers in May. This grass is valuable on account of its early growth and its hardy and permanent nature, which, added to the fact that it throws up its flower stalks till the end of autumn, upholds its claim to a place in all compositions where permanency is an object. It is very fragrant, and imparts a pleasant odor to the hay. Will grow in almost any kind of soil, but prefers those which are rich and moist. It is greatly relished by sheep, and is found growing naturally on upland pastures. As a component of "lawn mixtures" it is most valuable, and is largely used for this purpose. The

nent of "lawn mixtures" it is most valuable, and is largely used for this purpose. The seeds of this grass are scarce and most difficult to be had TRUE. An inferior variety of Anthoxanthum being sometimes offered at a low price by unscrupulous dealers, care ought to be exercised in buying. Our seed is guaranteed to be the true Perennial Sweet Vernal. (Per bushel, 11 lbs.)

Yellow Oat Grass (Avena flavescens). This grass deserves to form a portion of all mixtures for permanent purposes, and is well suited for lawns, croquet and bowling greens. It thrives best on light, dry soils. The seed we offer is guaranteed to be the true Yellow Oat Grass. (Per bushel, II lbs.)

Tall Meadow Oat Grass (Arrhenatherum avenaceum). A fibrous-rooted perennial; flowers in July; of luxuriant growth, and valuable in permanent pasture mixtures, on account of its early and late growth. It succeeds best on deep, sandy lands, and is suitable for sowing in orchards or other shady places. (Per bushel, 15 lbs)

Wood Meadow Grass (Poa nemoralis). This grass, as its name implies, is found naturally in woods and is well adapted for growing under trees. It is especially desirable, from its fine habit of growth, for sowing on shady lawns and under trees, on pleasure grounds. Root fibrous, flowers in June and July. (Per bushel, 14 lbs.)

on pleasure grounds. Root fibrous, flowers in June and July. (Per bushel, 14 lbs.)

Various Leaved Fescue (Festuca heterophylla). A very early hardy perennial, two to three feet high, thriving best in cool, moist soils. It yields heavily and is a valuable grass in mixtures for permanent meadows, either for mowing or grazing. Its great production of root leaves makes it an excellent bottom grass. It grows well in the shade and is suitable to form part of a mixture for shaded lawns. (Per bushel, — lbs.)

Sheep's Fescue.

White Clover.

Millets.

Hungarian Grass (Panicum Germanicum). This is a species of millet, growing less rank, with smaller stalks, often yielding two or three tons of hay per acre. It is very popular and valuable. Like the common millet, it is an annual, and requires to be sown every season, but will produce a larger return than almost any other crop. (Per bushel, 48 lbs.)

Japanese Millet, Japanese Barnyard Grass (Panicum Crus Galli). Distinct from other varieties, enormous cropper, grows six to eight feet high, excellent either green or cured as hay. It prefers a moderately moist soil and may be sown in an average season from the middle of May until the first of July. Broadcast, at the rate of 25 lbs. per

acre, or in drills 18 inches apart, 15 lbs. to the acre. (Per bushel, about 35 lbs.)

Common Millet (Panicum Miliaceum). Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for forage. For hay, sow broadcast one bushel per acre from May first to August first. For grain, sow in drills, half-bushel to the acre, not later than June 20th. (Per bushel, 50 lbs.)

German or Golden Millet (Panicum Miliaceum var). An improved variety, medium early, growing three to

five fee' high. The heads are closely condensed, though the spikes are very numerous. (Per bushel 50 lbs.)

During the past few years, the fact has been established beyond doubt that seed of the German or Golden Millet grown in Southern latitudes will produce a much larger yield of hay than from seed grown in Northern or Western sections of the country, and for that reason is far better for farmers to sow.

Siberian or Russian Millet. A recent introduction and especially recommended for growing in New England. It

is quite as leafy and a heavier cropper than Hungarian. (Per bushel, 50 lbs.)

Clovers.

There are no plants so valuable for fertilizers as the Clovers. They have the faculty of absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots pene trate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil.

Medium Red (Trifolium pratense). This is the common Red Clover in general cultivation, and too well known to need a general description. It is by far the most important of all varieties for the practical purposes of agriculture. When sown alone produces hay of splendid quality, and with Timothy or other grasses forms a desirable pasture. (Per bushel, 60 lbs.

Mammoth or Pea Vine (Trifolium pratense var). Grows five or six feet high; its stalks are so coarse and large that stock will eat only the

where the common clover will Alsike or Swedish (Trifomost hardy of clovers, and is sists cold and extreme drought yields an enormous amount of quality. nearly every natural pasture. It is adapted to all soils. Being a deep-rooted plant, it withstands drought on dry, sandy sections. It should form a part of all mixtures for permanent pastures, and is also valuable for alternate husbandry, when these crops are sown down for more than one year. (Per bushel, 60 lbs.)

Crimson Clover (Trifolium incarnatum). It is also known as Scarlet Clover and Carnation Clover. It is of rapid growth, and of great value where only one crop is desired, sown either alone or with Italian rye grass. It is an immense yielder, and can be fed green or made into hay. It may be sown in the fall for an early summer crop, or in the spring for cutting in July. (Per bushel, 60 lbs.)

Vellow Trefoil (Medicago lupulina). An annual or biennial suitable for pasture in wet meadows, or for stiff, clayey soils which are too poor for Red Clover. (Per bushel, 60 lbs.)

I have had very good results from seed you sent me in early spring. Yours truly

JAMES M. BUTTIMORE, Winchendon, Mass.

Mixtures for Permanent Pastures.

"One thing is certain: that good pasture land is the foundation of the riches of a farm."—SINCLAIR.

The oft-repeated complaints of wornout and exhausted pastures, made to us by some of our best New England farmers, have long impressed us with the fact that there must be something radically wrong with the manner in which our pastures are formed and cared for. Some remedy for this state of matters is imperatively necessary, and it seems to us that one most important line of improvement would be the sowing

of a larger number of species of grasses in the laying out of these pastures.

As we have already expressed as our opinion, farmers, as a rule, in preparing their mixtures of grasses to be used in the laying down of permanent pastures, confine themselves to too few varieties, thus failing to arrive at the most profitable results. The chief properties which give value to a grass are nutritive powers, produce, early growth, and reproductiveness (that is, the property of growing rapidly after being cropped). If one species of grass could be discovered that possesssed all these qualities in a superior degree to every other, there would be no necessity beyond that of botanical science for us to acquire the knowledge which enables us to distinguish the different species of grasses, the soils and subsoils best adapted to their growth, natural habits, and comparative value; but the results of all experiments have proven that a combination of all the merits and properties which give value to a grass is not to be found in any single species, or in fact in any two or three. In sowing a mixture or a number of different varieties we are but following nature, who can be always depended upon as the best teacher. This can be easily demonstrated by the careful examination of any old, rich, permanent pasture, on which will invariably be found fifteen or twenty species of grass or forage plants growing in great profusion. Where, however, it is left to nature to supply the necessary plants to make a rich and succulent pasturage, a great deal of valuable time is, of necessity, lost, or seven or eight years will elapse before the field will naturally assume the character of a rich and profitable pasture, while by artificial means the same result can be brought about in onefourth the time.

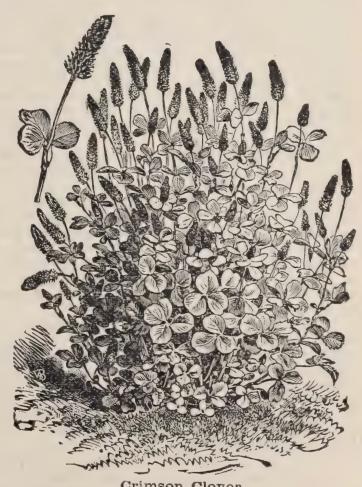

In compiling any table of grasses and clovers to be used for permanent pasture purposes there are several important features to be taken into consideration. First, the proportion of plants which would be produced from the amount of each kind of seed sown should be determined, so that the undue predominance of any particular variety may be avoided. We have given this point special consideration in preparing our mixtures. A selection of grasses should be made that blossom at alternate months of the year, as it is a well-known fact that there is no month from April to September inclusive, in which some of the val-

nable grasses do not attain their full perfection.

By using a mixture comprising these species, it will be at once apparent that a rich and luxuriant growth will be secured throughout the entire season, which result cannot possibly be obtained if the stereotyped mixture usually recommended composes the sward. It would be almost impossible for us to give a series of tables which would comprehend all the variations of soils, altitudes and climates. We think, however, that those we have compiled will be found sufficiently comprehensive to meet all the contingencies that arise in ordinary farming.

These mixtures, which we recommend only after careful study and consultation with the best authorities, are of little or no value unless the seeds composing them are absolutely pure and true to name. We, therefore, especially request those who desire to obtain the best results from their mixtures for alternate husbandry, mowing lands, and permanent pastures, to avoid the probability of disappointment which would naturally attend the placing of orders with parties who have never given any degree of attention to this most important subject, and buy from us direct (or authorized agents), who are the first in this country to make a specialty of this breach of the read husbands and permanents. branch of the seed business. We doubt if a full stock of all the grasses which form the components of our mixture could be found anywhere in the United States outside of our own establishment, and know they cannot be obtained in the same quantities and of equal quality.

In conclusion, we would say, that although pastures be formed in the best manner as recommended by us, with a combination of MANY different species of grasses, yet a judicious mode of treatment afterwards is as necessary to continue

their value By proper stocking and top-dressing, very indifferent pastures may be brought to a state of great fertility; but, on the contrary, the richest pastures by neglect of proper stocking, top-dressing, or by the too frequent repetition of hay crops, will become so unprofitable as to require many years to bring them again to their original value. This fact every practical farmer is well aware of, and after the proper mode of sowing and stocking has been determined on, a suitable top-dressing should be found. Under the head of Fertilizers, in another part of this Catalogue, will be found a reliable top-dressing, which we can strongly recommend as being specially adapted for pastures of this character.

BRECK'S SPECIAL MIXTURES FOR PERMANENT PASTURES.

ALTERNATE HUSBANDRY. Mixtures for Mowing and Grazing Lands.

As the pioneers of grass mixtures in this country, we naturally have great pleasure in learning from day to day and season to season that our remarks under the heading "Mixtures for Permanent Pastures" are fast becoming universally admitted facts; and we predict with confidence that the time is not far distant when the practice of sowing only one or two varieties of grass seeds with the hope of obtaining the best results from it will pass, and the better and

more profitable one of following nature's plan be adopted.

Many of our statements regarding Permanent Pasture Mixtures are equally pertinent when applied to Alternate Husbandry. It does not require much thought to convince any practical agriculturist that there is no basis to a system that employs the same quantity and kinds of grass seeds on all occasions, without regard to soil, duration of lay, or the condition in which the crop is to be used. All mixtures for Alternate Husbandry should include, say for one or two years' lay, only annual and biennial or other sorts that attain full maturity within that period; for two or three years' lay a greater quantity of seed is required, which should embrace a larger proportion of permanent sorts, so that the places of the dead annual kinds may be filled by the varieties that

are of slower growth.

If a mixture principally for mowing is intended to lay more than three or four years, especial care is necessary in selecting and adjusting the several varieties of grasses in proper proportion. A three or four years' lay sown with grasses that are only of annual or biennial duration must be either very thin or foul at the end of the period for which it was laid down—the spaces vacated by the annual and biennial grasses being in all likelihood occupied by objectionable weeds, when, if a proper selection of those species capable of lasting the whole of the desired period were sown, the lay would remain full of plants, free from weeds, and, consequently, much more profitable during the whole time the land is in grass.

The practice of mowing grass for hay when the plants are in blossom is acknowledged to be a good one, in that it is not so exhausting to the soil, and a more succulent hay, freer from dust, is obtained; it has, however, from the fact that all natural reseeding is prevented, a tendency to weaken the plants and reduce their number; hence, when we see an old field of grass that was originally sown with Timothy, Redtop and Clover, and which has been mowed, perhaps, twice annually, we can readily account for either the enormous number of weeds or vacant places that are sure to be noticeable. Our system of mixture practically overcomes this difficulty by the continued growth and stooling out of some of the varieties included that do not attain full maturity under four to six years. Such mixtures, although in the first place more expensive than the ordinary orthodox seeding, are in the end more profitable; we have seen aftermaths from permanent mowing mixtures that more than equaled first crops of Timothy.

In making up the following tables the utmost care has been exercised, and we have no hesitation in recommending them to our patrons.

Lucerne Clover.

Special prices for quantities for ten acres and upwards.

While it is true that the mixtures which we have recommended are SEEMINGLY much more expensive than what is commonly used, it should be borne in mind that a vastly increased value is given to the pasture not only for one year, but if the land is properly cared for it will remain in good condition for fifteen or twenty years without further sowing, and produce double the amount of fodder, while the ORDINARY sowing has to be repeated every three or four years; thus, in the end, costing more than four times as much as what would be paid originally for the proper mixture.

PERMANENT GRASS SEED FOR GOLF LINKS.

In order that we might be the better able to serve our friends in making selection of grasses that will give best results on Golf Courses and Putting Greens under the many varied conditions of soil, etc., that exist, our representative visited Prestwick, Bogside, St. Andrews and other principal Golf Links in Scotland, and carefully ascertained particulars as to the kinds of grasses used for the different situations and purposes. The soil and effect of climate on these grasses, as compared with those prevailing in New England, have had due consideration, and we now offer, under the name of the **Prestwick Golf Grasses**, a series of mixtures, modified as experience warrants for our needs, that we are sure surpass any hitherto offered in the United States.

- No. 1. For Putting Greens, sow at the rate of 80 lbs. per acre. Per lb. 18 cts.
- No. 2. For Courses, light and dry soils, sow at the rate of 50 lbs. per acre. Per lb. 17 cts.
- No. 3. For Courses, low and damp soils, sow at the rate of 50 lbs. per acre. Per lb. 13 cts.

GRASS. BRECK'S STANDARD LAWN

We reproduce here a partial view of the beautiful estate of Mr. Francis Blake, Auburndale, Mass. The fine lawn shown here is the product of Breck's Standard Lawn Seed.

We have given much thought and made many experiments in order to ascertain just what is the best mixture for permanent lawns, and the grasses which are best suited to this climate. By the proper blending of the varieties which constitute Breck's Lawn Grass, we have obtained a mixture that from early spring to late fall will give to lawns made with it that rich, deep green so often admired upon the lawns and parks of England, but so seldom seen

One quart will sow 300 square feet. Price, per qt., \$0.25. "1/2 pk., .75. " bushel will Four bushels will sow one acre. " half pk. will sow 1,200 "

One peck will sow 2,400 square feet. Price, per pk., \$1.25. "bushel will sow 10,000" bush., 4.00. " bushel will sow 10,000

Boston Park Lawn Grass.

The same mixture of grasses and clover as supplied by us to the City of Boston Park Commissioners for sowing on the Franklin and other parks administered by them. Per lb. 30 cents—will sow 680 sq. feet. 16 lbs. \$4.00—will sow one-quarter acre. 64 lbs. \$15.00—will sow one acre. When desired we make special mixtures of grasses to suit different soils and conditions.

Breck's "Shady Spot" Lawn Grass.

This is a mixture of grasses that are naturally adapted for growing under trees and in places where the sun does not find ready entrance. If sown on such locations, in place of the ordinary Lawn Seed, bare and unsightly spots will be prevented. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

Breck's Bank and Terrace Grass Mixture.

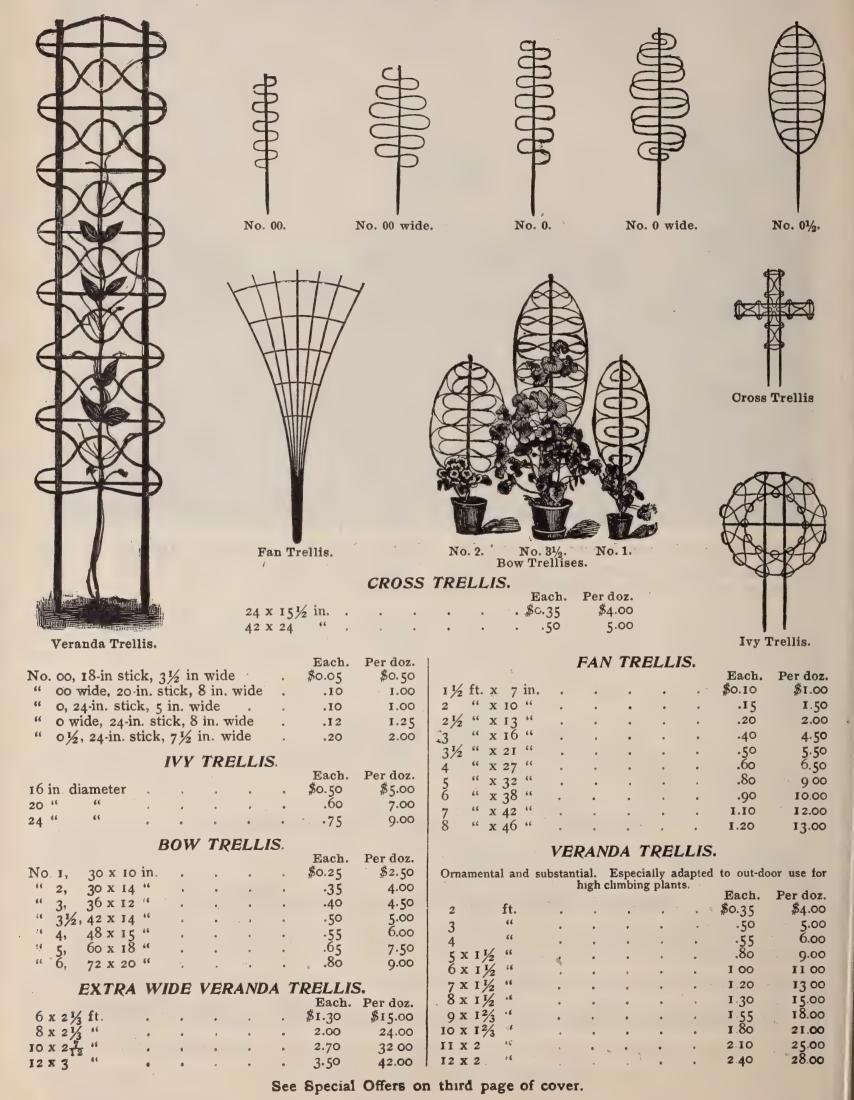

A mixture of deep-rooting grasses specially prepared for embankments and situations where it is impractical to get a successful catch of the less spreading rooted sorts. It produces a rich velvety turf throughout the season. No coarse-growing undesirable varieties are used in this mixture. Per qt. 25 cts.; pk. \$1.25; bush. \$4.00.

To Stimulate Worn-out Lawns use Breck's Lawn Dressing

Trellises.

Made of wood and rattan, painted green. The most durable and ornamental trellis on the market.

Special Sizes and Styles Made to Order.

Plant Sticks.

Green Painted. For pot and garden use. The three extra heavy sizes have black painted points to prevent moisture entering the fibre of the wood.

Gentlemen:—The Oak Jardiniere ordered from you arrived in good condition. I am highly pleased with it, and consider it a handsome addition to my home.

Sincerely yours, MRS. WM. SIMPSON,
Jamaica Plain, Mass.

Fibre Saucer Trucks for Large Pots and Tubs.

These are made of Indurated Waterproof Fibre Ware, mounted on castors. They are a great convenience for using with the larger size pots and tubs. Being perfectly waterproof, they are especially suitable for use in parlors, halls, etc. The four smaller sizes have a detachable and strongly made metal base, so that a new saucer can be substituted when one is worn out or broken. The two larger sizes have the castors attached to the bottom.

STERLINGWORTH

WEED & KILLER

STERLING CHENICAL CO.

MISCELLANEOUS REOUISITES.

Baskets, Pansy or Verbena, Marston's Pattern. Wood or wire handles, standard size, 10 in. long, 5 in. wide, 3 in. deep, per 100, \$2.00; per 1,000, \$18.00. Large size, 12 in. long, 7 in wide, 3 in. deep, per 100, \$3.00; per 1,000, \$25.00.

1885

Brushes, Flat Paint. For applying tree ink and general use. Thoroughly well made and of good material. $3\frac{1}{2}$ in. wide, 25 cts. each. Caps, Hay, Breck's Improve 1, brown, medicated, complete with ropes and pins, 50 cts. each; \$48.00 per 100.

This color is famous the world over and is used wherever it is desired to impart the "golden tinge of June" to butter at all seasons

of the year. Bottle sufficient to color 500 lbs. of butter, 25 cts.; for 1,200 lbs., 50 cts.; for 2,500 lbs., \$1.00. Cotton Batting. For packing flowers, etc., per sheet, 6 cts.

STERLINGWORTH WEED KILLER.

Sterlingworth Weed Killer is a most satisfactory and powerful Weed Killer, compounded especially for use on walks, drives, tennis courts, golf links, etc., etc. It is a dry powder to be dissolved in water. When applied to vegetation it completely destroys all kinds of weeds, grass (including milk weed and witch grass), briars, burdock, dandelions, daisies, thistles, poison ivy and other objectionable vegetable growths. One application kills roots as well as foliage, preventing further growth. It may be applied with an ordinary watering can. One gallon covers three to four square yards. Full directions on each package.

PRICES: 1 lb. pkg., makes 15 gals., covers 45 to 60 sq. yds., 50 cts.; 3 lb. pkg., makes 45 gals., covers 130 to 180 sq. yds., \$1.25; 5 lb. pkg., makes 100 gals., covers 300 to 400 sq. yds., \$2.00.

Glazing Points, The Peerless. The only durable and reliable points.

Made of galvanized steel wire; no rights and lefts. No raising up when driving. Three sizes, Nos. 2, 21/2 and 3. The Nos. 2 and 21/2 are for general use; the No. 3 for extra heavy work. Price, per box of 1,000, 60 cts. Pincers for driving same, 40 cts.

Krop Kollar, Faye's Patent. This is one of the simplest, yet most use-

ful articles that has been offered the farmers and gardeners for the pro-

tection of early crops from cut worms, cold winds and frosts. It consists of a flexible fibre-board collar that can be

quickly adjusted around plants, a glass roof easily fastened on, and a shutter for use in extra cold weather. We believe it will prove of great value for protecting corn, melons and other early or tender plants. Net prices, dozen 70 cts.; 100, \$5.00.

Mats, Straw. Hotbeds, 6 x 6, \$1.75 each; 3 x 6, \$1.25. Other sizes to order.

Palmer Hotbed Mat No. 2. Size 76 x 76 in., wool filled and quilted, frost proof, duck and burlap outside, \$1.50 each.

Paper, Tarred. For use with tree ink, in rolls about 50 lbs., per lb., 4 cts.

Pencils. Wolff's Indelible Garden. For writing on wood labels, with point protector, each,

20 cts.; doz., \$2.00.

Protectors, Arlington Plant. Protects from bugs, borers and fowls, also subdues wind,

rain and cold, 15 cts. each; dozen, \$1.50.

The Ross Patent. This protector consists of a heavy water-proofed hood, a U-shaped coppered wire anchor so attached to the hood as to secure it in position over the plant, and at the same time allow of its being raised and tilted to protect from the wind or admit sunshine. Occupy but small space and nest for storing. The hood is 5 in. high. Price, dozen, 25 cts.; 100, \$1.60; 1,000, \$15.00.

Protecting Cloth for Hotbeds. Used as a substitute for glass for protecting plants in early

Spring; in pieces of 40 yds., 10 cts. per yd. Putty Bulbs. A simple and useful device for applying putty to sashes; \$1.00 each.

FULL SIZE

Nº 2

Arlington Plant

MASTICA.

We originally introduced Mastica to the horticulturists of New England. It is superior to any and all other preparations for the purpose, and when results and labor in setting or resetting glass are considered it is decidedly the cheapest article to use.

We are the Manufacturers' Distributing Agents for Boston.

For glazing greenhouses, new or old. The use of Mastica avoids the necessity of frequent re-glazing. It can be used to bed in or on the outside, with a machine; one gallon will cover about 290 running feet (one side). Gallon cans, \$1.25; half gallons, 65 cts. 6% discount allowed on orders for 6 gallons; 10% discount allowed on orders for 10 gallons. Net F. O. B. Boston. Machines for applying Mastica, \$1.25 each. Net.

Roffea.

This grass, long used by gardeners for tying plants and bunching vegetables, has been adapted to new uses. While it is likely to hold its place as the best tying material yet produced, there will be a great demand for it for a few years for making baskets, mats, etc. In order to meet this demand we have made arrangements to supply a selected quality of the natural colored grass, also dyed in shades of green, blue, black, pink, yellow, red and other

Price, Natural, 25 cts. per lb. Any of the above colors 50 cts. per lb. Not less than 1/4 lb. colored Roffea sold at pound price.

"Basket Making." The first book of the "How to Do It Series." Tells all about basket making. It contains over one hundred illustrations of working designs with full particulars of methods. By mail, 25 cents.

> Silkaline. Used for growing smilax and asparagus on, also for tying in bouquet work, per reel 25 cents; per lb. \$1.25.

> Sprinklers, Scollay's Rubber. An indispensable article for showering plants, sprinkling bouquets, dampening clothes, etc.; three sizes, 50 cts., 75 cts. and \$1.00 each. Sashes for Hot-Beds. Extra well made from thoroughly seasoned lumber, frame 11/2

in., 3 x 6 ft., \$3.00; 13/4 in., 3 x 6 ft., \$3.25 each.

Twenty-three years coming to your store. All I have tried have done well, and I will still get what I need here until I find better — but where can I but at your store? 17 North St., Bridgewater, Mass. JAMES MURRAY.

Hot-Bed, Sash and Frame, Complete. For Violets, Flower Seeds and Early Vegetables.

as most desirable in all particulars.

Having received numerous inquiries for a Hot-Bed Sash that was light, and easy to handle, we decided that it would be a good idea to construct a Sash and Frame Complete that would meet the requirements.

After carefully studying several designs we adopted the one shown in cut,

The outside dimensions of Frame are three feet one inch long, and four feet eight inches wide, made of one inch Cypress; the back piece is nine inches wide and the front piece is six inches wide, grooved together, and held in place by eight strong hooks.

Being fastened together by the hooks enables one to take it apart at the end of the season and store away in a very compact form, which we consider an essential feature, as by so doing the frame may be made to last for years.

The Sash is also made of Cypress of one and one-half inch stock, put together and glazed in the very best man-On the under side of Sash is fastened a cleat, one inch from the outer edge, all around, thus forming a rabbet which makes the frame very tight, preventing the cold air from entering or the heat escaping.

The construction of the frame is so simple that any one with a hammer and screwdriver can put it together in a few minutes. We furnish hinges and screws for attaching the sash to back of frame; also the hook and eyes for

In offering this Special Hot-Bed to our customers we feel that we have something that will give entire satisfacand will supply a long felt want.

Our price for Frame and Sash complete is only \$6.00 delivered at the railroad in Boston.

Sieves, Wire. For preparing potting soil, sifting loam, gravel, etc.; 16, 18, 20, 24 inches diameter; 75 cts., 90 cts., \$1.15, \$1.50 each, respectively.

Soil, Peat, Leaf Mould, Etc.

Prepared Potting Soil. Specially prepared with peat, leaf mould, loam, sand and fertilizer. Pk., \$0.30; bush., \$1.00; bbl., \$2.00, net.

Peat, Rotted Fibrous. Fine, light and sweet. For some varieties of plants this is invaluable. Pk., \$0.30; bush.

\$1.00; bbl., \$2.00, **net.**f Mould. Vegetable humus, a desirable addition to all soil used for potting. Pk., \$0.30; bush., \$1.00; bbl. Leaf Mould.

Silver Sand. For rooting cuttings and mixing with potting soil. Pk., \$0.50; bush., \$1.50, net. Fern Root or Orchid Peat. Bush., \$1.50; bbl., \$3.00, net.

Sphagnum Moss. Per bag of 2 bush., \$1.00.

Tape, Electric. Exceedingly useful for mending rubber hose. It is a strong, adhesive ribbon, three-quarters of a inch wide, can be wound tightly around a leaking part and thus stop it. Per coil, 25 and 50 cts.

Tinfoil. For bouquets. Per lb., 15 cts.

Twine. Soft, for tying cut flowers, vines, etc. Per ball, 25 cts.

Twine, Parcelling. All sizes. Per ball, 10 to 25 cts.

Wax Grafting. (Trowbridge's.) The best in the market. This brand should not be confounded with the many cheap makes now offered, that are not possessed of an even consistency, and give unsatisfactory results. Put up in 1 lb., ½ lb., and ¼ lb. packages, price 40 cts., 25 cts., and 15 cts., respectively.

Wire, Bouquet. Bright, cut in lengths of nine and 12 inches, in boxes of 12 lbs. (one stone) each.

Per box, either length, Nos. 20, 21 and 22 \$1.75 Per box, either length, No. 26 \$1.25 " 23 and 24 " 25 . 1,25 2.50 1.50

SPRAYING CALENDAR.

This calendar, in a concise way, gives our friends the benefit of the many experiments made by the Agricultural Colleges of the country for a number of years. It is believed they can be followed without danger to the crops and much profit to the grower.

The number of applications given in each case has particular reference to localities in which fungous and insect enemies are most abundant. If the crops are not affected at the time advised, the spraying is unnecessary. Know the enemy and the remedy, and apply them at the proper season, keeping in mind the fact that good judgment and prompt and persistent action is more necessary to success than any definite rules.

The applications to which an asterisk * is prefixed are of most importance.

100	The	applications to which	an asterisk * is prefix	ed are of most import	ance.
Charles Total	PLANT.	First Application.	Second Application.	Third Application.	Fourth Application.
THE REAL PROPERTY.	Apple. Scab, codlin moth, bud moth.	When buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. For bud moth, Arsenites when leaf buds open.	*When blossoms have fallen, Bordeaux and Arsenites.	
	Cabbage. Worms, aphis.	*When worms or aphis are first seen, Kerosene emulsion.	7-10 days later, if not heading, renew emulsion.	*7-10 days later, if heading, hot water 130° F.	Repeat third in 10-14 days if necessary.
	Carnation. Rust and other fungous diseases, red spider.	*When rust is first noticed, Bordeaux. Kerosene emulsion when red spider is first seen.	*For rust repeat first in 10-14'days. For red spider repeat in 3-4 days.	Repeat second, using the Ammoniacal carbonate of copper if plants are in bloom.	Repeat second as before if necessary.
	Cherry. Rot, aphis, slug.	As buds are breaking, Bordeaux; when aphis appears, Kerosene emul- sion.	When fruit has set, Bordeaux. If slugs ap- pear, dust leaves with air- slaked lime. Hellebore.	10-14 days, if rot appears, Bordeaux.	10-14 days later, Ammoniacal copper carbonate.
-	Currant. Mildew, worms.	*At first sign of worms, Arsenites.	*10 days later, Hellebore. If leaves mildew, Bor- deaux.	If worms persist, Hellebore.	
The second second	Gooseberry. Mildew, worms.	*When leaves expand, Bordeaux. For worms, as above.	*10-14 days later, Bordeaux. For worms, as at ove.	*10-14 days later, Ammoniacal copper carbonate. For worms, as above.	*10-14 days later repeat third.
1 00	Grape. Fungous diseases, flea beetle.	In spring when buds swell, copper sulphate solution. *Paris green for flea beetle.	*When leaves are 1-1½ inches in diameter, Bordeaux. Paris Green for larvæ of flea beetle.	*When flowers have fallen, Bordeaux. Paris Green as before.	*10-14 days later, Bordeaux.
1	Nursery Stock. Fungous diseases.	*When first leaves appear, Bordeaux.	*10-14 days, repeat first.	10-14 days, repeat first.	10-14 days, repeat first.
.	Peach Nectarine Apricot. Rot, Mildew.	*Before buds swell, cop- per sulphate solution.	Before flowers open, Bordeaux.	*When fruit has set, Bordeaux.	*When fruit is nearly grown, ammoniacal copper carbonate.
1	Pear. Leaf blight, scab, psylla, codlin moth.	As buds are swelling, copper sulphate solution.	*Just before blossoms open, Bordeaux. Kerosene emulsion when leaves open for psylla.	*When blossoms have fallen, Bordeaux and Arsenites. Kerosene emulsion if necessary.	*8-12 days later, repeat third.
	Plum. Fungous diseases, curculio.	*During first warm days of early spring, Bordeaux for black knot. When leaves are off in the fall, Kerosene emulsion for plum scale.	*When buds are swelling, Bordeaux for black knot and other fungous diseases. During midwinter, kerosene emulsion for plum scale.		*10-14 days later, Bordeaux. Jar trees for curculio every 2-4 days. For San Jose scale, Kerosene emulsion when young appear spring and summer.
A STATE OF THE PARTY OF THE PAR	Potato. Scab, blight, beetles.	*Soak seed for scab in corrosive sublimate solution, 2 oz. to 16 gals. of water, for 90 minutes.	*When beetles first appear, Arsenites.	*When vines are two- thirds grown, Bordeaux. Arsenites for beetles if necessary.	10-15 days later, repeat third.
	Raspherry. Blackberry. Dewberry. Anthracnose, rust.	Before buds break, copper sulphate solution. Cut out badly diseased canes.	During summer, if rust appears on leaves, Bordeaux.	Repeat second if necessary.	*Orange or red rust is treated best by destroying entirely the affected plants.
	Rose. Mildew, black spot, red spider, aphis.	For mildew. *Keep heating pipes painted with equal parts lime and sulphur mixed with water to form a thin paste.	For black spot. *Spray plants once a week with Ammoniacal copper carbonate, using fine spray.	For red spider. *Spray plants twice a week with kerosene emulsion. Apply to under side of foliage.	For a phis. *S pray affected parts with Kerosene emulsion when necessary.
7	Strawberry. Rust	*As first fruits are set- ting, Bordeaux.	As first fruits are ripen- ing, Ammoniacal copper carbonate.	*When last fruits are harvested, Bordeaux.	Repeat third if foliage rusts.
	Temate. Rot blight.	At first appearance of blight or rot, under glass or out of doors, Bordeaux.	Repeat first if diseases are not checked.	Repeat first when necessary.	1

For Aphides or Plant Lice use Kerosene Emulsion on all Plants.

See Special Offers on third page of cover.

Breck's Victor Fly Driver.

The Rural New Yorker says: "Fly time is with us again and no small expenditure will bring back so large a profit as a few dollars invested in some of the good fly preparations to make the cows comfortable and happy. The result will show in the milk pail." This of course applies directly to Victor Fly Driver.

Safe to use, thoroughly effective and cheaper than any other first class preparation for the purpose on the market. Put up in

I gal. cans only.

Gentlemen: — Please send me by American Express two cans of Victor Fly Driver. I have tried three kinds, but there is none as good as yours.

Yours truly,

J. S. MUNROE, Lexington, Mass.

Insecticides and Fungicides.

In general terms: ARSENATE OF LEAD and PARIS GREEN are specifics for leaf eating insects.

KEROSENE EMULSION, TOBACCO, WHALE OIL SOAP for sucking insects.

BORDEAUX MIXTURE and AMMONIACAL COPPER (Copperdine) for fungus.

Arsenate of Lead, Swift's. The safest and best insecticide for leaf eat ing insects. If applied according to directions it will not injure the foliage; one pound to 10 gallons of water has been used on young, tender leaves without scorching or burning them. It adheres to the foliage for weeks. It is white in color; sprayed foliage may thus be distinguished from unsprayed at a glance. It can be used with Bordeaux Mixture See directions on each package. 1-lb. tins, per lb. 20 cts.; 5-lb. pails

per lb. 19 cts.; 10-lb. pails, per lb. 18 cts.; 20-lb. pails, per lb. 18 cts.; 50-lb. kegs, per lb. 17 cts.; 100-lb. kegs per lb. 16 cts.

Aphis Punk, Nikoteen. A special preparation of nicotine for the extermination of green and black fly, thrip, etc. contains no ammonia and does not injure delicate plants. Per box of one dozen rolls (720 grains nicotine) 60 cts. Breck's Liquid Anti-Ants. A preparation that destroys or drives away ants from lawns, trees, etc. ½ pt. 30 cts. pt. 50 cts.

Breck's Dalmation Insect Powder. ("Bubach.") Manufactured especially for us from clean, dried flowers. It is put up in air-tight packages and keeps its strength indefinitely. It is invaluable to the housekeeper for the destruction of flies, fleas, roaches, and other noxious insects. Four sizes, 10, 15, 25, and 40 cts. In bulk, lb. 30 cts

Bordeaux Mixture. Ready for use by simply adding water. Bordeaux Mixture is, we believe, the bes fungicide known, and is really a specific for the blight and other diseases attacking potatoes, tomatoes grapes, apples, pears, etc. 1-lb. box, makes 5 gallons spray, 30 cts.; 5-lb box, makes 25 gallons spray, \$1.25

Bordeaux Mixture. French. In pulp form. One gallon makes 50 gallons spray, per gal. \$1.00; per 5 gals \$4.50; per 10 gals. \$8.00.

Bordeaux Mixture. Lenox Brand. This preparation we consider the best of all the ready-made Bordeau Mixtures on the market. It is chemically pure. It does not clog the nozzle. It adheres to the leaves and is no easily washed off. One gallon makes 50 gallons solution. Per qt. 35 cts.; I gal. \$1.00; I2 gals. \$10.00 net.

Boxal Paste. A combined insecticide and fungicide for use on potatoes. Kills slugs and beetles, and prevent blight and rot. Takes the place of Paris Green and Bordeaux Mixture. Sticks on the vines a very long time 5 lbs. \$1.00; 10 lbs. \$1.75; 25 lbs. \$4.00; 100 lbs. \$15.00.

Boxal Powder. A combined dust insecticide and fungicide for use on potatoes. Kills slugs and beetles, and prevent blight and rot. Takes the place of Paris Green and Bordeaux Mixture, and is superior to both. Sticks to the wines throughout the season. Applied dry or as a spray: Lib place of the place of

vines throughout the season. Applied dry or as a spray; 1-lb. pkg. 30 cts.; 5-lb. pkg. \$1.25.

Bug Death. (The prices quoted on this article are net, and not subject to either of our special offers.) A patente non-poisonous powder, entirely different from anything yet offered for the purpose, and as effectual as Paris Gree It is sure death to the potato, squash and cucumber bugs, currant and tomato worms, also other plant and vin eating pests. If used according to directions injury cannot result to the most tender plants, and it has a tendent to assist growth. For potatoes a 12½-lb. package is sufficient for an acre. Bug Death may be applied with shaker or mixed with water and sprayed. 1-lb. box, 15 cts.; 3-lb. box, 35 cts.; 5-lb. box, 50 cts.; 12½-lb. bo \$1.00; 100-lb. keg, \$7.50.

Creosote Mixture. This mixture is sure death to the eggs of the Gypsy moth, Tussock moth and similar insects.

Made on the formula used for years, and recommended by the Massachusetts Gypsy Moth Committee. 1 qt. 20 cts.; 1 gal. 50 cts.

Dip, McDougall's Sheep. An effective, non-poisonous preparation for killing vermin on sheep, cattle and domestic animals. Per lb. 50 cts.; qt. 75 cts.; ½ gal. \$1.50; 1 gal. \$2.50.

Dip, Coope.'s Sheep. A world-famous preparation, in powder form. It is easily carried, quickly prepared and most effective. Large pkg. sufficient to make 100 gals., \$2.00; small pkg. to make 25 gals., 50 cts.

Disparene. A powerful remedy for all leaf-eating insects; will not injure foliage and adheres a long time. 2 lbs. 60 cts.; 5 lbs. \$1.25; 10 lbs. \$2.25; 25 lbs. \$4.75; 100-lb keg, \$18.00.

Eciffo. A sure cure and prevention of water-bugs, cockroaches, etc. Per tin, 50 cts.

Fir Tree Oil. Soluble. An invaluable preparation for destroying all insects and parasites that infest fruit trees, plants and animals, whether on the foliage or at the roots of the plants Per gal. \$4.00; per qt. \$1.25; pt. 75 cts.; ½ pt. 50 cts.

Fungiroid and Paris Green Compound. An insecticide and fungicide combined. Kills potato bugs and prevents blight, easily applied and desirable for fruit trees, etc. 1-lb. box 30 cts.; 3 lbs. 75 cts.

Grape Dust. Destroys mildew on grape vines. Can also be used in the garden for mould, mildew or rust mites. 5-lb. pkg. 35 cts.

Hellebore. Breck's Pure Powdered. We furnish a guaranteed pure article, ground from fresh roots. It is easily applied either in liquid or powder form and destroys currant worms, rose slugs, etc. Each package has special directions for its effective use. Packed in 3 sizes, air-tight packages, 10, 15, 25 cts. each. In bulk, 20 cts. lb.

Kerosene Emulsion. Concentrated. (A Liquid.) Used against all soft-bodied sucking insects such as Plant Lice, Leaf Aphis, Woolly Aphis, Tarnished Plant Bug, Thrip, Celery Aphis, Harlequin Bug, Squash Bug, Leaf Hopper, Mealy Bug, etc. Also for Scale insects—San Jose Scale, Plum Lecanium. Dilute 10 to 12 times for plant lice and soft-bodied bugs. Use strong solution for scale insects. Pt. can 20 cts.; qt. can 35 cts.; gal. can 75 cts.

Kno-Worms, Breck's. A famous preparation that is much used on the lawns and the putting greens of Scotch golf courses. It not only destroys the worms, but prevents their increase and reappearance. It is a concentrated liquid and is ready to apply when diluted with 100 parts of water. It is effective against cut worms in the garden and anthills on the lawn or elsewhere. I qt. makes 25 gallons solution, 50 cts.; ½ gal. makes 50 gallons solution, \$6.50.

London Purple. For spraying fruit trees, potatoes, etc. 1 lb. 20 cts.

Lemon Oil. An oil that is readily soluble in water. It destroys insects and parasites of all kinds without injury to plants. Much used for palms and other ornamental foliage plants. Pt. 50 cts.; qt. 80 cts.; gal. \$2.25.

Nicoticide Fumigating Compound. This liquid preparation is used for destroying green and black fly, thrip, mealy bug, red spider, etc. The vapor does not alter the natural color or scent of the flowers. Gal. can, \$15.00; 1 pt. for 32,000 cubic feet, \$2.50; ½ pt. for 16,000, cubic feet, \$1.25; ½ pt. for 8,000 cubic feet, 70 cts. How to Measure the House.—To ascertain how many cubic feet there are within any greenhouse, etc., multiply the length in feet by the breadth in feet, then by the average height; the result being the number of

Fumigators for Vaporizing "Nicoticide." These consist of stand, pan and lamp. The set 50 cents. In a large house one fumigator should be used for every 5,000 cubic feet, distributing them evenly over the house and using all simultaneously.

"Nico-Fume" is especially effective against Aphides ("Green Fly" and "Black Fly") and against all insects affected by tobacco. "Nico-Fume" is packed in special friction-top tins and is sold as follows: :4 sheets, 75 cts.; 144 sheets, \$3.50; 288 sheets, \$6.50.

Nikoteen. Packed in pint bottles; each bottle contains all the nicotine obtained from 200 pounds of tobacco stems.

A cheap, clean and safe insecticide. Can be applied by fumigation, or applied locally, diluted as a spray. Pt. bottle, \$1.50.

Paris Green, Guaranteed Pure. This is the highest grade of Paris green it is possible to make. It is manufactured from pure material and is always of uniform quality. Be careful of cheap greens and so-called new methods. These products are liable to burn and scorch the leaves. 1/4 lb. 15 cts.; 1/2 lb. 20 cts.; 1 lb. 35 cts. Subject to market changes.

Pyrox. A combined insecticide and fungicide for use on fruit trees, shrubs and vines, kills leaf and fruit eating insects and prevents scab, rot, mildew, etc. "It sticks like paint." 5 lbs. \$1.00; 10 lbs. \$1.75; 25 lbs. \$4.00; 100 lbs. \$15.00.

"TARGET BRAND" SCALE DESTROYER. FOR SAN JOSE SCALE.

This preparation is a soluble oil which positively destroys and prevents San Jose Scale. In exhaustive test with other similar materials it has proven far superior.

Target Brand Scale Destroyer dilutes instantly in any kind of water and will not separate. It kills scale by suffocation, forming a very thin waxy film on the limbs and branches of the trees. Being perfectly neutral and containing no crude oil, it cannot injure the most delicate growth. It has no caustic action and cannot injure hands, eyes, body, clothing or spraying apparatus; also possesses no disagreeable odor.

DIRECTIONS.—Dilute I to 20 for winter treatment; I to 25 for fall and late spring treatment; I to 40 for summer treatment.

Prices: qt. 35 cts.; 1/2 gal. 65 cts.; gal. \$1.00; 5 gals. \$3.75; 10 gals. \$7.50; 25 gals. \$14.00; 50-gal. bbl. \$25.00.

Slug Shot. Not only acts as an insect destroyer, but it will be found to be an excellent fertilizer. Price, 1-lb.

boxes, 10 cts.; 5-lb. pkg. 30 cts.; 10-lb. pkg. 50 cts.; in barrels of about 225 lbs., per lb. 4½ cts.

Soap, Pinner's Tobacco. Manufactured from the essential oil of tobacco, for the destruction of all insects, para-

sites and their eggs. Per lb. 50 cts.; ½ lb. 30 cts.

Soap, Whale Oil and Potash. Breck's Special. For the destruction of San Jose scale and all sucking insects. Lb. 15 cts.; 14-lb. bucket, \$1.50. Special prices on kegs and casks.

Soap, Sulpho-Tobacco. (Patented.) A superior insecticide and fertilizer. Non-injurious to the tenderest growth-Kills all insect life in the window-garden. Unsurpassed for rose bushes. For domestic purposes, it is valuable as an exterminator of moths, cockroaches, carpet bugs, and is a superior wash for dogs and all animals. Every

insect will succumb to this Insecticide. 3-oz. cake, 10 cts.; 8-oz. cake, 20 cts.; 10-lb. can, \$3.00.

Soap, Fir Tree Oil. This article contains no poison, yet it is quite effective in destroying red spider, mealy bug,

aphis, etc. 1/2-lb. tin 25 cts.; 2-lb. tin 75 cts.

Sulphate of Copper. (Blue Stone.) Per lb. 12 cts. Subject to market changes.

Sulphur, Flowers of. Used to prevent and cure mildew on plants. 8 cts. per lb.; \$6.00 per 100 lbs. Net.

Tobacco Extract. Rose Leaf Brand. A perfectly pure aqueous extract, highly concentrated and always uniform in strength of nicotine poison. Destroys green fly, mealy bug, red spider, and scale. Pt. 25 cts.; qt. 45 cts.; 1 gal. \$1.10; 5 gals. \$4.50.

Tobacco Dust. This article varies as much in quality as do cigars. To produce effective results the right kind, and

in suitable mechanical condition, must be used.

Fine Ground Black. For dusting on plants, animals, in poultry houses, etc. Per lb. 5c.; 100 lbs. \$3.00. Net. Fumigating Brand. (The kind that burns.) This is used by gardeners and florists and poultrymen for fumigating greenhouses, poultry-houses, etc. It can be readily lighted and consumes itself without making a flame, throwing off great quantities of smoke. Per lb. 5 cts.; per 100 lbs. \$3.50. When ordering please state kind wanted.

Tobacco Stems. For fumigating. If used as a mulch around sweet peas and other plants they prevent the destruc-

tive work of the wire and cut worms. \$1.00 per 40 lb. sack; \$2.50 per bale. \$25.00 per ion. Net.

XL-All Liquid Insecticide. For syringing, spraying, dipping or sponging. Destroys all insects, especially effective against mealy bug and red spider. Can be used without injury in graperies, even when the fruit is in an ad

vanced stage of growth. Pt. 65 cts.; qt. \$1.00.

XL-All Vaporizing Compound. This is an English preparation, that at the first glance has a high-priced appearance. The safety with which it can be used, its never-failing effectiveness and the ease with which it can be applied as an insecticide place it at the head of the first rank. It is cheaper, results considered, than any other vaporizing compound and there is no other like it. Its action is positive on Mealy Bug, Thrip, and all kinds of Aphis. Price per bottle No. 1, \$6.50; No. 2, \$3.25; No. 3, \$1.65; No. 4, 90 cts. The smallest bottle is sufficient to fumigate 5,000 cubic feet.

nigators. With lamp for vaporizing: large, \$1.00; medium, 85 cts.

Tree Tanglefoot. A perfect safeguard for trees, vines and shrubs against Gypsy, Brown-Tail and Tussock Moth, Canker Worm, Cut Worm, Ants, and other creeping insects. GYPSY AND BROWN-TAILED MOTHS -- Apply as soon as the foliage begins to appear. Should be applied to the body of the tree to form a continuous sticky band around the tree trunk at least 1-16 to 1-8 in. thick and from 3 to 5 in. wide. Apply it high enough from the ground so as to be out of the way of children and animals. Before applying remove all loose bark from the surface to be coated. Apply with a small wooden paddle. The bark should be dry when applied. Do not heat, but apply it directly from the can. 25 cts. per lb. in 1 lb., 4 lb., 10 lb. and 25 lb. tins.

Tree Ink, Morrill's. (Canker Worm Exterminator.) A sure protection to trees from the ravages of grubs and canker worms. Directions with each can.

FERTILIZERS.

BRECK'S LAWN AND GARDEN DRESSING.

The verdict of all who have used Breck's Lawn and Garden Dressing is that it is the most complete and satisfactory Lawn Dressing ever placed upon the market. It is manufactured expressly for us and we wouch for its containing all the constituents required to produce a luxuriant growth. We believe beyond a question that ours is the only absolutely odorless Lawn Dressing. It is also so clean that the most fastidious person can apply it without offending the organs of sight and smell. It being quick in action, the effect can be seen immediately after the first rain or the sprinkling of the hose, and going directly to the roots of the grass, stimulates them to greater activity, thereby thickening the sward and producing a fimer growth, which remains rich, green and velvety throughout the season. Its superiority over stable manure can scarcely be estimated, as the latter, in addition to disfiguring the lawn by its unsightly appearance, also gives out an unpleasant odor, and always

contains weeds and other undesirable seeds. Great care should be taken to distribute the dressing evenly, and in no greater quantities than recommended on the tag which accompanies each bag, as a too liberal application will injure the sward. It can be applied at any time during the year, from April to November, as often as the grass seems to need nourishment. In making new lawns apply at the same time the seed is sown and rake in with the seed. Never apply the dressing while the grass is wet with dew or rain. Any time the grass is perfectly dry will answer, but the best time to apply it is just before a shower. It is equally as suitable for flower beds and all vegetable crops as for the lawn.

BRECK'S MARKET GARDEN MANURE.

Not subject to our special offers, but a discount of 5% may be deducted when cash accompanies order.

A high grade, properly balanced, chemical fertilizer that is especially recommended to market gardeners and farmers for potatoes and all vegetable crops. We sold large quantities of it last year, and already we have had many testimonials, also increased orders from those who had it for use this Spring. It is beyond a question the best value offered in Chemical Fertilizers. 50 lbs., \$1.00; 100 lbs., \$1.80: ton, \$34.00.

JOSEPH BRECK & SONS.

Gentlemen: I am very much pleased with your Breck's Market Garden Manure, and wish to say that in our trials of it with other phosphates it has given us by far the best satisfaction, and we feel satisfied that it is the cheapest way of fertilizing, where barn manures are as expensive or as hard to procure as they are in this locality. We have found your Fertilizer especially adapted to the growth of Cauliflower and Potatoes. Scituate, Mass. J. N. TURNER & SON.

PERUVIAN GUANO.

(Prices subject to market changes.)

For a number of years there has been some difficulty in obtaining a desirable grade of this article. When a good quality is to be had there is much satisfaction resulting from its use, especially on early vegetables and quick growing crops. We have made arrangements with the importer of the best brand that sells so freely in Britain and offer our patrons the genuine "Peruvian" in original bags. Per ton, \$50.00; per 100 lbs., \$3.00 net.

UNLEACHED HARD WOOD ASHES.

Our trade in this valuable fertilizer has grown to such an extent that we have for a number of years had an experienced agent employed in Canada collecting the purest, driest and choicest grade of Hard Wood Ashes that is obtainable. We guarantee the percentage of potash and to insure against too much water we accept none that contain more than 12 per cent moisture. We quote special prices on car loads in bulk delivered anywhere. Price per ton, in sacks, f. o. b. Boston, \$16.00 net; per sack of 100 lbs., \$1.25.

(CORPORATION)

Sheep Manure. — Ram's Head Brand,

Much of the material now offered as sheep manure is of no more value than good soil, the active and actual plant food having been leached through exposure to the atmosphere for years. The sheep manure we sell is a guaranteed fresh and pure manure, in good mechanical condition and nutritious food for plants. Its effect is immediate. It is the best of all manures

for mixing with the soil for greenhouse plants—one part manure and six parts soil. Price, in bags of 100 lbs. each, \$2.00; per ton, \$35.00 Sheep

manure is net f. o. b. Boston.

A chemically prepared cocoanut fibre, rich in plant food. Its peculiar character especially adapts it to induce root growth and cause healthy, vigorous plants. For potting bulbs use one-third Fibre to two-thirds of the usual soil preparation and you will be surprised at the results. Cocoanut Fibre is unsurpassed as a medium in which to sprout seeds. Price, 5 lbs., 30 cts.; 15 lbs., 50 cts.; 25 lbs., 75 cts.; 50 lbs., \$1.00; 100 lbs., \$1.50, net.

Gocoanut Fibre.

Chemicals For Imperial Liquid Plant Food.

MAPES MANURES.

These Manures and Superphosphates are fine, dry, in superior mechanical condition for use in machine drills, or for application by hand. They are free from stickiness and dampness. Packed in bags weighing 100 lbs. each.

Each bag is plainly branded, besides having a tag attached, upon which is printed the Guaranteed Analysis and

full directions for use.

The basis of the Mapes Manures is Bone; no Rock used.

We are the sole Boston agents, also for some other New England sections. Pamphlets giving full information in regard to the manures mailed free.

These prices are NET, F. O. B., BOSTON, but a discount of five per cent. may be deducted when cash accompanies order.

Potato Manure. Ammonia, 4.50 to 5 per cent; phosphoric acid, 8 to 10 per cent (soluble and available, 8 per cent); soluble potash, actual, 6 to 8 per cent, all as high grade sulphate and in forms free from muriates (or chlorides); magnesia, lime, etc., 77 to 81 per cent. For Irish and sweet potatoes, also for asparagus, early vegetables, tomatoes, sugar beets, fruits, sorghum, sugar cane, sweet corn, etc. Per bag of 100 lbs., \$2.35; five bags and over, \$44.00 per ton.

Economical Potato Manure. Ammonia, 4 to 5 per cent; phosphoric acid, 6 to 8 per cent (soluble and available, 4 to 5 per cent); soluble potash, actual, 8 to 10 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). Per bag of 100 lbs., \$2.30; five bags and over, \$41.00 per ton.

Fruit and Vine Manure. Ammonia, 2 to 3 per cent; phosphoric acid, 7 to 9 per cent (soluble and available 5 to 7 per cent); solul'e potash, actual, 10 to 12 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For insuring fruiting power, particularly in quality of fruit in vineyards (grapes), pears, apples, plums, strawberries, and all small fruits. Is slow in effects. Per bag of 100 lbs., \$2.45; five bags and over, \$45.00 per ton.

Vegetable Manure, or Complete Manure (for light soils). Ammonia, 6 to 8 per cent; phosphoric acid, 8 to 10 per cent (soluble and available, 6 to 8 per cent); soluble potash, actual, 6 to 8 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). This is our special manure on all kinds of soils, for truck, early vegetables, onions, celery, tomatoes, also on light soils for oats, hops and barley. All vegetables require liberal supplies of soluble potash and in the proper form. Even with heavy or clay soils the natural supplies of potash are insufficient. Per bag of 100 lbs., \$2.60; five bags and over, \$47.00 per ton.

Complete Manure (for heavy soils). Ammonia, 6 to 7 per cent; phosphoric acid, 10 to 12 per cent (soluble and available, 8 to 10 per cent); soluble potash, actual, 3 to 4 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For any soils where small quantity of potash but large quantities of ammonia and phosphoric acid are required. It is very safe for use around young plants, nursery stock, strawberry vines. It is very forcing. Special for early turnips. May be used for oats, hops, barley, also as a top dressing for grass, and as a forcing manure for all vegetables and fruits at all times. Per bag of 100 lbs., \$2.50; five bags and over, \$45.00 per ton.

Complete Manure (for general use). Ammonia, 4 to 5 per cent; phosphoric acid, 10 to 12 per cent (soluble and available, 8 to 10 per cent; soluble potash, actual, 4 to 5 per cent. A substitute for stable manure. For use on all crops and all soils with or without stable manure. Use broadcast; if any in hills, use sparingly. Special for oats, Hungarian grass, vegetables, melons, tomatoes, and seeding with or without grain. Per bag of 100 lbs., \$2.30; five bags and over, \$42.00 per ton.

Complete Manure ("A" Brand). Ammonia, 3 to 4 per cent; phosphoric acid, 12 to 16 per cent (soluble and available, 10 to 12 per cent); soluble potash, actual, 2.50 to 3.50 per cent. Specially adapted for use in hill or drill on all crops, particularly in connection with farm manures. Special for peas, beans, buckwheat and turnips. Per bag of 100 lbs., \$2.20; five bags and over, \$40.00 per ton.

Average Soil Complete Manurc. Ammonia, 5 to 6 per cent; phosphoric acid (soluble and available, 7 to 8 per cent); soluble potash, actual, 5 to 6 per cent, all as high grade sulphate and in forms free from muriates (or chlorides). For onions, tomatoes, vegetables of all kinds, Irish and sweet potatoes, fruits and cranberries. A substitute for stable manure. Special for tobacco on heavier soils. Per bag of 100 lbs., \$2.30; five bags and over, \$41.00 per ton.

Corn Manure. Ammonia, 3 to 3.50 per cent; phosphoric acid, 10 to 12 per cent (soluble and available, 8 to 10 per cent); soluble potash, actual, 6 to 7 per cent. Also for sweet corn, fodder corn, Hungarian grass, millet, late turnips, late cabbage, and seeding to grass. Per bag of 100 lbs., \$2.20; five bags and over, \$40.00 per ton.

Cauliflower and Cabbage Manure. Ammonia, 5.50 to 6.50 per cent; phosphoric acid, 6 to 8 per cent; actual potash, 8 to 10 per cent. Per bag of 100 lbs., \$2.35; five bags and over, \$43.00 per ton.

Grass and Grain Spring Top Dressing. Ammonia, 5 to 6 per cent; phosphoric acid, 7 to 9 per cent; actual potash, 5 to 7 per cent. Per bag of 100 lbs., \$2.50; five bags and over, \$46.00 per ton.

Cereal Brand. Ammonia, 2 to 3 per cent; phosphoric acid, total, 8 to 10 per cent (soluble and available, 6 to 8 per cent); soluble potash, actual, 3 to 3.50 per cent. For wheat, rye, corn, oats, buckwheat, and all farm crops, particularly where farm manures are used. Specially adapted for use in hill or drill. Per bag of 100 lbs., \$1.95; five bags and over, \$35.00 per ton.

BRADLEY'S FERTILIZERS

Are guaranteed to contain more plant food in a better mechanical condition and of higher agricultural value than any other fertilizers in the world, and they are, therefore, as the New England Homestead affirms "the most economical to use."

Do not be misled into purchasing unknown fertilizers of uncertain value, but buy Bradley's Fertilizers which have grown large crops of superior grass, grain, and vegetables, on thousands of farms all over New England for more than thirty years.

Among their leading brands are:

BRADLEY'S SUPERPHOSPHATE

Bradley's Superphosphate, the pioneer of the fertilizer industry in the United States, has been more extensively used than any other brand of fertilizer in the world.

From its unvarying quality and uniform condition it has gained the name that more plainly bespeaks the estimate in which it is held among the farmers than volumes of praise,—"the Old Reliable."

BRADLEY'S POTATO MANURE

For Growing Smooth, Sound Potatoes of the Best Quality Without Barnyard Manure.

Bradley's Potato Manure is in no sense a theoretical or experimental mixture, but is prepared from formulas which repeated *field tests* have proven will produce the largest crops of smooth, sound potatoes.

The universal testimony of leading farmers is convincing that it gives the best of satisfaction, and at a considerable saving in cost over many of the high-priced special "potato manures" whose alleged scientific combination is their principle claim to the farmers' patronage.

BRADLEY'S COMPLETE MANIJRES

For Potatoes and Vegetables. — For Corn and Grain. — For Top-Dressing Grass and Grain, With 10 per cent. Potash.

These manures are the richest and most concentrated fertilizers sold, as has been abundantly proven by actual results in the field. They are manufactured from the very best plant-food materials obtainable combined in such form and proportions as long practical experience has proven will yield the largest crops of the best quality.

Send to us for finely Illustrated pamphlets, describing all of their brands, and let us quote you prices on all of these unequalled fertilizers before purchasing elsewhere.

CHURL PLANT GROWER and BLOSS

PLANT BLOOD

THE PLANT MOURISHER AND TRIME

*** * ***** **** **** ***** *****

Clay's Fertilizer.

A safe and reliable preparation. In great favor with successful gardeners in England. Prices: 2-lb. cans 35 cts.; 1/8 cwt. (14 lbs.) \$1.25; 1/4 cwt. (28 lbs.) \$2.25; 1/2 cwt. (56 lbs.) \$4.00; I cwt. (112 lbs.) \$7.00.

Thomson's Vine, Plant and Vegetable Manure.

A safe and reliable food and stimulant for every fruit-bearing plant, also for foliage and flowering plants and vegetables of all descriptions. Prices: ½ cwt. (14 lbs.) \$1.25; ½ cwt. (28 lbs.) \$2.25; ½ cwt. (56 lbs.) \$4.00; 1 cwt. (112 lbs.) \$7.00.

Thomson's Special Chrysanthemum Manure.

Entirely soluble and very powerful, especially suitable for top-dressing chrysanthemums and similar plants. It is meant to be used as an additional stimulant during the growing season. A heaped dessert-spoon full will be sufficient for a 10-inch pot, sprinkled over the surface of the soil, and watered in with tepid water. This may be given three times during the growing season. Price, 14 lbs. \$2.25; 28 lbs. \$4.00; 56 lbs. \$7.00.

Bonora.

Nature's plant food. Full directions with each can. Contains more soluble plant food than any other plant food on the market, and its merits have been widely tested and proven by numerous expert gardeners. Price, 4-oz. pkg. 25 cts., by mail 30 cts.; 1-lb. pkg. 50 cts., by mail 65 cts.; 5-lb. pkg., by express, \$2.50.

Plant-Blood.

PLANT-BLOOD was invented to fill the need for a fertilizer for potted plants that would be absolutely safe and sure. Endless experiments and thorough search have at last produced in PLANT-BLOOD just what florists have always demanded and hitherto failed to obtain. This vitalizer acts directly on the plant saps, instilling new life, imparting rich coloring to leaves and blossoms, and wonderfully quickening the growth of the plant. Its fertilizing effect is enormously superior to any other plant food on the market. Plant-Blood is put up in distinctively attractive tubular cartons. Price, 15 cts.

Nitro-Culture.

NITRO-CULTURE consists of nitrogen-collecting Bacteria which work in the soil and on the roots of leguminous plants, having the power to collect free nitrogen from the air and supply it to the plants. All plants need nitrogen, which is very costly when obtained by chemical process.

METHOD OF USING.—The Bacteria are furnished dried on absorbent cotton, and can be readily forwarded by mail to any section of the country. Full directions accompany each package, which no farmer can have any difficulty in following out.

When ordering, state what particular crop you desire to inoculate. Crops mentioned on the same line require

same Bacteria.

Alfalfa or Lucerne.
Red, Yellow or Mammoth Clover.
Alsike or White Clover.
Crimson Clover. Burr Clover.

Cow, Clay, Whippoorwill, Black Eye Peas. Garden Peas. Soy Beans. Velvet Beans.

Garden Beans (Wax, String, Lima, Pea or Kidney), Vetch. eanuts. Field Peas.

Nitro-Culture cannot be furnished for any crops like corn, wheat, potatoes, cotton, etc., but only those which are mentioned in the above list. Price list: ¼ acre pkg. 50 cts.; 1 acre pkg. \$1.50; 5 acre pkg. \$5.00; 20 acre pkg. \$18.00; 50 acre pkg. \$40.00.

SPECIAL GARDEN SIZE: Sweet Peas, 25 cts.; Garden Beans, 25 cts.; Garden Peas, 25 cts.

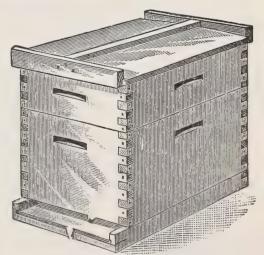

Bees and Bee-Keepers' Supplies.

Prices subject to change.

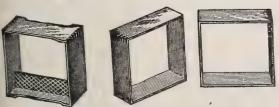

The particular feature of the Hive, and hence its suggestive name is the dovetailing. Unlike the old-fashioned lap, miter, or halving plan, it will not gap or pull loose, but will successfully resist all climates. This Hive is fitted with Danzentaker bottom board and cover. As we ship, it is fitted complete with starters in Brood Chamber and Section Boxes. We have in stock but one size, the eight frame. All Hives set up ready for

Net price, each, \$3.00.

Section Boxes, each, I cent; per 100, 75 cents; per 250, \$1.50; per 500, \$2.50. Our No. 1 Sections are made of the choicest white basswood lumber, and are all perfect in finish, and free from defects. They are not all snow white, but vary from that to a light cream color. Choice honey shows off to best advantage in a section not too white.

Dovetailed or Lock-Corner Hive.

necessary to the successful Bee-Keeper.

Bingham Smoker.

This is strong, well made, does not clog up and burns any fuel. It has recently been improved by the addition of a curved snout to prevent fire dropping, and a safety attachment to prevent burning the fingers in removing the hot cone for replenishing. They have wide shields; have wire handle to cone, and inverted bellows. Large 2½ in., each, 70 cents;

Section Honey-Boxes. by mail, 95 cents. Bee Supplies not included in Special Offers.

We also have in stock Brood and Section Foundation, Bee Veils, Rubber Gloves and many other articles Prices quoted upon application.

We carry the most extensive line in New England. (Prices subject to change.)

BOSTON, MASS.

To Raise Healthy Chicks
Use

Breck's Hygienic Brand
Chick Food.

To Make Hens Lay
Use
Breck's Complete Poultry
Feed.

Breck's Hygienic Brand Chick Food.

A scientifically proportioned mixture which will meet every demand of the growing chick, and supply, without excess of fat, the food necessary to produce and sustain vigorous health. There is nothing in this preparation that is at all likely to induce indigestion or diarrhæa, but on the contrary, it is so balanced in its constituents as to in a large measure make these troubles impossible where cleanliness and proper brooding conditions exist. It also contains the bone-forming properties that prevent leg weakness. It is high in protein, the flesh and muscle forming elements. There is sufficient mineral material to supply the needs of the bone structure of the rapidly growing chicks, while it is low in carbohydrate, the fat-forming element, which, where in excess, causes sickness and loss.

No other feed is necessary for the first eight or ten weeks. Feed dry. 50 lb. bags, \$1.50. 100 lb. bags, \$2.75.

Breck's Complete Poultry Feed.

We have frequently been asked by many of our patrons to put up in a convenient form a complete Poultry Feed. In response to the above requests, after a great many experiments, we offer in **Breck's Complete Poultry Feed** what we believe is the best food for poultry that is on the market to-day.

Great care has been exercised in the selection and balancing of the materials of which it is composed. It is being used in large quantities by many of the most successful Poultry Raisers in New England, and is without doubt the best Food of the kind sold at the present time. Feed dry. 50 lb. bags, \$1.35. 100 lb. bags, \$2.50.

Breck's Mash Egg Food.

Is a properly balanced meat and cereal preparation, and is one of the best egg-producing foods we know of for poultry that do not have large runs; it is just what is wanted to keep them in good vigorous condition. Can be fed wet or dry. Price, 100 lb. bags, \$2.50.

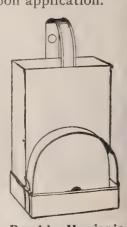

Breck's Banner Brand Cut Clover and Clover Meal.

The best known green foods for poultry. DIRECTIONS FOR FEEDING:—Pour on boiling hot water, cover, let steam an hour, then mix with usual morning mash at the rate of one-third clover to two-thirds the regular ground grains. Per 50 lb. bag, \$1.25; 500 lbs., \$12.00. Net. Special price on larger quantities quoted upon application.

Breck's Hub Poultry Fountain. This fountain is made of the best galvanized iron, is very strong, easily cleaned, quickly filled, and is equally serviceable for both chickens and adult fowls. (See cut.) ½ gal., 50 cents each; I gal., 75 cents each; 2 gals., \$1.25 each. Special prices per dozen or 100 upon application.

Breck's Hygienic Poultry Fountain. Made of heavy galvanized iron. Easily cleaned and filled. Water Pan fastened with hinge and spring clip. The best sanitary fountain in every respect on the market. I gal., 75 cents each.

Breck's Hygienic Poultry Fountain

"E. H. M." Stone Fountains. Made of glazed stoneware, in two pieces; a saucer and an inverted cup, finished off on top to prevent roosting. Strong, cheap, easily cleaned and quickly filled. The best stoneware fountain yet offered. The one quart size is specially suitable for pigeons. 1 qt. 25 cts.; 2 qts. 30 cts.; 1 gal. 35 cts.; 2 gals. 50 cts. Net.

Stone Drinking Fountain. This fountain is of the best patent stoneware and is very

desirable.

Net price, each: ½ gal. 35 cts.; I gal. 40 cts.; 2 gals. 50 cts.

Sterlingworth Poultry Charcoal.

Sterlingworth Charcoal is especially prepared for poultry. It is carefully and uniformly graded in just the right sizes, is free from ammonia or other dangerous poisons, contains no useless dust or dirt and is the best charcoal sold for poultry.

It is manufactured in four grades: X (Fine Powdered) for mash foods and ducks; XX (Fine Granulated) for brooder chicks and dry chick food mixtures; XXX (Medium Granulated) for half-grown fowls and pigeons: XXXX (Coarse Granulated) for full grown fowls, geese and turkeys.

Price: per lb. 10 cts.; 5 lbs. 25 cts.; bag of 50 lbs. \$1.25.

Ground Oyster Shells. 100 lb. bag, 75 cts.; 500 lb. lots, 65 cts. per 100 lbs.

Mica Crystal Grit. 50 lb. bag, 50 cts.: 100 lbs., 80 cts. Cracked Poultry Bone. Per bbl. of about 200 lbs.,

\$2.25 per 100 lbs.

Bone Meal for Poultry and Cattle. 50 lb. bag, \$1.25; 100 lb. bag, \$2.25; per bbl. of about 200 lbs., \$2.25 per 100 lbs.

Climax Leg Bands. A thick brass wire goes around the leg which is locked securely by the attaching of the tag bearing number. All sizes. Doz., 15 cts.; 100, \$1.00.

Postpaid.

Leader Adjustable Leg Bands. Latest and best adjustable leg band out. Has neat, compact and smooth fastening with no catching points; easily attached and are absolutely secure. Made in two sizes: No. 1 for Bantams or Mediterraneans, No. 2 for Americans. Per doz., 15 cts.; per 100, 75 cts. Postpaid.

Nests, Wire. Strong and clean. Each, 50 cts. Guns, Insect Powder. 2 oz. size, 15 cts. each.

Pumps, Breck's Hand Force is a double-acting portable force pump. It is made of brass, and therefore impervious to the action of acids and liquids, and will not rust or corrode. Pump is placed directly in water or other liquid, insuring a perfect suction. It is furnished complete with malleable foot-rest and suitable nozzles for a solid stream and large spray. Pump may be used for washing windows,

wagons, in conservatories, gardens, etc., and for general spraying purposes. Price, \$4.50 each.

Acme Sprayer. Invaluable for spraying all kinds of

insecticides in a liquid or dry powder form and for spraying cattle.

They are especially adapted to the use of poultrymen and florists, and can be used by all to advantage around the house and place. The brass sprayer is not affected |

by acids, and is practically indestructible. All Brass sprayers Our net price, each, \$1.00 " Tin

Punch, Breck's Improved Spring Lever. Works on the principle of a conductor's punch, and does perfect work. Its use enables poultrymen to identify their own

birds or any particular hatching of them. By mail

Lehman's Heaters. Put one of these heaters in each poultry house on cold nights and there will be no frozen combs. The use of Lehman's Heaters and Coal is no longer an experiment. Their practicability and usefulness have long since been demonstrated. The fact that 125,000 Heaters are in actual use, with an average yearly sale of 10,000 Heaters and ½ million pieces of coal, speaks more for their merits than thousands of testimonials.

Lehman's Heater is a metallic case 71/4 inches wide, inches deep, and from 14 to 20 inches in length. The top is oval, giving the feet a comfortable resting place. These Heaters, which are furnished with carpet coverings, have a lining of asbestos cloth between the carpet and the heater, making it perfectly safe from scorching.

The No. 3 and No. 4 Heaters are our standard Heaters, which we specially recommend, as they are packed with a special composition which retains the heat and makes

them more durable. Net Prices.

contains no alcohol or poisonous ingredients. It may be applied to a raw surface or even poured into the eye of an animal without causing pain. It cures Galls, Scratches and Surface Inflammation of every description. Per large bottle, \$1.25.

GENUINE PRAIRIE STATE INCUBATORS AND BROODERS.

To those who desire to rear as well as to hatch chicks and ducks, the selection of an incubator is of vital importance. The high deathrate experienced with chicks the first ten days is more frequently due to imperfect incubation than to any other cause. Too many incubators of to-day are constructed with reference solely to hatching the desired numbers without considering the manner in which they are brought into existence.

Weak, anæmic chicks, lacking in strength and vitality, are of no value, if you hatch thousands; hence the importance of carefully considering the merits of an incubator in this direction before making a selection.

The Prairie State Sand Tray Incubators have proven themselves by thousands of tests, both in the hands of the novice, as well as in comparative results obtained by the large poultry plants using different makes of incubators.

The perfect construction and automatic heat regulation of these machines makes them easily operated and results doubly certain.

Prairie State Incubator Co.: Bellingham, Mass., Nov. 8, 1907. Prairie State Incubators have always had a reputation of being equal to any made, but in this new style you have certainly forged ahead. The large egg chamber appealed to my judgment as of great practical use, that wet sand tray took from my mind any anxiety as to proper moisture, and the close fitting egg tray allowed me to dry off my chicks without dropping into the lower part of the machine. That your Incubators hatch chicks of show quality is plain to me, as I have sold more Buff Wagned that there have some the blue without the sold was the sold to the large that the sold was the sold was the sold to the sold was the sold to the sold was the sold to the sold was the so Wyandottes this fall that have won the blue ribbon than ever before. The chicks came out of the machine big, fluffy and sprightly, and grew right along into show-room condition. I see nothing to improve in this 1907 incubator. Truly yours, N. W. SANBORN, M. D. (Farm-Poultry Doctor).

The PRAIRIE STATE UNIVERSAL HOVER has completely revolutionized the rearing of chicks. No device ever offered to the poultry-raiser has received such endorsement. In cold weather and hot weather it has been an overwhelming success. As its name implies, our Universal Hover has a universal sphere of usefulness. There is practically no limit to its adaptability. As an individual brooder, in brood houses alone or in combination with a hot-water pipe system, or may be used as an indoor brooder in almost any kind of building. It may be attached to any form of outdoor brooder two feet or more in height, to any size or form of colony house, shed, coop, piano, dry-goods or organ box. It also enables those who wish to build their own brooders to get the best brooding device possible in an economical manner. It fills that want, felt by everyone who raises poultry, for something they can use anywhere, any time, and do the work well.

The hover is twenty-two inches in diameter, the top of which is wood, lined with strawboard, a 4-inch rim extending downward, to which is attached six inches of felt curtains. The hover stands on three iron feet, but is not stationary, and may be raised and moved instantly, if desired.

A thermometer is provided, which may be read from the outside without disturbing any part of the brooder. The lamp used is made of metal, using a No. 2 Sun Hinge Burner and a metallic chimney seven

inches in length, thus assuring a steady, bright, clear flame; the lamp being on the outside of the brooder in full view at all times. Surrounding the hot air flue or chimney is a fresh-air pipe, through which fresh air, slightly warmed, is injected into the upper part of the brooder. This diffuses downward and through the curtains, thus furnishing a perfect system of ventilation.

THE UNIVERSITY OF MAINE,

Prairie State Incubator Co., Homer City, Pa. Orono, Aug. 28, 1907. Gentlemen: Last Spring I bought fourteen Colony Brooders of you for use at Go-Well Farm. I have used them during the season and am more than pleased with them. I expect to build some more portable brooder houses—7 x 12 ft. in size—next Spring, and shall get your Universal Hovers and attach one at each end of these double houses or brooders. I like them. I expect to build some Most truly, G. M. GOWELL.

NOVELTIES and SPECIALTIES

* * in FLOWER SEEDS * *

Aster, Breck's Concord.

These magnificent Asters are large, double and very showy, the petals overlapping clear to the centre. The plants are of luxuriant growth, 18 in. high, and bear from 25 to 40 flowers on a plant. The flowers measure 4 to 5 in. across and are of perfect form. We are pleased to offer this year the Concord Aster in separate colors.

Pure white, Celestial blue, Sea-shell pink, Mixed colors, Pkt. 15 cts.; ½ oz. 75 cts. 15 cts.; ½ 75 cts. 15 cts.; ½ 75 cts.

Aster, Mammoth "Mauve Queen."

This Aster is of the Comet class. The flowers are of perfect form, very large and very double, on long stems. The color of this Aster, pearl gray, makes it a valuable acquisition to the Aster family. Pkt. 25 cts.

Aster, Ostrich Plume "Model."

A new and distinct variety, with the true ostrich feather form. The plants are of compact habit, 6 inches in height and very free flowering; fine for borders.

Pure white, pkt. 25 cts. Bright rose, pkt. 25 cts.

I have grown the Concord Aster for the last two years, and found it the best variety of the Aster family I have ever g own. It possesses all the requisites necessary for a cut flower. Yours truly, ELIJAH A. WOOD, West Newton.

Mass

BRECK'S CONCORD ASTER

For complete list of Asters see pages 88, 89, 90.

Alyssum Compactum, "Little Dorrit."

A great improvement on the "Little Gem," being much more compact, with miniature white rocket flowers; fine for borders. Pkt. 10 cts.

Aquilegia, Breck's Long Spurred Columbine.

A hardy perennial easily grown from seed.

This new single strain is the result of many years of careful selection and hybridizing, and is a great improvement on the old-fashioned Columbine. The flowers are very large and long-spurred, and embrace a wide range of color, including many new and charming shades. Pkt. 10 cts.; ½ oz. \$1.00.

Gandytuft, Breck's White Giant.

The finest large flowered white Candytuft yet produced. It is as suitable for forcing as for outdoor culture. The spikes of bloom are pure white, broad and of immense size. Pkt. 10 cts.; oz. 50 cts.

Chrysanthemum Inodorum, Bridal Robe.

This is a great improvement on the old variety. The flowers are large, very double, pure white and perfect in form; very useful as a cut flower. Pkt. 10 cts.

Shasta Daisy.

(Chrysanthemum leucanthemum hybridum.)

Flowers are very large and beautiful, frequently four inches or more in diameter, with three or more rows of petals of the purest white, on single, strong stems, nearly two feet in length. Pkt. 10 cts.

Eschscholtzia Erecta Compacta, "Dainty Queen."

This charming new shade is of a tender blush or pale coral pink, slightly deeper towards the edges, with a groundwork of delicate cream; forms a compact bush, very free blooming. Pkt. 25 cts.

Breck's Double Bachelor's Button.

Centaurea Cyanus. Breck's Double Bachelor's Button.

A grand improvement on the old-fashioned Centaurea Cyanus. This strain will prove a great acquisition as a cut flower, being double and of a very deep blue; the flowers measure two inches in diameter, with the petals formed in perfect rows, and bloom continually all summer. Pkt. 15 cts.; oz. \$2.00.

Breck's Choice Cactus Dahlias.

Cactus Dahlia.

Begonia, Single Cristata.

The flowers of this variety are beautifully crested, bearded and fringed. This strain is much admired, and will be welcomed by all who appreciate the high decorative value of Tuberous Begonias. In separate colors, 25 cts. each; \$2.50 per doz.; \$15.00 per 100.

Gladiolus America.

This Gladiolus is the most beautiful and useful yet in cultivation. Its color is charming, being a soft flesh pink, very light, and slightly tinged with lavender, which gives it a delicate coloring. For florists' use it is very desirable, and its exceptionally rich, dark green foliage and erect spikes of extra large and beautiful flowers make it valuable for planting in beds. Each 15 cts.; per doz. \$1.50; per 100 \$11.00.

Gladioli, Breck's Special Groff's Hybrids.

The size, form and variety of colors make Groff's Hybrid Gladioli exceedingly attractive and desirable. Those we offer as *Breck's Special are the best*, and embrace the newest forms and colors, including the rare *blue*, *lilac* and *heliotrope* shades. We recommend our customers to include some of these in their purchases. There is no chance of disappointment. Each 8 cts.; doz. 75 cts; 100 \$5.00.

(For complete list of Gladioli see page 123.)

The Cactus Dahlia owing to its great beauty has achieved a wonderful success as an autumnal flower. Its elegant form and brilliant colors make it invaluable for decorative purposes. We offer here a collection of what we consider the best and most popular varieties.

1 Dozen Cactus Dahlias.

Albion. Pure white. Primrose Dame. Clear yellow, fine. Starfish. Bright fiery scarlet. Salmon pink, fine. Britannia. Columbia. Vermilion and white. Cinderella. J. H. Jackson. Dark maroon. John Gilpin. Terra-cotta red. Gen. French. Deep bronze. Stella. Vivid crimson. Zephyr. Rosy lilac. Fred Cobbald. Crimson, dark centre.

20 cts. each; \$2.00 per doz.

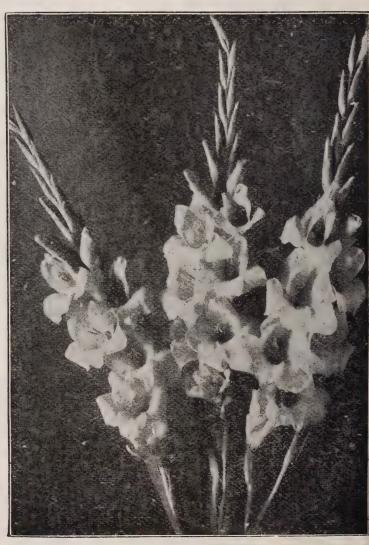

Single Cactus Dahlias.

Alice Lee.

Amy Robsart.
Bertha.
St. Ronans.
Queen Mary.
Martha.

Pink.
Crimson.
Yellow.
Yellow.
Deep scarlet.
Pure white.
Violet.

20 cts. each; \$2.00 per doz.
(For complete list of Dahlias see page 123.)

Gladiolus America

DELPHINIUM ELATUM HYBRIDUM (Perennial Larkspur).

Breck's Choice Hybrids in Six Selected Colors.

These are a superior strain remarkable for the beauty and size of their flowers, embracing, as they do, all the shades of blue, varying in tints from pale lavender to deepest indigo. Each color represents a distinct type in itself; colors as follows:—

No. 1.

Light blue, with white centre. A most distinct type and could be called a self color.

No. 2.

Light blue, with dark centre. Petals of forget-me-not blue, with a dark eye; very striking.

No. 3.

Dark blue, with white centre. A most attractive variety. The white centre very prominent and a striking contrast to the deep blue petals.

No. 4.

Dark blue, with dark centre. Like the first type of light blue, a distinct self color in its own shade of deep blue.

No. 5.

Light blue, with shades of lavender intermixed.

No. 6.

Lavender, interwoven with shades of dark blue.

Strong plants, 25 cts. each; \$2.50 doz.; \$18.00 per 100.

We offer choice mixed seed of the above at pkg. 15 cts.; per oz., \$2.00.

Dear Sirs:

Another year has convinced me of the high grade of Breck's seeds. I had as good a garden as there was in the town, all from Breck's seed, and will say I want no better seed than the firm of Joseph Breck & Sons put out.

A. B. REED, Richmond, Me.

Breck's Delphinium Elatum Hybridum.

Dianthus Laciniatus Punctatus.

Dianthus Laciniatus Punctatus.

(New Dark Shaded Princess Pinks.)

Dianthus Laciniatus Punctatus.

(Light Shaded Princess Pinks.)

These recent introductions in the Dianthus class will be gladly received by all lovers of pinks as a valuable acquisition; the flowers are charming and of extremely peculiar markings.

Pkt. each variety, 25 cts.

Cosmos, Lady Lennox.

The new gigantic orchid-flowering Cosmos. The flowers are very large and full, and the color is a light pink of extraordinary size and beauty.

Pkt. 25 cts.,

Godetia, Dwarf Compact, Crimson Glow.

This splendid new Godetia forms a compact little bush about 9 inches in height, with flowers of an intense crimson color. Pkt. 25 cts.

Godetia, Breck's "Snowflake."

A magnificent variety of this most desirable annual. The plant is completely covered with widely opened flowers of glossy white. We strongly recommend this variety for beds and borders and for growth in shady places. Pkt. 10 cts.

Breck's Superb Strain Gaillardia.

Gaillardia.

Breck's Superb Strain.

This beautiful annual is worthy of more general cultivation, being showy, free flowering and of brilliant coloring—suitable alike for bedding and bouquets. It thrives best in a good light soil and in an open sunny situation, and grows I to 2 feet high with large flowers 2 to 3 inches across. The seed we offer was grown for us by a European specialist, and includes the newest and choicest shades. Mixed colors, pkt. 10 cts.

Nigella Miss Jekyll (Love in a Mist).

gardener to Francis Blake, Esq., Auburndale, Mass.

A splendid variety, giving an abundance of long-stemmed flowers, which are of a clear blue, well set in slender, elegant foliage. One of our most attractive annuals. Pkt. 15 cts.; per oz. \$2.00. (See illustration on page 108.)

SPECIAL PREMIUM ON SEEDS IN PACKETS.

\$1.25 VALUE FOR \$1.00.

Customers ordering Seeds in PACKETS at Catalogue Prices may select Seeds to the value of \$1.25 every \$1.00 sent us in cash; \$2.00 sent us with the order will pay for Seeds in Packets amounting to 50, and so on. Thus you may select 25 cents' worth extra of Seeds in Packets for each \$1.00 sent is offer does not include Seeds in collections, by weight or measure, or anything excepting SEEDS PACKETS.

Nicotiana Sanderæ.

Sunburst Marigold.

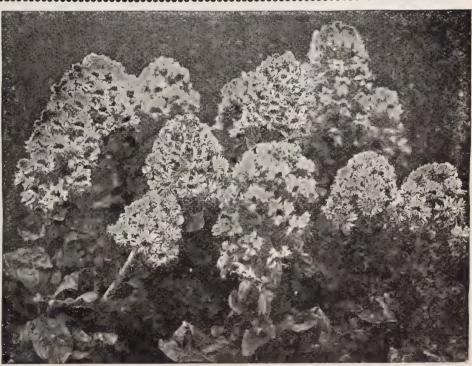

Carmine Tuberose-flowered Nicotiana.

These are the hardy annuals of the century. As a useful and beautiful garden plant they have no equal, and the culture is simplicity itself.

The whole plant is laden with flowers from base to summit—literally ablaze with most handsome, carmine-red blossoms, hundreds of which are produced on a single plant. Per pkt., 10 cts.

Mignonette Machet Yellow Prince.

Plants of perfect machet habit with flowers of a rich canary yellow. A vast improvement on anything before introduced in the way of a Yellow Machet Mignonette. Flowers are large and thick after the style of our already well known Giant Machet. Pkt. 10 cts.

Yellow Prince Machet Mignonette,

Petunia, Canary Bird.

Petunia, Canary Bird.

(P. grandiflora fimbriata aurea.)

This new Petunia is surely destined to rank foremost in the section of fringed Petunias; the plant attains a height of about 14 inches and is of a compact habit of growth. The flowers are of medium size with finely fringed and curled borders, and of a distinct yellow color, which deepens in the throat. Pkt. 25 cts.

New Sweet Pea, "White Spencer."

This grand new variety produces in the greatest profusion flowers of enormous size that are absolutely pure white. The standard is decidedly waved, crinkled and fluted; the wavy wings are folded so as to almost hide the keel. Pkt. 15 cts.

Sweet Peas, Breck's Boston Mixture.

The very best mixture offered at any price. It includes in good proportions over sixty of the choicest kinds, and this year is enhanced in value by the addition of many new and charming shades. Oz. 10 cts.; ½ lb. 25 cts.; lb. 75 cts. (For complete list of Sweet Peas see pages 97, 98.)

Salpiglossis, Breck's Multi-Colored.

The Salpiglossis is a beautiful garden annual. The strain we offer under the name of Multi-Colored is a wonderful improvement over all other varieties of this very desirable plant. The magnificent flowers, large and fun-

nel-shaped, present an extremely pleasing variety of colors in mottled, veined and self-colored forms. They require good, rich soil, and will amply repay in glorious effect good care and liberal treatment. Pkt. 10 cts.

Sweet William, Breck's Improved Auricula Eyed.

The old-fashioned garden flower of which it is difficult to procure a really good strain. Our improved variety is the finest on the market; it is single and produces good trusses of large, round, individual blooms, with smooth edges and rich, well-defined markings, and embraces a wide range of color. Per pkt. 10 cts.; oz. \$1.00.

Stokesia Cyanea.

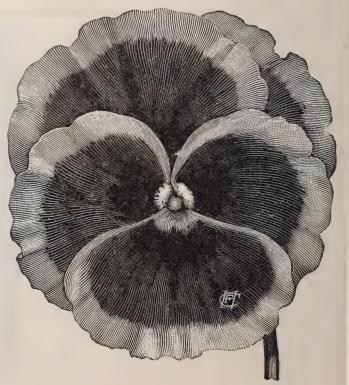

(Corn Flower Aster.)

A beautiful hardy perennial easily grown from seed. The plant grows from 18 to 24 inches high and produces the Centaurealike 4 to 5 inches in diameter lavender blue flowers from early in July until late in October, even after frost has destroyed nearly all other outdoor flowers. It is of easiest culture, succeeding in any open, sunny position. Pkt. 10 cts.

Pansy, Eros.

(Viola tricolor maxima.)

This novelty produces flowers of a deep velvety brown color, with a broad-golden yellow margin. The chief characteristic of this variety is that the back of each blossom has the same broad margin as the front, making it valuable for bedding. Pkt. 25 cts.

Pansy, "Eros,"

Schizanthus Hybridus Grandiflorus

(New Dwarf Large Flowered Schizanthus=Hybrids.)

The most beautiful and rich display of the loveliest orchid-like colors and shades of the well known Schizanthus-Hybrids. Special mixture of red and pink shades. Pkt. 25 cts.

Schizanthus Hybridus Grandiflorus

(New Dwarf Large Flowered Schizanthus-Hybrids.)

Special mixture of all colors and shades. Pkt. 25 cts.

Schizanthus Wisetonensis.

(Butterfly Flower.)

An elegant and free blooming hardy annual with large beautiful flowers of many colors, ranging from white with yellow centre to pink with brown centre. Excellent for pot culture in winter or bedding out in summer. Pkt. 25 cts.

Wallflower, Annual.

(Breck's Perfection Strain.)

This is a great improvement on the Annual Wallflower brought out some years ago, which, although so wonderfully early, was very poor in color. Our grower has this year succeeded in producing four distinct shades of color, namely, Blood Red, Pure Yellow, Cream White and Golden Yellow Dark Budded. The flowers are much larger than the old variety, and if sown in March can be had in bloom the following July. In separate colors, pkt. 25 cts. each. All colors mixed, pkt. 25 cts. each.

Hardy Perennial Phlox.

(Phlox Decussata.)

The Phlox is an old-fashioned favorite which is becom-

ing more popular every year.

It is hardy and does well in all situations. By a selection of varieties they can be had in bloom from July until

Annual Wallflower,

Schizanthus Hybridus Grandiflorus.

the middle of September; or by "cutting back" the plants early in the season, they will bloom throughout September. They will grow on a gravel bank, but do best in a warm, mellow soil, made deep by cultivation. We have selected twelve kinds as the best for general cultivation in this country, feeling sure they will give good satisfaction. They are all clean, distinct flowers, healthy plants and bright colors.

Boule de Feu. Beautiful bright salmon, crimson eye; good spike; very effective.

Coquelicot. Rich orange-scarlet.

Eclaireur. Without doubt the finest Phlox yet produced. Plant very dwarf, of a charming effect; immense panicles, in breadth almost equalling the height of the plant. Enormous carmine flowers, centre rosy salmon, surrounded with a starry wreath of rosy white.

Esperance. Silvery rose, centre white.

General Chanzy. A new sort of extraordinary brilliancy and of large size. One of the finest Phlox in existence. Dwarf habit.

Independence. Large and pure white; extra good.

Le Soleil. Brilliant china-rose; centre bright rose, surrounded with a pale rose tint. Flowers very large and perfect.

Le Feu de Monde. Bright salmon red; late.

Miss Stevenson. Deep pink, conspicuous crimson eye.

Moonlight. Beautiful silvery rose; fine truss and flower.

Ornament. Large flowers, bright pink; very large pink velvet centre.

Richard Wallace. Pure white, rosy crimson eye. 15 cts. each; \$1.50 per doz.

Hardy Annuals (hA.).—This class require no artificial aid, but grow and flower freely in the open air, mature their seeds and die in the same year Before sowing the seeds in the open border, the soil should be thoroughly enriched with fertilizer or stable manure, dug and raked until firm, level and smooth. If possible, the location should be free from shade, although some sorts do

well where they do not have the sun for more than half the day.

Seed should be sown in spring as soon as the ground is dry enough to work freely. After the seed is sown shake over it fine soil sufficient to cover, lighter or heavier, according to its size; a good rule is, say, to cover to twice the depth of the diameter of the seed. Very fine seed, such as *Portulacas*, requires no covering at all, but should be merely pressed into the soil with a piece of board or the palm of the hand. A second sowing ought always to be made in from two to four weeks after the first, in order to provide for a succession, as well as to insure against failure.

When it is desired to sow hardy Annuals and carry them along indoors until they can be planted out for early effect, there is nothing better than shallow boxes, two or three inches deep, filled with sandy loam. Take especial care antil the plants are up and during their early stages of growth to give plenty of air and moisture, and yet not too much water, or they will "damp off." When they are well out of the seed leaf they should be planted in rows in other shallow boxes; or in two-inch pots, setting from three to six plants around the edges. If they begin to crowd one another before the weather is suitable for setting out, a second transplanting, more thinly or into larger pots, may be necessary. When first set out in the garden, or during very dry weather, until well established, they should be watered frequently. Keep down all weeds, and loosen the ground occasionally, so that the plants may receive the full benefit of rains and dews, which will not be the case if the ground is allowed to become hard or crusted.

Half-Hardy Annuals (hhA.).—These, in the latitude of Boston, should not be sown out-doors until about the middle of May. A good rule, followed by a successful gardener, is to sow these, and even some of the tender Annuals at the same time he makes his sowings of cucumbers and melons. With half-hardy Annuals, however, it is generally best to sow them under the same conditions as advised for hardy Annuals in-doors.

Tender Annuals (tA.).—To get strong plants and an early bloom, sow the seed in shallow boxes or pots in March, and place them in a warm greenhouse, or plunge in a moderate hot-bed, shade from the strong sun and water only with a very fine rose. A very light, sandy soil and good drainage are essentials. Be particular that the finer seeds are not covered over deep, but have the soil pressed closely about them. Water frequently, especially if the greenhouse or hot-bed is very warm. When the plants are out of the seed leaf, transplant into shallow boxes or small pots. When sufficiently strong and the weather is suitable, set out in the flower beds, but not before the end of May.

Hardy Biennials (hB.) and Perennials (hP.).—These require the same conditions as hardy Annuals. Those marked with a dagger (†) if sown early, in boxes, as directed for hardy and half-hardy Annuals, will bloom the first year. All, however, may be sown in the open border in August or September; in which case it is a good plan at the commencement of frost to give them a light covering of straw, leaves or

dry litter. When the frost is out of the ground in spring remove the covering, loosen the soil around the plants, and when large enough transplant them to where they are permanently to remain.

Half-Hardy Biennials (hhB.) and Half-Hardy Perennials (hhP.).—These may be sown in the open border as directed for hardy Annuals, but, when practical, it is generally better to start them in-doors, as recommended for half-hardy Annuals.

Tender Biennials (tB.) and Tender Perennials (tP.)-Accord these the same treatment as recommended for tender Annuals.

Those to whom a greenhouse or hot-bed is not available will meet with good success by placing the boxes or pots in the open sunlight in the windows of the dwelling house, and keep the temperature from 65 to 75 degrees during the day and 10 degrees less at night. If the soil was in proper condition at planting time, a slight sprinkling once a week will be sufficient until the plants begin to grow nicely.

Greenhouse Seeds.—Some of these may be sown at almost any season of the year. Leaf mould, or peat, with some fine sand added, is the most suitable soil, and the shallow pots or boxes before recommended can be used. The smaller seeds of greenhouse plants are somewhat difficult to germinate unless extra care be taken with them; they require to be slightly watered occasionally, and sheltered from the hot sun until large enough to transplant. Press the soil firmly down into the pot or box and make perfectly level, so that no unequal settlement takes place through water-The seeds should be sown thinly and covered very lightly with finely sifted spaghnum moss. A pane of glass placed over the pot or box until the little plants get well started is of decided benefit, but care should be taken to air occasionally, when excessive moisture is shown by water globules on the under side of the glass. When the young plants have two leaves they should be transplanted into a similar soil, in other pots or boxes. To do this do not pull them out one by one, but, if in a pot, remove the entire contents and break up gently; if in a box, loosen by running a trowel around the side and take out a mass at a time, thus preserving the little roots which are so essential to their future welfare. After transplanting, keep in a shady part of the greenhouse and water sparingly until established, when they may be removed to the light.

It is well to know that Poppies delight in a rich, sandy loam, that Eschscholtzias will do best in a poor soil; or of Pansies, give them abundance of old manure, the richest earth you can find, plenty of water and partial shade; that you need not be anxious if it is not convenient to carry water for Nasturtiums in a dry time, for their habitat is dry Chili, and they will thrive in a dryer soil and atmosphere than almost any other plant; or that Zinnias like a heavy, cool clay; Sweet Peas a deep, rich soil and plenty of water, while such gross feeders as Roses, Sunflowers, Hollyhocks, Dahlias and Asters cannot be planted in too rich a situation; yet,

"To raise your flowers, various arts combine, Study these well, and fancy's flight decline; If you would have a vivid, vigorous breed Of every kind, examine well the seed: Learn to what elements your plants belong; What is their constitution, weak or strong;

car.-carmine.

Be their physician, careful of their lives, And see that every species daily thrives; These love much air, these on much carth rely These, without constant warmth, accay and die: Supply the wants of each, and they will pay For all your care through each succeeding day."

EXPLANATORY.

Our General List of Flower Seeds, it will be found, is divided into the following groups, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (--) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the first column, following the name, denotes hardiness and duration; the second column, height in feet; the third column, color or predominating colors; the fourth and fifth columns show the price per ounce and packet respectively; the sixth column gives brief descriptions or special notes on culture. To this arrangement and the following abbreviations we have given the most careful attention, and we trust that their simplicity will not only find favor with our customers, but prove valuable to them as a handy reference.

SELECTED LIST OF FLOWER SEEDS

able conditions, give a greater amount of bloom in varied form and color than could be had by planting ten dollars' worth of plants from the greenhouse. "Sow the seed freely. The combined strength of the rising plantlets will break the crust on hard soils; and in the thinning which follows, only strong and promising plants are allowed to remain. Better effects are also often secured when the flowers are in masses, especially if the flowers' are thrown into the bays of heavy shrub borders. "Plants continue to bloom for a longer period if they are not allowed to produce seed. The flowers should be picked, if possible, as

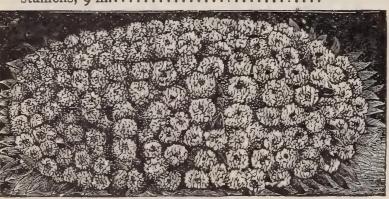

Ageratums.

In many respects this is one of the most desirable summer flowering plants we have. It may be used alone for beds and borders, or planted in connection with geraniums, coleus, cannas, etc. The colors include many

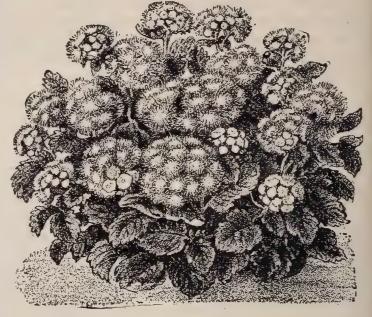

shades of blue as well as white, rose and a pale yellow. The plants grow well almost anywhere, but flower most generously in a deep, rich soil. If the seed is started in a box in the house, or in a hot-bed, in the beginning of April

and transplanted to where they are intended to bloom about the end of May, an abundance of flowers will be produced until hard frost. Seed of all, however, can also be sown outdoors as soon as the ground warms up, excepting the four sorts first named; these are tender perennials and should be sown early to obtain successful flowering the first summer. Seed sown in August will produce plants for winter flowering.

Sweet Alyssum.

Ageratum.

Sweet Alyssum.

The Sweet Alyssum is so well-known and such a general favorite that it is scarcely necessary to call special attention to it here. It is of the easiest culture both indoors and out and is suitable alike for beds and edging in summer or for growing in pots and boxes for winter blooming. It will stand considerable cold in the open ground and may be sown early; it blooms throughout the entire season until destroyed by hard frost. For winter flowering sow the seed in August or September. When bloom begins to fail cut back the plants and they will promptly come into flower again.

Antirrhinum (Snapdragon).

If sown in March or April and set out when strong enough, these plants make a display that is unequalled for duration and brilliancy. The tall sorts are fine in borders. The dwarf make splendid beds. They prefer a light, warm, but well enriched soil. Seed sown outdoors in May will produce satisfactory results. It is not unusual, however, when very strong plants are desired, to sow seed in August or September and cover the plants with a mulch on the approach of cold weather. Plants raised from autumn sown seed may be grown on in pots and will produce an immense quantity of bloom throughout a very long season. If grown indoors they require about the same temperature and treatment as carnations. Most of the varieties are fairly hardy and will live through a New England winter if well covered. Antirrhinum is a specialty with us, and we have done much to improve the plants in height, habit, flower and color. We consider our strains superior to any obtainable in size and brilliancy of flowers.

Aquilegia (Columbine).

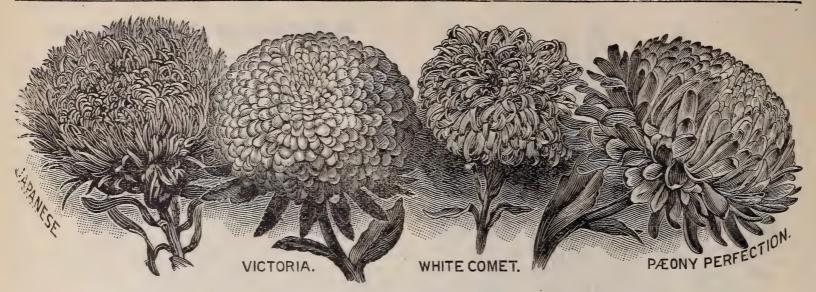

This family is one of the most beautiful and popular among hardy perennials. The different varieties present an unusual wealth of color and form. They are all of elegant habit and bloom throughout a very long season. For growing in borders or filling up bays in shrubbery they are unsurpassed. Seed sown in pans or boxes and placed in a cold frame, or in the house, in March will frequently produce bloom the same year. It is best, however, to sow seed out of doors when ground warms up. Any ordinary garden soil is suitable for their growth, but a light sandy soil is preferable. The flowers are all fragrant.

Breck's Special Asters.

These rank among the most popular and satisfactory flowers that are suitable alike for the amateur and professional gardener to raise from seed, and a very long season of bloom may be had—from July until end of September—by successive sowings. When the Aster was introduced from China, about the year 1730, it was of the single flowered type and there were only three colors. Now there are nearly 300 varieties to choose from. The most desirable sorts are Comet, Branching, Truffaut's Perfection, Victoria, Washington, Mignon and Jewel. There is a very great difference in the quality of the flowers and most of the cheap Aster seed offered is sure to disappoint those who sow it. The seed we sell is in every instance raised especially for us by the leading Aster specialists and has been brought to the highest possible state of perfection by selection and breeding.

The demand for Breck's Asters from the leading commercial and private growers all over the United States, however, warrants the labor and expense incurred, and is a sufficient recommendation of their superiority. We welcome a comparison of the product of Breck's seeds with that of the most highly lauded. Our prices speak for themselves.

Cultivation.—Those who wish Asters in flower throughout the season should make the first sowing about the middle of February and every two weeks thereafter until the middle of June. Sow in fine soil, and cover lightly in shallow boxes, which should be set in the greenhouse or a sunny window. Keep moderately moist until the plants are well up, then transplant, either into other shallow boxes three inches apart or into small pots.

Calendula (Pot Marigold).

"The Marygold of Shakespeare's time." One of the most popular and easily grown hardy annuals. The plants are strong, free flowering and do well in almost any situation, although they prefer a warm, loose soil. They bloom the whole season, particularly if the flowers are picked. It is usual to sow the seeds where the plants are intended to stand, but they will bear transplanting. Calendula make good pot plants and flower freely during the winter.

Calendula (Pot Marigold).

Gentlemen:

I was very much pleased with the seed you sent me this year, so I am going to get my seed from you again next year.

Yours truly,

WILLIAM NAGLE, Wawbeek, N. Y.

Candytuft (Iberis).

Very showy, branching annual plants that produce flowers which embrace nearly all shades of red, purple and white. The seed may be sown any time indoors and the plants set out where wanted to bloom, when the weather is suitable. A succession of sowings lengthens the season of bloom. Seed sown outdoors in spring will produce flowers from July until September. Is very effective for beds, borders, etc., and useful for pot culture during winter. Grown extensively by florists for cutting.

Centaurea (Cornflower).

C. Cyanus is the favorite Bachelor's Button, or Ragged Sailor. This class is of the earliest culture and produces an abundance of bright colored and beautifully formed flowers throughout a very long season. The strain of seed we offer is a very much improved one and embraces everything desired in color and form. Sow seed early outdoors and thin out the plants to 6 or 8 inches apart, or in boxes in the house, and transplant when large enough.

Centaurea (Perennial Flowering).

These differ from the *Cyanus* in their stronger growth, greener foliage and larger, sweeter flowers. To obtain bloom the first season, seed should be sown early indoors. Any ordinary garden soil will answer, but a warm light one gives best results.

Centaurea Silver-Leaf (Dusty Miller).

Beautifully cut silvery leaves. These plants are much used for bedding and edging, and thrive almost anywhere. A little care is necessary in watering young seedlings, as they are liable to damp off.

Chrysanthemums, Annual or Summer Flowering.

All the summer flowering chrysanthemums are very effective and showy plants for beds and borders, besides affording an immense material for cutting. The flowers are very beautiful both in form and coloring and are produced abundantly all summer. Sow seed where the plants are wanted to bloom and thin out to 9 inches apart; or stronger, earlier flowering plants can be had by sowing early in a cold frame or in a box in the house, and transplanting when large enough.

Cockscomb (Celosia).

The Cristata sorts have become very popular for bedding; their beautifully formed, highly colored flowers being very attractive and effective. The Plumosa class is splendid in both foliage and flower, very suitable for vases, borders, etc. The "Ostrich Feather" produces large plumes, beautifully curved and curled.

Seed should be sown in a hotbed in March or April, and transplanted to pots when large enough. The size of the combs of the Cristata are greatly increased by several transplantings before the combs form.

Coreopsis (Calliopsis).

A genus of very showy annual and perennial plants that are invaluable for garden decoration and cutting. They enhance the color of the garden by their wealth of bright yellow flowers, which is strengthened in some sorts by disks of rich crimson, maroon and various shades of brown. All are of the easiest culture. The seed may be sown where the plants are wanted to bloom, or they may be transplanted. The perennials are all hardy border plants and well worthy a place in every garden. The flowers last well when cut.

Cosmos (Cosmea).

We especially recommend Breck's Massachusetts grown Cosmos as the most desirable and most satisfactory for growing in New England. Under ordinary cultivation they will begin to bloom in July and continue up to frost. The flowers are of good size and delicate shades. Sow seeds of Breck's Early Flowering varieties in open ground, in light warm soil,

Breck's Early Flowering Cosmes.

early in May and cover not more than half an inch deep. The seed germinates in about ten days. The Cosmos must have the full sunshine, as it will not succeed in shade or in low damp ground. High-grade fertilizer, rich in potash, such as *Breck's Lawn and Garden Dressing*, gives best results. Seeds of the later varieties should be sown early in March in a hot-bed or box in the house. When plants are 2 inches high transplant into 2-inch pots, when well established repot

into 4-inch pots and water moderately. Transplant to open ground in June.

Eschscholtzia (California Poppy).

Large showy flowers in shades of yellow, orange, rose and white. The foliage is bluish green and very attractive. For a display in beds and borders as well as for cutting, these flowers are very satisfactory. The plants are fairly hardy and seed may be sown quite early where wanted to bloom. They are somewhat impatient of transplanting.

Breck's Silver Medal Hollyhocks (Althæa Rosea).

The fungi disease, that for a time made Hollyhocks unpopular, has to a great extent rations, and saying seed from them.

been overcome by propagating healthy plants through several generations, and saving seed from them only. It is still advisable, however, to spray the plants once or twice during spring, and again before coming into bloom, with Bordeaux Mixture.

Breck's Silver Medal strain of seed is superior to any in vigor of growth, texture, quantity and range of color. Although Hollyhocks are perennials, young plants produce larger flowers and fresher colors than old ones, therefore we recommend the sowing of seed every year. Plants will flower the same year from seed sown in the greenhouse in January and grown on in pots until time for setting outdoors. Sowings can also be made from May to August for the following year's flowering; when the plants are large enough, transplant to a rich, cool soil, giving each at least a foot of space for growth. The permanent border or location in which they are set should be dug deep and well manured. Abundance of water should be supplied throughout the entire season of growth.

Strong Flowering Plants, 20 cts. each, \$2.00 per doz., \$15.00 per 100.

Larkspur (Delphinium).

Larkspurs thrive in any good garden soil, but are of much better color and texture of flower when grown in a deep, rich, sandy loam. Both the annual and perennial sorts are easily raised from seed, but as it is somewhat slow in germinating fall or very early spring sowing is recommended. The perennial sorts are also propagated by cuttings and divisions of roots. Seedlings should be given plenty of room by transplanting; they may be set out where they are intended to flower any time in May or June. The tall sorts are very suitable for setting among shrubbery and in borders; the dwarfer kinds are effective for beds. Two crops of flowers can be had each season by cutting away the flower stems of the first crop as soon as the flowers have faded.

Marigolds (Tagetes). (See also Calendula.)

For adding shades of yellow to the garden effect in late summer and autumn the African and French Marigolds are unsurpassed. They make nice beds when grown together, the French sorts being used for edging; both sorts are also very desirable for borders or for brightening up any bare or colorless spots. Sowings should not be made outdoors until danger from frost is passed.

Mignonette (Reseda Odorata).

Well known, fragrant favorites, delightful for working into bouquets. For winter flowering seed should be sown in July or August. All the sorts we offer are very fine, but especial attention is called to Breck's Giant Machet and Golden Machet as being particularly good and the most desirable for pot culture. A succession of bloom during both summer and winter may be had by repeated sowings.

Breck's Rainbow Nasturtiums (Tropæolum).

Many people are disappointed in the Nasturtiums they raise. A great variety of soft and pleasing colors were ooked for, but only old hard reds and yellows were produced. This result is chiefly due to importing cheap seeds. The seed we offer is a selected strain and mixed in proper proportions so that our customers may be assured of paving all the effective shades of pink, rose, scarlet, crimson, brick, claret, chocolate, brown, garnet, orange, primrose, rellow and white. Seed may be planted, one inch deep, early in April, where wanted to bloom or in any convenient place, and the plants when large enough transplanted to the beds, etc.

Pansy (Viola Tricolor).

The Pansy is one of our specialties. For size and form of vers, variety and brilliancy of colors and markings, there is hing approaches those we offer. Breck's Boston Prize is an erican strain and is superior to any European mixture. The rers are immensely large and wonderful in their coloring.

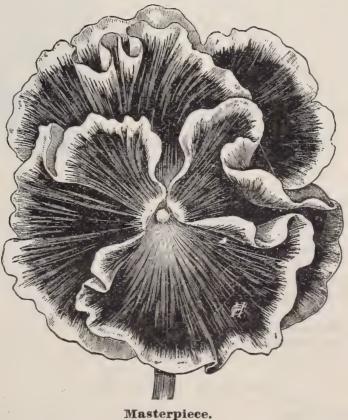

The English and Scotch Prize Pansies are remarkably fine;

y are from the finest collections in these countries.

Our Trimardeau Pansies embrace the cream of that type, and give perfect satisfaction in every particular.

Pansies repay good treatment in profusion and size and brightof flower, as well as in large, handsome foliage. They delight cool, moist soil and a situation that protects them from cutting is as well as the midday sun. To obtain large flowers early in ng, seed should be sown in July or August and the plants ected with a frame during winter. Spring sown seed does well, although the flowers produced are not so large.

POPPY (Papaver).

These beautiful varieties of poppies are so well known that it is needless to say anything in their favor. Quite a number of the perennial varieties bloom the first year from seed if sown early. The Shirley is fine for cutting, having long stems. The new strain we offer produces softer and more pleasing shades than we have offered hitherto.

Sowings made in August, and again several times during spring, will produce a continuous bloom from early summer until frost. The seed should be sown where the plants are wanted to bloom, as Poppies do not take kindly to transplanting. Cover only very lightly, and firm the soil with a flat board. When large enough thin out the plants to about a foot apart. A sandy loam and early spring sowings produce the best flowers.

Sweet Peas (Lathyrus odoratus).

We have endeavored to simplify the selecting of Sweet Peas by reducing our list of varieties, and by specifying some sorts that, in the opinion of leading specialists, are most representative and desirable for persons who desire grow the named kinds.

Sweet Peas.

Seeds should be sown as early as possible, in drills six inches deep. At the time of sowing cover only with one inch of soil and fill in the drill as the young plants grow, taking care not to cover the top of the plants. A deep, rich soil and a sunny situation is best.

Breck's Boston Mixture. The very best mixture offered at any price. It includes in good proportions over sixty of the choicest kinds. Oz. 10 cts.; 1/4 lb. 25 cts.; lb. 75 cts.

Sweet Pea. Gladys Unwin. Pale rosy pink. Very large, usually four blossoms to a stem. Pkt. 10 cts.; oz. 20 cts.

THE BEST NINE SWEET PEAS.

Dorothy Eckford, Blanche Ferry, Gorgeous, Lady Grisel Hamilton, Lottie Eckford, Lovely, Salopian, Navy Blue, Othello.

Sunflowers (Helianthus).

Most Sunflowers being of coarse growth are not suited for beds or ornamental locations near the house, but very desirable for growing in shrubberies, against fences, or making backgrounds for, and mixing in borders. They well in any kind of land, from light sandy to swampy; they, however, do not grow to perfection if heavily shaded. So may be sown where the plants are wanted, or indoors in March and April, and transplanted when weather is suited Argophyllus has beautiful silvery foliage. Californicus, large double orange colored flowers. Cucumerifolius is branching habit and covered with small dark centregated flowers. Early Double Flowered produces flowers from until frost. Folia aurea variegata and nana variegata have beautiful yellow splashed foliage. The multiflorus showy perennial varieties. Golden Bouquet and Stella are particularly desirable on acount of their early bloom qualities. Lenticularis of graceful branching habit.

Breck's Zinnias.

Breck's Defiance is without exception the finest strain of large Double Zinnias offered. The plants are of vous branching habit and produce freely immense double flowers in an endless variety of splendid colors; no large old hard red, but innumerable delicate and velvety shades. The separate colors are saved from the same collection which is admitted to be the finest in Europe. Seed sown early in heat will begin to bloom in June and con until frost, or seed may be sown outdoors where the plants are intended to bloom.

GENERAL LIST OF FLOWER SEEDS

EXPLANATION AND KEY TO ABBREVIATIONS

Our General List of Flower Seeds, it will be found, is divided into the following groups, viz.: Annuals, Perennials and Biennials; Climbers; Greenhouse Plants; Everlastings; Ornamental Grasses, etc. The botanical and common names are arranged in alphabetical order, and a very complete index will be found in front of book. The dash (—) designates the repetition of the name above it as applying to the variety to which the dash is prefixed; the first column, following the name, denotes hardiness and duration; the second column, height in feet; the third column, color or predominating colors; the fourth and fifth columns show the price per ounce and packet respectively; the sixth column gives brief descriptions or special notes on culture.

hA designates Hardy Annuals—Lasting but one year.

hhA "Half Hardy Annuals—Lasting but one year.

tA "Tender Annuals—Lasting but one year.

hB "Hardy Biennials—Lasting two years.

hhB "Half Hardy Biennials—Require protection during winter. winter.
Hardy Perennials—Lasting three or more years. hP

hhP designates Half Hardy Perennials - Require protection

during winter.

Tender Perennials—Lasting three or more years, but require greenhouse protection during winter.

Biennials or Perennials that if sown early will

bloom the first year. Trailing Habit.

Trai. Var. 66 Various.

The abbreviations of colors are-

scar.—scarlet. strip.—striped. ver.—vermilion. blk.-black. lav.—lavender. car.-carmine. pur.—purple. var.—variegated. crim.—crimson. sul.—sulphur. br.-brown tri.-tricolor.

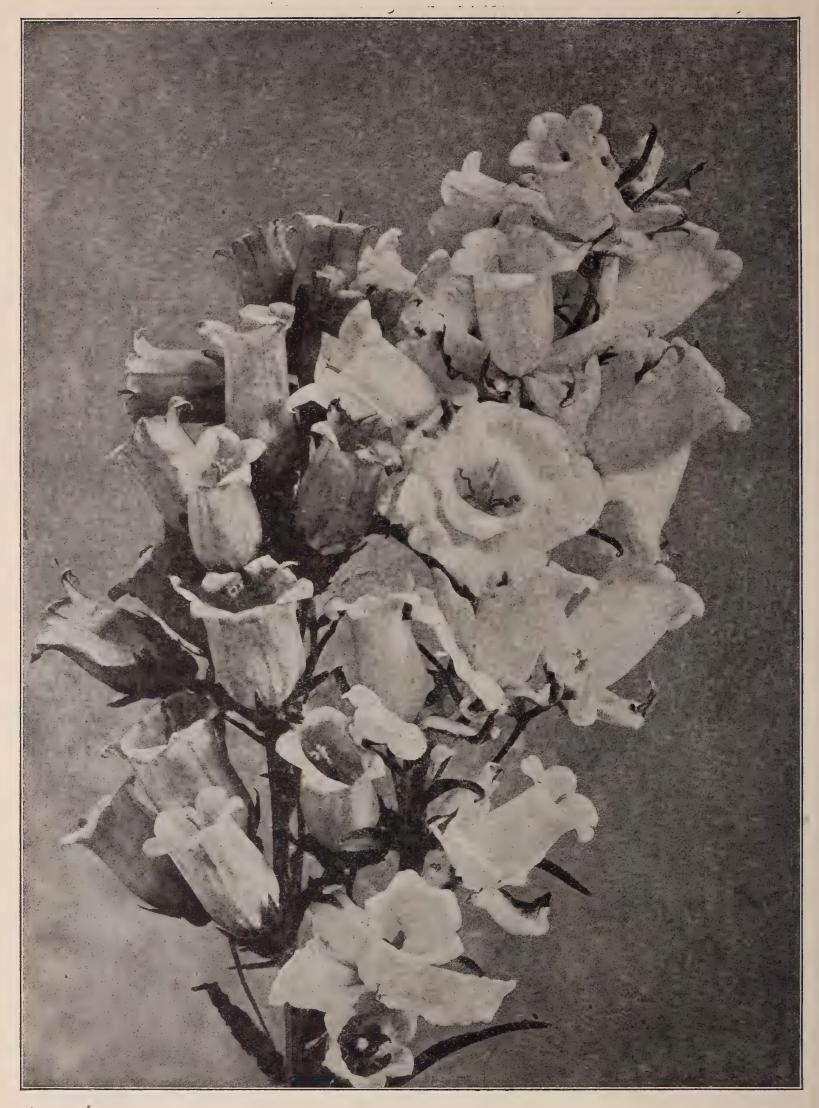

In some instances when the flower is of two colors, these are indicated by the initial letters only,—for example, b. & w.—blue and white; s. & y.—scarlet and yellow; w. & p.—white and pink.

Breck's Superb is the finest strain in existence; vigor of plants, size, substance and variety of delicate shades of flowers are its features. Seed should be sown in light soil, but for the final potting a richer soil is necessary, consisting of two parts loam to one each of well-decayed manure and leaf mould. They require to be well ventilated, well watered and slightly shaded throughout the summer. Beautiful violet-like flowers. Valuable for pots and borders. Fine for bouquets. Tender evergreen plants, suitable for pot culture or planting out. Handsome single flowers and glossy foliage.

The flower seeds purchased of you last year gave me most excellent results. My garden was the admiration of the entire neighborhood, and I believe you will see quite an increase of flower seed orders from this district for next MRS. D. W. KRINBILL, Rochester, N. Yours truly, season.

Breck's Collections of Flower Seeds.

COLLECTION "A," price 25 cts., contains one packet each of Mignonette; Alyssum, white; Sweet Peas, fine

mixed; Phlox Drummondii, fine mixed; Portulaca, fine mixed; Chinese Pink, fine mixed.

COLLECTION "B," price 50 cts., contains the varieties in Collection "A," with the following in addition: Nasturtium, Tom Thumb, fine mixed; Candytuft, finest mixed; Aster, German, fine mixed; Pansy, finest mixed; Eschscholtzia, fine mixed; Morning Glory, fine mixed.

COLLECTION "C," price 75 cts., contains the varieties in Collections "A" and "B," with the following in addition: Coreopsis, fine mixed; Balsam, fine mixed; Zinnia, fine mixed; Mourning Bride, fine mixed; Petunia, finest mixed; Calendula, "Meteor," yellow.

COLLECTION "D," price \$1.00, contains the varieties in Collections "A," "B" and "C," with the following in addition: Tall Nasturtium, fine mixed; Marigold, French, striped; Larkspur, dwarf Rocket; Poppy, double mixed; Convolvulus, dwarf mixed; Chrysanthemum, fine mixed; Antirrhinum, finest mixed.

COLLECTION "E." This assortment produces a fine effect in the garden and all the sorts are suitable for bouquets. Price 50 cts. Abronia, Ageratum, Amaranthus Bicolor, Aquilegia, Aster Chrysanthemum-flowered, Calliopsis, Col-

linsia, Dianthus Chinensis, Godetia, Mignonette, Phlox Drummondii, Zinnia.

Collection "F." The following kinds are specially suitable for growing in vases or hanging baskets. Price 25 cts. Alyssum Maritimum, Convolvulus Mauritanicus, Dwarf Nasturtiums, Lobb's Nasturtiums, Lobelia Gracilis, Mimulus Moschatus.

Wild Garden Seeds.

Any one who has cultivated flowers in neatly laid out beds or carefully planted ribbon borders is aware of the amount of labor and constant attention necessary to produce the desired effect. To those who cannot give this care, we offer "Wild Garden Seeds," a mixture of over one hundred varieties of hardy flower seeds. No one who has not seen such a bed can form an idea of its possibilities, the different seasons of bloom insuring something new almost every day. Half-oz. packets, 20 cts.

BULBS and PLANTS

ACHIMENES. Free flowering plants of easy cultivation. The bulbs should be potted early in a mixture of loam and leaf mould. Keep warm and water carefully. Assorted colors, 5 cents each; 50 cts. doz. AGAPANTHUS UMBELLATUS (African Lily). Blue, fine for

tubs, pots, etc. 35 cts. each.

—Umbellatus albus. White, 35 cents each.

AMARYLLIS. Lovely lily-like plants that produce flowers in almost every shade of color, ranging from pure white to deep crimson.

Atamasco. Pink and white. Showy for borders. 15 cents each; \$1.50 per dozen.

-Belladonna major. Rosy pink, fragrant, 15 cents each.
-Crispa. Deep pink. 25 cents each.

-Defiance. Carmine with white stripes. 50 cents each.
-Equestre. The flowers measure five or more inches across, and are bright, sparkling orange-red, with a green and white star at the centre. 50 cents each; \$5.00 per dozen.

Formosissima (Jacobean Lily). Blooms freely out of doors; flow-

ers deep velvety crimson. 15 cents each; \$1.75 per dozen.

-Hippeastrum Hybrids. A very fine new race of Amaryllis, being superior in size, form and colorings to previous introductions. 50

cents each; \$5.00 per dozen.

Johnsonii. Large crimson and white flowers. 40 cts. ea.; \$4.00 doz. -Lutea (Sternbergia). Showy yellow, autumn flowering variety. 10

cents each; \$1.00 per dozen.

Vallotta purpurea. Crimson-scarlet flowers, borne in clusters of five or six on a long stem. A fine sort for pot culture. 3c cents each; \$3.25 per dozen.

HALLI (The Hardy Amaryllis). Produces in early summer strong stems about eighteen inches long on which are borne large clusters of beautiful rose-colored flowers. The bulbs are perfectly hardy, and when planted in the border require no protection during winter.

Caladium.

Amaryllis Extra strong bulbs, 50 cents each.

APIOS TUBEROSA. A pretty, hardy native climber. Flowers resemble the popular Wistaria; very fragrant. 10

cents each; \$1.00 per dozen.

Tuberous Rooted. These are desirable plants for bedding. BEGONIA. flowers are not destroyed by rain storms, but seem to shine more brilliant after every shower. The colors are varied and beautiful. Our bulbs are from the same source as our seed and are superior. Single flowered sorts, Red, Crimson, Scarlet, Rose, Pink, White, Yellow, Gold and Bronze, Striped and Flaked. 5 cents each; 50 cents per dozen; \$3.75 per hundred.

Single Flowered. Mixed colors, 4 cents each; 40 cents per doz.; \$3.00 per 100.

—Double Flowered Sorts. Same color as the single kind. 10 cents ea.; \$1.00 doz.

—Double Flowered Mixed. 8 cents each; 85 cents per dozen.

BESSERA ELEGANS (Coral Drop). Bright scarlet flowers, borne on stems about two feet high. Will bloom from shortly after planting until frost. 5 cents

each; 50 cents per dozen.

CALADIUM ESCULENTUM. Beautiful ornamental foliage plant. The leaves are of immense size, light green with darker veins. Will grow in any good garden soil, to a height of five feet. Dry bulbs according to size, 10, 15 and 20 cents each; \$1.00 to \$2.00 per dozen. Growing plants from pots, 20 and 25 cents each; \$2.00 to \$3.00 per dozen. Special Offer No. 3 only applies to Caladiums.

CALLA LILIES. White. 20 cents each; \$2.00 per dozen.

—Little Gem. 20 cents each; \$2.00 per dozen.

CINNAMON VINE. Hardy climber, shining green foliage, fragrant white flowers. 5 cents each; 50 cents per doz.

CRINUM. Amaryllis-like bulbous plants, suitable for pot or open ground culture.

Dright rocc. 25 cents each

-Kirkii. Large white, purple-striped flower borne on dark purple-colored stems, two feet high. 30 cents each.

—Ornatum. Delicate blush with a pink stripe through the centre. Very fragrant. 35 cents each.

CYCLAMEN. Suitable for pot culture only. Plant the bulbs in a light rich soil, and water sparingly till started.

—Persicum giganteum. Mixed colors or white and shades of red. 20 cents each; \$2.00 per dozen. Started plants

in pots 50 cents to \$1.00 each.

CYCLOBOTHRA FLAVIA. This golden gem is of great beauty and easily grown; the habit of plant and bloom is similar to Bessera; the color is clear golden-yellow, with intense black spots on each petal. 8 cts. each; 80 cts. doz. CACTUS. These plants require absolutely no care. They grow for months in the house or garden without watering, and increase in value yearly. Their flowers are of exquisite beauty and fragrance, and their curious forms render them exceedingly interesting. In winter they require scarcely any water. Six fine plants for \$1.25.

CHRYSANTHEMUMS. Hardy Pompon. Suitable for garden cultivation. The flowers are smaller than the popular Japanese sorts, but the form is perfect and the range of color much greater than hitherto obtainable: Ada, yellow and bronze; Agalia, lemon-yellow; Blushing Beauty, white, edged pink; Canovia, bronze-yellow; Eagle d'Or, yellow; Ivanhoe, pink; Jack, deep pink; Marconi, pure white; Pet, pink and white; Rhoda, rose; Santiago, bronze, tipped yellow; St. Crousse, deep brick red.

15 cents each; \$1.50 per dozen.

CHRYSANTHEMUMS—Continued.

CHRYSANTHEMUMS. This list is the cream of the large flowering chrysanthemums. The stock we offer is raised by one of the most successful growers in the country and is free from disease. If what you want is not included in

the sorts here named, send us your list. We can furnish every desirable variety.

WHITES, Early.—Polly Rose, Bergeman, Ivory, Willow Brook. Medium Season.—Timothy Eaton, White Bonnaffon, Western King, Mirza. Late.—Yanoma, Merry Christmas, Mrs. Jerome Jones.

YELLOWS, Early.—Robert Halliday, Harry Hurreld. Medium Season.—Pennsylvania, Major Bonnaffon. Late.—H. W. Reiman, W. H. Lincoln.
PINK, Early.—Glory Pacific, Pink Ivory. Medium Season.—Mrs. Perrin, Francis B. Hayes. Late.— S. T. Murdock, Maud Dean.

RED, Early. — Mons. B. Gerond. Medium. — John Shrimpton. Late. — Cullingfordii, BRONZE, Kate Broomhead. 15 cts. each; \$1.50 per doz.

CARNATIONS. For blooming in the garden we can furnish three colors that will flower if set out after the middle of

May, from July until frost.

—Scarlet, Crimson, White. Extra strong plants from pots. 25 cts. each; \$2.50 per doz.

—Mound Pinks. These old favorites, if given enough room, form a pretty mound of bluish-green foliage and

produce freely beautiful, blush-pink, fragrant flowers. 20 cts. each; \$2.00 per doz.

Margaret. This is the new class that blooms from seed in about four months. About 90 per cent of the flowers are double. All very sweet scented and they embrace a great variety of delicate shades. They are exceedingly useful for cutting. Strong plants, 15 cts. each; \$1.50 per doz.

FLOWERING CANNAS.

The Cannas here offered are all started plants, not dry bulbs — that will come into bloom shortly after being set out.

ITALIAN, OR ORCHID-FLOWERED VARIETIES.

Austria. 4 ft.; foliage, large green; flowers, pure yellow. Alemannia. 5 ft.; outer petals scarlet, with yellow border; inside, red.

Italia. 5 ft.; yellow, blotched with orange-scarlet; yellow border.

Victor Hugo. 4 ft.; foliage, dark red; flowers, scarlet.

Price 15 cts. each; \$1.50 per doz., except as noted. Cannas are not subject to any of our Special Offers.

Cannas.

Single, Double and Cactus Dahlias.

GLOXINIA BULBS.

Our stock of these is very choice. The bulbs should be potted in the spring in light sandy loam, and they will commence growing and blooming at once. In the fall, dry them and store in a warm place through winter. Strong flowering bulbs, in separate colors,

per bulb, 10 cts.; \$1.00 per doz.

GLADIOLI. To keep up a continuous bloom from June until frost, plantings should be made every two weeks. Plant six inches apart in rows, four inches deep. After frost lift and cut off near the bulb, and store in any dry place where the frost

will not reach them.

AUGUSTA. Pure white, blue anthers; each 10 cts.; doz. \$1.00;

-BRANCHLEYENSIS. Vermilion scarlet; each 3 cts.; doz. 30

cts.; 100 \$2.00. -BRECK'S BOSTON PRIZE STRAIN. The finest mixture procurable, representing almost every shade known in Gladioli, from purest white, yellow, pink, purple. Bulbs are first size and will give satisfaction. 30 cts. doz.; \$2.25 per 100.

-GROFF'S HYBRIDS. A new strain, largely hybrids of Nancieanus, Lemoinei, and Childsii. Very vigorous growth, largest size blooms, nearly all scarlet shades. 35 cts. doz.; \$2.50 per 100.

-Childsii. Originated by Mr. Lemoine. A perfectly distinct

class. Choicest mixture, 35 cts. doz.; \$2.75 per 100.

-Lemoinei. Richly blended shades of yellow, red, brown, blue, green, etc. 40 cts. doz.; \$3.00 per 100.

-MAY. White flaked crimson; each 5 cts.; doz. 50 cts.; 100 \$3.00. Shakespeare. White with pale rose; good forcing variety. Each 10 cts.; doz. \$1.00; 100 \$7.50.

Unnamed Gladioli, Separate Colors.

Scarlet Red Shades. 25 cts. doz.; \$1.50 per 100. Pink and Rose Shades. 30 cts. doz.; \$2.00 per 100. White Shades. 30 cts. doz.; \$2.50 per 100. Yellow Shades. 85 cts. doz.; \$6.00 per 100. Striped and Variegated. 40 cts. doz.; \$3.00 per 100.

The increasing demand for these beautiful fall blooming plants has stimulated growers to produce improvement in size, form and colors. We offer the following named sorts which embrace some of the old standard varieties as well as the newer approved kinds. Planting should not be made until danger of frost is past in May. The bulbs should be lifted as soon as foliage is injured by first frost in fall, dried, packed in sand and stored during winter in a warm place.

Show and Fancy Dahlias.

Glowing Coal. Scarlet. Black Diamond. Dark maroon. Emily. Blush pink and white. Lucy Fawcet. Lemon, splashed brown. Bredowillard. Fine clear yellow. Guinnea. Very fine crimson. White, fine. Purity. Striped Banner. Scarlet and white. Arabella. Pale primrose, shaded old gold. Norma. Orange. Miss Browning. Yellow, tipped white. David Johnson. Salmon, shaded rose.

15 cts. each; \$1.50 doz.

Pompon Dahlias.

Admiration. Maroon and white. Sunshine. Fine scarlet. Snowclad. Fine pure white.

Alewine. White, tinged pink; fine.

Golden Gem. Fine free flowering, yellow. Madge. Light crimson, tipped white. Arthur West. Very fine crimson. Pursuit. Dark maroon, shaded carmine. Little Naiad. White, tipped amaranth.

15 cts. each; \$1.50 doz.

Decorative Dahlias.

Oban. Rosy lavender, overlaid with delicate

silvery fawn.

Frank L. Bassett. Bright royal purple, rather dwarf.

Henry Patrick. Pure white. Africa. Fine large crimson maroon.

Crimson King. Fine crimson. Blue Oban. Bluish lilac, fine.

Beauty of Brentwood. Rosy crimson, shaded carmine.

Sylvia. Very fine blush pink. Lyndhurst. Bright scarlet.

Maid of Kent. Crimson and white. Mrs. Chas. Turner. Fine large yellow. Admiral Dewey. Violet maroon.

15 cts. each; \$1.50 doz.

Single Dahlias.

Snow Queen. Best pure white.
Gold Standard. Pure deep yellow. Wildfire. Fine bright scarlet.

Ami Barillett. Crimson, foliage copper colored.

Pansy. Violet.

Countess of Anhault. Flesh, white centre. Picturata. Pink, maroon and garnet. Lady Whitehead. Fine pink.

Demon. Very dark maroon, fine. White and violet crimson; large and Mars.

very fine. 20 cts. each...

Very fine large white, sometimes

semi-double. 35 cts. each.

President Viger. (Colorette.) Crimson, hav-

ing ring of small white petals round the centre, very fine. 25 cts. each.

15 cts. each; \$1.50 dozen, except where noted.

Lilium Auratum.

IRIS GERMANICA. The German Iris bloom earlier than the Kæmpferi. They embrace many charming combinations of colors, and are very fragrant. Separate colors blue, white, yellow. \$1.50 per doz. Fine mixture, \$1.00 per doz.

Kæmpferi. See Herbaceous Plants.

- LILIES. Lilium Auratum. Golden Banded Lily of Japan. Immense white flowers, each petal marked with a wide gold band and spotted with maroon. Each, 20 cts.; per doz., \$2.00.
- -Lancifolium Rubrum. White with rich crimson spots. Each, 15 cts.; per doz., \$1.50.
- -- Roseum. White stained and spotted rose. Each, 15 cts.; per doz., \$1.50.
- -- Melpomene. White, suffused with darkest crimson. Each, 20 cts.; per doz., \$2.00
- -Album. Large, pure white flowers. Each, 20 cts.; per doz., \$2.00.
- MILLA Biflora. Beautiful white, waxy flowers with pale lemon anthers. Deliciously fragrant. Plant outdoors in May and take up bulbs in fall like Gladioli. Each, 5 cts.; per doz., 50 cts.; per 100, \$3.75.
- MADEIRA VINE. A beautiful, rapid-growing climber, bearing in profusion very fragrant white flowers. Each, 5 cts.; per doz., 50 cts.
- MONTBRETIA Crocosmiæflora. Very large flowers of fine shape. Base of flowers is bright orange, sprinkled with purple spots, arranged like Tigridia. Each, 5 cts.; per doz., 50 cts.
- Germanica. A decided acquisition; grows 3 feet high, and of sturdy branching habit. The flowers measure 3 inches across; color glowing scarlet shaded with orange, the reverse side being blood red. Each, 20 cts.; per doz., \$2.00.
- SMILAX. A beautiful climber for greenhouse or window culture. Plants from two and a half inch pots. 15 cts. each; \$1.50 per doz.
- TIGRIDIA (Shell Flower). Beautiful large, shell-like flowers, produced from July until frost. They require similar treatment to the dahlia.
- —Conchiflora. Orange and crimson spots. 5 cts. each; 50 cts. per doz.
- —Grandiflora Alba. White flowers spotted with maroon and rose. 5 cts. each; 50 cts. per doz.
- ——Crimson. 5 cts. each; 50 cts. per doz.
- —Pavonia. Red with crimson spots. 5 cts. each; 50 cts. per doz.
- TUBEROSES. These are universal favorites and very easily grown. Before potting, remove the small offsets. Use rich loam and start in hot bed or in house. Do not set out until all danger from frost is past.
- -Excelsior Double Pearl. 5 cts. each; 25 cts. per doz.; \$1.75 per 100.
- -Tall, Double. 5 cts. each; 25 cts. per doz.; \$1.75 per hundred.

The seeds and plants came on time and the plants were A 1. The seeds came up extra well. For all, of which I am yours with thanks.

ELSIE Y. CLOSSON, Franklin, N. H.

WATER LILIES AND AQUATIC PLANTS.

These have become a permanent class of decorative plants and as indispensable as hardy perennials. The ease with which they are cultivated and the certainty of grand results the first season after planting and the continuous display until the close of the season place them foremost on the list of flowering plants. The magnificent flowersof large dimensions—embracing all shades of color, are delicately fragrant. Some varieties open their flowers during the day, others at night; they are most interesting, fascinating and popular.

To obtain best results they should be planted in ponds, natural or artificial; in the latter they are best grown in large boxes as they require plenty of rich soil and ample space for leafage. Where space is limited very satisfactory results may be obtained by using tubs, planting the moderate growers such as Nymphæa odorata and its varieties, N. Laydekeri and varieties.

Hardy Nymphæas.

These are all equally as hardy as our native Pond Lily and may be planted as soon as vegetation commences in spring and any time during the season until the end of August.

- -Alba. The hardy white English pond lily. 50 cts. each.
 - Gladstoniana. A giant among water lilies, white. 50 cts. each.
- -Laydekeri Purpurea. Rosy crimson, dark centre. \$1.00 each.
- -Marliacea Carnea. Delicate pink. 75 cts. each. Chromatella. Large, clear yellow. 50 cts. each.
- The Marliacea varieties are the strongest growers, the most free and continuous flowering and sweet scented of the hardy water lilies.
- -Odorata. Our native white pond lily. 20 cts. each.

- -Odorata Sulphurea. Large yellow fragrant flowers. 50 cts. each.
- -Rosea. Cape Cod pink pond lily. 50 cts. each.
- -Pygmea. The Chinese miniature white water lily. 30 cts. each.
- -Helvola. Small sulphur yellow flowers, very free flowering. 30 cts. each.
- Tuberosa. The large Western white pond lily. 20 cts. each.
- -Richardsoni. A superb double form of N. tuberosa, very choice. 50 cts. each.

Hardy Nelumbiums, or Lotus.

These are noble aquatic plants, perfectly hardy when established, producing gigantic foliage standing from 3 to 6 ft. above the water, the flowers standing above the foliage and frequently a foot across. Tubers should not be planted before warm, settled weather. In Northern sections, where season is retarded, it is best to set out established plants.

- Speciosum, Egyptian or Sacred Lotus. 75 cts. ea. -Album striatum. Large white, striped and tipped rosy carmine. \$1.50 each.
- Kermesinum. Bright rosy pink, early. \$1.00 each.
- Kinshiren. White, shaded and veined pink. \$1.50 each.

Miscellaneous Aquatic Plants.

Eichhornia azuria. (Blue water hyacinth.) 25 cts. each. Lymnanthemum Indicum. (Water snowflake.) Beau-

tiful white fringed flowers, fragrant. 20 cts. each. nocharis Humboldti. (Water poppy.) Large Limnocharis Humboldti. yellow poppy-like flowers. 15 cts. each.

Myriophyllum Proserpinacoides. (Parrot's feather.) Beautiful trailing plant, light green feathery. 10 cts.

Papyrus antiquorum. Egyptian paper plant. 25 cts. each.

Plants for House, Lawn and Piazza.

Areca Lutescens. (Ostrich Feather Palm.) A majestic palm. Its dark glossy green leaves are gracefully curved on slender stems. The trunk and stems are golden yellow, irregularly spotted with bronzy green. In $3\frac{1}{2}$ -inch pots, 75 cts.; 5-inch pots, \$1.00; 6-inch pots, \$2.00; 7-inch pots, \$3.00 each.

Asparagus Sprengeri. The beautiful green feathery

sprays, which drop gracefully, are often 3 to 4 feet in length. Excellent for hanging pots. 25 cts. to \$1.00

each.

Kentia Belmoreana. (Curly Palm.) Recognized as one of the best for all purposes, being able to withstand more ill usage perhaps than any other. foliage is dark glossy green, the segments wide and gracefully recurved. In 4-inch pot, 75 cts. 5-inch pot, \$1.00; 6-inch pot, \$1.75; 7-inch pot, \$3.50 each. Latania Borbonica. (Fan Palm.) This is a typical

palm and is more largely used than any other. It is

of strong, healthy habit, and especially suitable for In 3½-inch pots, 50 cts.; 4-inch window culture. pots, 70 cts.; 5-inch pots, \$1.00; 6-inch pots, \$1.50; 7-inch pots, \$2.50 each.

Nephrolepsis Exaltata Bostoniensis. (Boston Fern.) A very popular window plant. It bears well with heat, dust and neglect, and always has a bright, fresh appearance. Strong plants, 50 cts. to \$200 each.

Pandanus Utilis. (Screw Palm.) Very decorative and useful for the window garden. The large leaves in leaving the stem, form a continuous spiral. It is a native of the Hawaiian Islands, where the natives use its fibre for making cloth. In 4-inch pots, 50 cts.; 6-inch pots, \$1.00; 7-inch pots, \$2.00 each.

Rubber Plant. (Ficus Elastica.) We can furnish nice, healthy plants of this favorite at from \$1.00 to \$5.00

each, according to size.

NURSERY DEPARTMENT.

Our connection with the oldest and largest Nursery in New England places us in a position to supply home grown stock of satisfactory quality promptly and at reasonable prices.

We emphasize the fact that all our Fruit Trees, Shade and Ornamental Trees, Evergreen and Flowering Shrubs, Vines and Herbaceous Plants are New England grown, consequently of sturdy constitution, well rooted, hardy and much more likely to give satisfaction to planters than the large plants of softer and unripened growth that are easily produced in considerable quantities under the milder climatic conditions of the South, and generally offered by Nurserymen and Dealers.

We shall be glad to advise intending buyers as to selection, and also furnish plans and estimates for laying out and planting ornamen-

tal grounds.

While we exercise the greatest care to have all Nursery stock pure and reliable, we sell no Trees, Plants, Shrubs or other Nursery stock with warranty, express or implied, in any respect. If the purchaser does not accept these goods on these terms, they must be returned at once, and the money that has been paid for them will be

Roses.

The list of varieties is revised, and contains nothing but the really most desirable and distinct kinds.

PLANTING. If possible select a position sheltered from high winds, but open to sunshine. If the soil is not naturally suitable improve it by the addition of rich loam and decomposed cow or stable manure, well worked in;

where stiff and heavy good drainage and rough stable manure are the essentials.

When planting, carefully prune all dead or bruised roots or branches, spread the root fibres as much as possible, and set deep enough to cover the junction of the bud and stock, thereby preventing suckers, and enabling the rose to

During the growing season, frequent waterings with liquid manure are an advantage. It is easily made by mixing cow

manure with water in an old tub or barrel. Hybrid Perpetual Roses should be pruned in April, when the sap begins to flow. Crimson and other Rambler Roses are best pruned as soon as flowering is past.

Extra Strong Plants, 50 cts. each; \$4.00 per dozen. Strong Plants, 30 cts. each; \$3.00 per dozen.

Hybrid Perpetual Roses.

Alfred Colomb. Bright fiery red, large. Anna de Diesbach. Intense carmine.
American Beauty. Bright rose carmine. Baron de Bonstettin. Intensely rich plum. Baroness de Rothschild. Palest flesh. Charles Lefebvre. Brilliant velvety crimson. Clio. Flesh, shaded with rosy pink. Fisher Holmes. Crimson, shaded with violet. Frau Karl Druschki or Snow Queen. Largesilverywhite. General Jacqueminot. Scarlet crimson. Gruss au Teplitz. Scarlet. John Hopper. Brilliant rosy crimson. La France. Lilac rose, centre silvery white. Madame Plantier. Pure white.

Madame Gabriel Luizet. Fine satin rose. Magna Charta. Pink, suffused with carmine.

Margaret Dickson. White, centre petals pale flesh.

Marshall P. Wilder. Cherry red, mingled with carmine. Mrs. John Laing. Soft pink. Mrs. R. G. Sharman Crawford. Deep rosy pink, shaded pale flesh.

Prince Camille de Rohan. Velvety crimson. Paul Neron.

Cerise rose. Ulrich Brunner. Cerise red.

Climbing Roses.

Crimson Rambler. Crimson, famous.

Pink Rambler (Psyche). Bright rose, a fitting companion to the famous Crimson Rambler. Each 65 cts.; \$6.00 doz.

Yellow Rambler (Agalia). Small bright yellow flowers in large clusters. White Rambler (Thalia). White, large umbels.

Dawson. Pink, semi-double, fragrant. Queen of the Prairie. Bright red.

Baltimore Belle. Blush, changing to white.

Carmine Pillar. Single, rosy carmine. Dorothy Perkins. Soft, light pink.

Lady Gay. Cherry pink, shading white. Queen Alexandra. Rosy pink.

50 cts. each; \$4.00 per doz., except as noted.

Austrian Roses (Yellow).

Harrisonii. Fine golden yellow. 50 cents each.

Persian Yellow. Deepest yellow. 50 cents each.

Soleil d'Or. A perpetual flowering yellow rose, perfectly hardy; the

shades are golden yellow and orange; the flowers average 3 inches over, and are very full. 65 cts. each.

Crimson Rambler.

ROSES-Continued. Baby Rambler Roses.

The best of all roses for pot culture and bedding.

Madame Norbert Levavasseur. The new dwarf crimson Baby Rambler (ever-blooming).

Anna Muller. New dwarf pink Rambler. Novæ Angliæ. New dwarf white Rambler.

50 cts. each; \$4.00 per dozen

Moss Roses

Crested Moss. Rose. Little Gem. Crimson. Reine Blanche Moreau. White. 50 cts. each.

Tea, or Everblooming Roses.

For the home and greenhouse these are unsurpassed. They bloom all season outdoors and will come safely through an ordinary winter if laid down in the month of November and covered with about 9 inches of soil.

Bridesmaid. Brilliant pink.

Kaiserin Augusta Victoria. White.

Strong plants, 30 cts. each; \$3.00 per doz.

La France. Silvery rose shaded pink.

Mam. Cochet. Pink.

Madame Caroline Testout. Pink.

Large Plants, 30 cts. each; \$3.00 per doz.

Miscellaneous Roses

Beautiful in foliage, bud, full flower and fruit, planted in clumps, they are attractive throughout the entire year.

Rugosa alba. White, single.

Rugosa rubra. Crimson, single.

50 cts. each; \$4.00 per doz.

Sweet Briar. Fragrant foliage and pink flowers. 50 cents each. Low trailers suitable for covering banks, rockeries, etc.

Trailing Wichuriana. White, single, green foliage.

— Manda's Triumph. Pure white double.
— Universal Favorite. Bright pink double.

30 cts. each; \$3.00 per doz.

Carolina. (Swamp Rose.) 25 cents each; \$2.00 per doz.

Hardy Herbaceous Perennials.

These plants grow in beauty, size and value year by year. They require less care than most desirable flowering plants, and are adapted for nearly every condition. The months named indicate the time of flowering of each.

Achillea (The Pearl). Pure white, double. June. 2 ft., | 15 cts. each; \$1.50 doz.

Alyssum Saxatile Compactum. Beautiful yellow

flowers in spring. 6 in., 20 cts. each; \$2.00 per doz. Anemone Japonica Rosea. Dark pink flowers in August and September. 2 ft., 15 cts. each; \$1.50 per

-- Alba. Beautiful white. 2 ft., 15 cts. each; \$1.50

per doz.

Anthemis Tinctoria (Yellow Marguerite). Flower May and June. 2-3 ft., 15 cts. each; \$1.50 per doz.

Anthericum Liliastrum Major (St. Bruno's Lily). White. June. 2½ ft., 20 cts. each; \$2.00 per doz. Aquilegia Chrysantha. Rich yellow. July. 3 ft., 15

cts. each; \$1.50 per doz.

- Cœrulea Hybrida. Shades of blue, white, pink,

yellow, etc. 2-3 ft., 20 cts. each; \$2.00 per doz.

-Munstead White. Creamy white. July. 2½ ft.,

20 cts. each; \$1.75 per doz. Armeria Laucheana (Sea Pink). Bright rose. May

to frost. 9 in., 15 cts. each; \$1.50 per doz.

Arabis Alpina Plena (Alpine Rock Cress). (Perennial, White Alyssum.) White. May. 6 to 9 in., 20 cts. each; \$2.00 per doz.

Asclepias Tuberosa (Butterfly Weed). Bright orange.

July. 1-2 ft., 15 cts. each; \$1.50 per doz.

Aster Esme. Pure white. September. 2 ft., 25 cts.

each; \$2.50 per doz. -Nova Angliæ. Bluish-purple. September. 4 ft., 15

cts. each; \$1.50 per doz. -Nova Angliæ Rosea. Pink New England Aster. 3

ft., 15 cts. each; \$1.50 per doz. Baptisia Australis (False Indigo). Dark blue. July.

1-2 ft., 15 cts. each; \$1.50 per doz.

Boltonia Latisquamæ. Clear lilac. September. 4 ft., 15 cts. each; \$1.50 per doz.

Campanula Grandiflora (Platycodon). Very dark blue. August to September. 2-3 ft., 20 cts. each; \$2.00 per

-Persicifolia Grandiflora (Peach-leaved Bell Flower). Porcelain Blue. June to August. 2-3 ft., 25 cts. each;

Campanula Persicifolia Moerheimii. Pure white; 3 in. across, large, double. June. 2-3 ft., 35 cts. each;

Campanula Carpathica. Clear blue. Summer. 3-4 ft., 20 cts each; \$2.00 per doz.

Centaurea Montana. Colors red, white, blue and

pink. Summer. 11/2 ft., 20 cts. ea.; \$2.00 per doz.

Coreopsis Grandiflora. Golden-yellow. Summer. 2 ft., 15 cts. each; \$1.50 per doz.

Delphinium Chinensis. Intense blue. Summer. 2 ft.,

20 cts. each; \$2.00 per doz.

- Formosum. Blue, white centre. Summer. 3 ft., 20

cts. each; \$2.00 per doz.

Dianthus Plumarius (Scotch Pink). Fragrant pink flowers. June. 1 ft., 20 cts. each; \$2.00 per doz.

Dicentra Spectabilis (Bleeding Heart). Pink. Spring. 2 ft., 20 cts. each; \$2.00 per doz.

Dictamnus Fraxinella (Gas Plant). Purplish pink. May-June. 2 ft., 25 cts. each; \$2.50 per doz. -Alba. A white form of the preceding. 25 cts. each;

\$2.50 per doz.

Digitalis Purpurea (Foxglove). Pink, and white. June.

3-4 ft., 10 cts. each; \$1.00 per doz. Eulalia Japonica Variegata. A stately grass with green and white leaves. 6 ft., 25 cts. each; \$2.50 per doz.

Euphorbia Corrollata (Flowering Spurge). Pure white.

July. 1-2 ft., 10 cts. each; \$1.00 per doz.

Funkia Variegata (Plantain Lily). Blue with variegated foliage. July. 1-2 ft., 15 cts. each; \$1.50 per doz.

Gaillardia Grandiflora (Blanket Flower). Red and

yellow. July. 2-3 ft., 15 cts. each; \$1.50 per doz. Gypsophila Paniculata. Small white flowers in great profusion. Summer. 2 ft., 15 cts. each; \$1.50 per doz.

Helenium Autumnale Superbum. Bright yellow.
August. 5 ft., 25 cts. each; \$2.50 per doz.

— Bolanderii. Bright yellow, dark brown center. June.

2-3 ft., 15 cts. each; \$1.50 per doz.

Helleborus niger (Christmas Rose). Large white. December. Frame culture. 25 cts. each; \$2.50 per doz.

Helianthus Decapetalus. Bright yellow. Summer. 5 ft., 25 cts. each; \$2.50 per doz.

- Mollis. Yellow flowers, downy, silvery foliage. 3 ft.,

15 cts. each; \$1.50 per doz.

HARDY HERBACEOUS PERENNIALS—Continued.

Helianthus Multiflorus fl. pl. (So called Hardy Dahlia). Double yellow. August to September. 3 ft., 15 cts. each; \$1.50 per doz.

Heliopsis Pitcherii. Golden-yellow. July to October.

6 ft., 20 cts. each; \$2.00 per doz.

Hemerocallis Disticha Plena. Double terra-cotta flowers. Summer. 3 ft., 30 cts. each; \$3 00 per doz. -Dumortieri. Orange. Summer. 2 ft., 30 cts. each;

\$3.00 per doz.

Heuchera Sanguinea. Bright red flowers. Handsome foliage. Summer. 1½ ft., 25 cts. each; \$2.50 per doz. Hibiscus Moscheutos, Crimson Eye. White, with

crimson eye. August to September. 3-4 ft., 20 cts. each; \$2.00 per doz.

Iberis Corræfolia (Perennial Candytuft). Flowers white, foliage evergreen May-June. 6-12 inches, 20 cts. each; \$2.00 per doz.

Iris Germanica. Named sorts. White, Purple, marbled, etc. June. 2 ft., 15 cts. each; \$1.50 per doz.

- Kæmpferi (Japanese Iris). Named sorts. Beauti-

ful colors. June to July. 2 ft., 35 cts. each; \$3.00

—— Mixed. 15 cts. each; \$1.50 per doz. — Pumila. White, blue, yellow. June to July. 6 inches, 20 cts. each; \$2.00 per doz.

- Mixed. 15 cts each \$1.50 per doz.

Lathyrus Latifolius (Perennial Pea). Bright red.

Summer. 5 ft., 25 cts. each; \$\pi_2.50 pc. do. - Albus. White, otherwise like above. 30 cts. each; \$3.00 per doz.

Lavendula Vera (English Lavender). July. 1-2 ft.,

15 cts. each; \$1.50 per doz.

Liatris Pycnostacha. Lavender-purple. Summer. 6

ft., 20 cts. each; \$2.00 per doz. Lobelia Cardinalis (Cardinal Flower). 3 to 4 ft. August.

Scarlet. Very showy border plant. 20 cts. each; \$2.00 per doz.

Lupinus Polyphyllus. Blue, pea-like flowers. 4 ft., 25 cts. each; \$2.50 per doz.

-Alba. White, form of preceding. 25 cts. each; \$2.50 per doz.

Lychnis Chalcedonica. Brilliant scarlet. Summer. 2-3 ft., 20 cts. each; \$2 00 per doz.

— Diurna Rubra Plena. Deep purplish-red. Summer. 2-3 ft., 35 cts. each; \$3.50 per doz. Lythrum Roseum Superbum. Rosy-red. Summer.

2-3 ft., 20 cts. each; \$2.00 per doz.

Monarda Didyma. Brilliant scarlet. Foliage sweet-

scented. Summer. 2-3 ft., 15 cts. each; \$1.50 per doz.

Myosotis Palustris Semperflorens (Forget-me-not). Light-blue. Summer. 15 cts. each; \$1.50 per doz.

Enothera Youngii. Clear yellow. 2 inches in diameter. June to August. 2 ft., 25 cts each; \$2.50 per doz

Papaver Orientale (Oriental Poppy).

— Royal Scarlet. Scarlet. Small blotches. 2 ft., 35 cts

each; \$3.50 per doz.

Phlox Subulata (Moss Pink). Various colors. May 6 inches, 10 cts. each; \$1.00 per doz.

Decussata. In variety. Many colors. Autumn bloom ing. 2-3 ft., 25 cts. each; \$2.50 per doz.

Pentstemon Barbatus Torreyii (Beard-tongue). Bright

red. July. 4-5 ft., 15 cts. each; \$1.50 per doz. Physostigia Virginiana Alba. Spikes of tubular shaped, white flowers. August. 3-4 ft., 10 cts

each; \$1.00 per doz.

Polemonium Richardsonii (Jacob's Ladder). blue with golden anthers; sweet-scented. All Sum mer. 1½ ft., 25 cts. each; \$2.50 per doz.

Potentilla Grandiflora (Five-finger). Bright yellow

June. 2-3 ft. 25 cts. each; \$2.50 per doz.

Primula Acaulis Hybrida (English Primrose). Shades of white, yellow and red. Spring. 1 ft., 25 cts each; \$2.00 per doz.

-Elatior (English Cowslip). Shades of white, yellow red and brown. 1½ ft., 15 cts. each; \$1.50 per doz

Pyrethrum Roseum Hybridum. Colors range white to dark crimson. Summer. 2 ft., 25 cts. each; \$2:50 per doz.

Ranunculus Acris Plena (Double Buttercup). Bright

yellow. 15 cts. each; \$1.50 per doz.

Rudbeckia Fulgida. Orange-yellow, brown centre. August. 2-3 ft., 15 cts. each: \$1.50 per doz.

Rudbeckia, Golden Glow. Double golden-yellow. August to September. 5 ft., 15 cts. each; \$1.50 per doz. Scabiosa Caucasica. Lilac-blue. Summer. 2 ft., 25 cts. each; \$2.50 per doz.

Sedum Spectabilis (Showy Stonecrop). Rosy purple.

September. 2 ft., 15 cts. each; \$1.50 per doz. Silphium Perfoliatum (Compass Plant). Light yellow. July. 5-6 ft., 15 cts. each; \$1.50 per doz.

Spiræa Palmata. Crimson flower. Palm-like foliage.

Summer. 3 ft., 20 cts. each; \$2.00 per doz.
-Filipendula Plena. Fern-like foliage, creamy white flowers. 2 ft., 15 cts. each; \$1.50 per doz.

Tritoma Maria Grandiflora. Red and yellow. August to October. 3 ft., 20 cts. each; \$2.00 per doz.

Veronica Longifolia Subsessilis. Blue flowers. gust to September. 3 ft., 25 cts. each; \$2.50 per doz. Yucca Filamentosa (Adam's Needle). Early growth,

drooping white flowers. 6 ft., 25 cts. each; \$2.00 per doz.

Herbaceous Pæonies.

The most popular hardy plants of the day. They surpass the rose in size, equal it in range of color and fragrance, are not troubled with insect pests. They do well in any good, rich, deep soil, and prefer a sunny situation, although they thrive almost equally well in a partially shady location. A liberal supply of water should be given them during the growing season. They are perfectly hardy, requiring no protection whatever even in the most severe climate.

The following 12 fine named double sorts, 50 cts. each; \$5.00 per doz.

Amabilis Grandiflora. White, large fringed petals. Amabilis Speciosa. Rose shading to pink; large, sweet. Baron T. Rothschild. Rose outside, centre salmon, sweet. Delectissima. Rose, large, full, fine, sweet. Duchesse de Nemours. Rose pink, very large, double. Dark crimson, showing golden anthers.

Festiva Maxima. Creamy white, centre carmine.
Francis Ortegal. Dark purple crimson, very large.
Humei. Rose full large lates are after the control of the co Rose, full, large, late; one of the best. Humei. Officinalis Rubra. Deep red. Perfection. Rose lilac, inside salmon, sweet. Caroline Mather. Dark crimson, rose scented.

Double unnamed mixed, our selection, 25 cts. each; \$2.75 per dozen.

Single mixed, exceedingly beautiful, both in flower and foliage. The shades of color embraced are many and delicate, while the form and fragrance are delightful. 50 cts. each; \$5.00 per dozen.

Clematis.

Elegant, hardy, free-flowering climbers.

Paniculata. The white Clematis, now so popular. Plants 25 cts. to \$1.00 each; \$3.00 to \$10.00 per doz. Miss Bateman. White; chocolate-red anthers. 50 cts. to \$1.00 each. (European Sweet Clematis.) Flowers small, white and very fragrant, 25 cts. each. Mme. Baron Veilliard. Soft pink, blooms from midsummer until frost. 75 cts. each.

Dutchman's Pipe.

CLEMATIS—Continued.

Henryi. Immense, single, creamy-white flowers. 75c. each. Jackmanni. Large intense violet-purple flowers. 50 to 75 cts. each.

Mme. Edmund Andre. Bright crimson. \$1.00 each. Virginiana. (Amer. White Clematis.) A profusion of white flowers in August. 25 cts. each.

HARDY CLIMBING PLANTS.

Actinidia Polygama. A strong, clean vine from Japan. 50 cts. each.

Akebia Quinata. Of rapid growth, with shining foliage and bluish clusters of fragrant flowers. 35 cts. each.

Ampelopsis Englemanni. A variety of the Virginia Creeper, with bright foliage; fine color in the autumn; the

tendrils enable it to support itself like A. Veitchii. 25 and 35 cents each.

—Quinquefolia. (Virginia Creeper.) Well known climber; very vigorous. 25 cts. each.

Ampelopsis Veitchii. (Boston Ivy, Japanese Ivy.) Well-known, particularly around Boston. It grows rapidly and clings to a wall or fence with the tenacity of ivy; the foliage is handsome

in the summer, and changes to a crimson scarlet in autumn. For the ornamentation of brick or stone structures, it can be especially recommended. 25 cents each; \$2.50 per doz.

Aristolochia Sipho. (Dutchman's Pipe.) Rapid grower, magnificent foliage 10 to 12 inches across, and curious, piped shaped,

yellowish-brown flowers. 50 cts. each; extra size, 75 cts. Bignonia Radicans. (Trumpet Vine.) A quick growing vine,

bearing large scarlet flowers, very brilliant. 35 cts. each.

Celastrus Scandens. (Roxbury Wax Work.) A vigorous vine

with conspicuous orange-scarlet berries in autumn. 35 cts. each. Dolichos. (Pueraria.) Kudzu Vine. Quick growing vine with rosy purple flowers. 35 cts. each; \$3.00 per doz. Euonymus Radicans. Var. Variegata. Retains its glossy green

and bright foliage through the winter; nice plants, 35 cts. each. Honeysuckle. Hall's Japan. Abundant, vigorous foliage re-

tained until early winter, flower white and yellow, fragrant. 25 cts. each. Extra size, 50 cts. each.

Honeysuckle, Scarlet. Strong, rapid grower, bright scarlet. 25 cts. each.

— Belgica. Dutch monthly, very sweet scented, red and buff. 35 cts. each.

— Chinese Twining. (Lonicera Japonica.) A well known vine, holding its foliage nearly all winter. Blooms in July and September. Sweetly scented. 50 cts. each; \$4.00 per doz.

Humulus Lupulus. (Hop Vine.) Distinct foliage, with clusters of hops. 15 cts. each; \$1.50 per doz.

Lycium Barbatum. (Matrimony Vine.) Useful for covering screens or ledges. A fast grower. 25 cts. each; \$2.75 per doz. Wistaria Chinensis. One of the most elegant and rapid growing of all climbing plants, bearing long pendulous clusters

of pale blue flowers in May and June. 50 cents each. - Alba. White, otherwise similar to preceding. 75 cts. each.

There are no evergreen shrubs more desirable than Rhododendrons. They are hardy, and grow to spread several feet in diameter, giving annually a large mass of showy flowers in many colors. The leaves remain green throughout the winter, making the plant attractive and showy. They do best in a partial shade, and when set, a good-sized hole should be dug and filled with leaf-mold from the woods, or pulverized muck. In fall, a mulch with leaves or stable manure will be found very beneficial.

18 in. plants \$1.50 each, \$15.00 per doz. 24 in. plants \$2.00 each, \$20.00 per doz.

Abraham Lincoln. Rosy crimson, of good form. Album Elegans. Blush, changing to white; fine shape. Boule de Neige. Pure white, very hardy. Caractacus. Red purplish crimson, fine truss. Delicatissimum. Blush white, edged pink. Everestianum. Rosy lilac; spotted and fringed.

General Grant. Crimson pink. Gloriosum. White, bold flowers and good foliage. H. H. Hunnewell. Dark rich crimson.

Lady Armstrong. Pale rose, beautifully spotted.

Mrs. Milner. Rich crimson.

Roseum Elegans. Vivid rose, beautiful.

HARDY FLOWERING SHRUBS.

The month after each sort indicates the time of flowering.

Almond (Prunus Jap. Rubra fl. pl.) Double pink flowers. 50 cts. May. — (Prunus Jap. Alba fl. pl.) Double white flowers, beautiful. 50 cts. May. Althæa Purpurea Plena (Rose of Sharon). Hibiscus. 35 and 50 cts. October.

Striata. Carnation striped. 35 and 50 cts. Althæa. Double variegated. 35 and 50 cts.

Wistaria.

—Double white. 35 and 50 cts.

Azaleas. Ghent Hybrids, perfectly hardy, and of many brilliant colors. Fine plants, \$1.00; large sizes, \$2.00 and \$2.50. June.

-Mollis. A new type flowering earlier than the Ghent, and in color and form approaching the Indian varieties. 75 cts. to \$1.00.

Barberry (Berberis Thunbergii). A low growing shrub of arching habit; the foliage changes to many brilliant colors in the fall. 50 cts. each. June.

-Vulgaris (Common Barberry). Vigorous habit, free bearer. 35 and 50 cts.

IMPLEMENTS AND SUNDRIES FOR 1908.

We take this opportunity to announce that, about April 1st, 1908, we will issue the Fifth Edition of our Catalogue of Agricultural Hardware, Implements, Machines and Woodenware. This work is to be carefully revised and up-to-date in every respect.

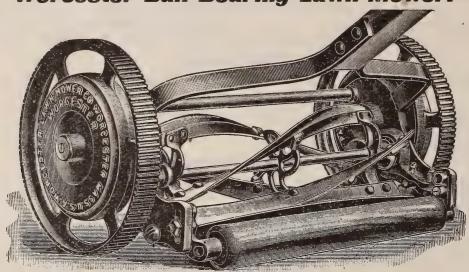

It will afford us much pleasure to send you a copy, postpaid, on application.

Breck's "Colonial" Lawn Mower.

Breck's Colonial Lawn Mower is made with 10-inch wheels, 4-bladed wiper, and parallel self-oiling bearings. Every valuable improvement used in the latest pattern mowers of other manufacturers, and many new features are embodied in the Colonial, making it the most desirable and up-to-date machine made. Our long experience in handling lawn mowers entitles our judgment to consideration; therefore, we positively guarantee satisfaction to every purchaser. Latest and Best.

Worcester Ball Bearing Lawn Mower.

Ball Bearing Mowers in the past have been imperfectly constructed, and very difficult to keep in order. We were unable to recommend them for this reason. From careful and exhaustive trials we have found the Worcester Mower free from the defects of earlier machines, and from our knowledge of its construction and its perfect work, we have no hesitation in offering it to our customers as the highest grade Ball Bearing Mower yet produced. Like the "Colonial," the "Worcester" is guaranteed to give satisfaction. 10-inch wheel, 4-bladed wiper. Ball bearings.

Worcester Improved Golf Mower.

81/2-inch drive wheels, 5-bladed wiper. Ball bearings.

WE ARE NEW ENGLAND AGENTS FOR

WM. T. WOOD & CO.'S CELEBRATED ICE TOOLS.

Catalogues, prices, etc., mailed on application.

Coldwell Improved Horse Lawn Mower.

We offer the Coldwell Horse Lawn Mower as the best machine for use on Public Parks, Golf Grounds, Private Estates, etc. This mower is used to the exclusion of other makes by the United States Government, the Public Parks of our largest cities and the leading links of this country. Each mower is sold complete with Shafts, Seat and Side Draft attachment.

30-in. complete Mfrs. Price \$110.00 Our net price \$75.00
35 " " " 135.00 " " 90.00
40 " " 170.00 " " " 115.00

For cost of above Mower with 6 blades, especially adapted to golf grounds, add \$7.00 to our net prices.

Coldwell Motor Lawn Mowers.

The Coldwell Motor Lawn Mowers both cut and roll the lawn. One man with one of these machines will do as much work in a day as three men and three horses will do with Horse Mowers. Pays for itself in a single season. No experiment—has been on the market for six years.

Descriptive circular and prices mailed on application.

Capitol Lawn Trimmer and Edger.

Does what no other machine can do and what Lawn Mowers leave undone. It trims and edges your lawn with remarkable speed and perfection; the shield over the blades protects the flowers. A trial will convince you, as it has thousands of others, that the days of shears and hand clippers have passed.

Our net price, each \$6.00

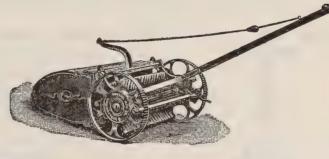

The Apollo Lawn Sweeper.

For parks, lawns, factories, railroads, cemeteries, warehouses, livery stables, ice skating rinks, roller skating rinks, asphalt street sweeping, and public and private institutions.

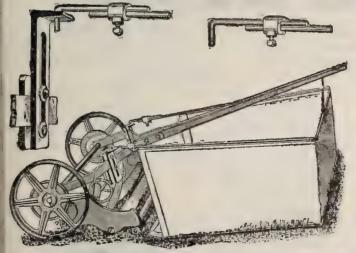

We absolutely guarantee the machine to give perfect satis-

faction if properly used and cared for.

The "E-Z" Grass Catcher has a galvanized iron bottom. The sides and back are made of very strong canvas, attached to the bottom. The frame is made of ¼-inch galvanized iron wire, with side supports of the same stock. A universal attachment made of malleable iron is so arranged that it is possible to attach it to any mower no matter what the diameter of the drive wheel. The side frame can be lengthened or shortened so that the pan will travel directly behind the roller. It is guaranteed to fit perfectly all styles and makes of lawn mowers. This catcher can be removed to put away or empty in an instant.

No. 1, for 12, 14 and 16 in. mowers. Our net price, each, \$1.25 "2, "16, 17 and 18 in. """ "1.35 "3, "18, 19, 20 and 21 in. "" "" "1.50

Mfrs. price, per doz., \$60.00 Our net price, each, \$4.75 Folding Lawn Settee.

Our folding lawn settees are made from hardwood. Can be folded into a small compass and packed away for the winter. Painted vermilion.

> Our net price, each \$1.25

Q. P. Woven Hammocks.

The Q. P. Hammocks are made of heavy cotton yarn. All hammocks have our combined hook and ring.

The spreader is impossible to displace, but allows the ham-mock to adjust itself to any position of the body, making a perfect hammock and bed. The strain being evenly distributed causes it to wear longer and prevents wearing out in the middle. Manufactured in neat and tasty designs in colors and plain white.

Our net prices range from \$1.00 to \$5.00 each, according to size and quality. Send for circular.

Oneida Hammock Chains.

Oneida Galvanized Hammock Chains are infinitely stronger than rope. Tested to bear the weight of five heavy men. Heavily galvanized; therefore rustproof. Most easily adjusted. It will not slip. Made in three sizes: 3 ft., 6 ft. and 9 ft. respectively. Attractively packed, one set to a box.

Automatic Lawn Swings.

"Made in the home of the deer and the moose, Of the silver birch and the mountain spruce."

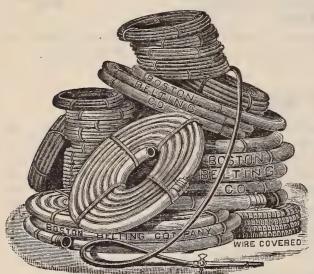

These swings are perfectly automatic and furnish a delightful and healthful exercise for persons of all ages, as the smallest child can operate them with absolute ease and safety. As a promoter of health, strength and vitality, this swing has no equal, as with it either gentle or vigorous exercise may be taken at will.

No 2 Fairfield Swings (first quality) are made from selected hard wood nicely finished. They are very durable

and highly ornamental.

No. 6 Favorite Swings (second quality) are offered to meet the demand for a cheaper swing than the Fairfield. They have the same general appearance, although the lumber is not so carefully selected. The Double Swings are built with the view of sustaining a greater weight and are admirably adapted for parks, picnic grounds, etc.

Sand, Gravel and Coal Screens.

All wire in these screens is made of the very best Bessemer steel and is drawn to a temper most adapted to wear

and stand the longest in the screen. It is an extra heavy grade and the wires double crimped.

The woodwork is done over with a heavy coat of clear raw linseed oil, adding greatly to the preservation of the screen when exposed to the weather. Any size of mesh desired. With iron leg. Our net price, each, \$7.50.

Gargen Bordering.

Our Garden Bordering fills a long desired want for some simple and inexpensive means of protecting lawns, flower beds, etc., from the invasion of human beings and animals.

Illustration shows clearly how these are placed, and the number required for one hundred feet of border.

They are made from the best quality of steel, nicely painted, and will last indefinitely.

I. X. L. Galvanized Steel Chain Pump.

There has never been a better device for raising water from the well than the old-fashioned chain pump with rubber buckets. The galvanized tubing does not make the water taste, it cannot rust, and will not rot or accumulate filth. This pump is antifreezing and can be used in wells that are fifty feet deep or under successfully, giving sixteen gallons of water per minute.

No. 2 Stanchion Basin with Valve, our net price, each, \$1.50. Not included in our special offers.

Breck's Improved Swing Stanchion.

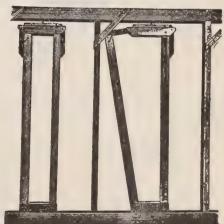

This Stanchion gives as perfect freedom to cattle as it is possible to have and have them fastened at all. The cattle when standing can lap themselves as when loose, and when lying down they can rest the head upon the body as when in pasture.

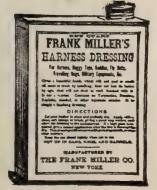

There is no friction on the neck, as the Stanchion turns with the head. It keeps them as clean as the firm Stanchion and there is no possible way they can get hurt; neither can they get to the right or left to gore each other.

The cattle cannot waste their feed and do much better than when tied with any other Stanchion. No getting choked or getting unfastened.

Thousands are in use. Every dairyman who has used them approves them and adopts them exclusively.

OLIVER SIDE-HILL PLOWS.

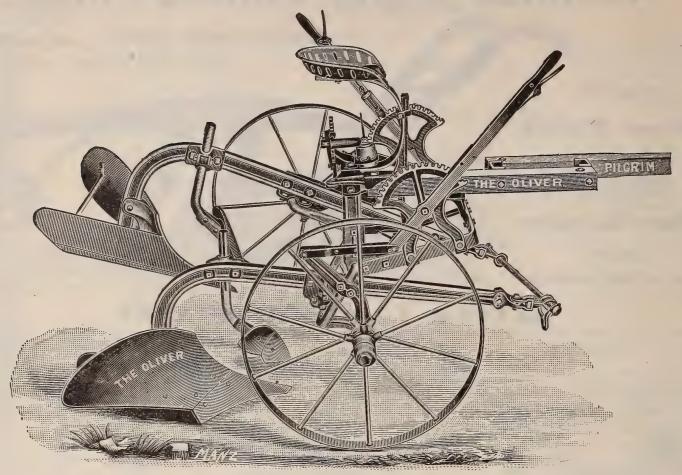

The Nos. 508 and 509 Oliver Side Hill Plows are built especially for the New England trade. Exhaustive field trials during the past two years show that they are superior to any Side Hill Plow used in this section. Steel trussed beams, adjustable handles, automatic cutter or jointer, steel lever shifting clevis. We guarantee perfect plowing on level land as well as on the side hill.

Send for complete circulars of the Oliver Plows, mailed on request.

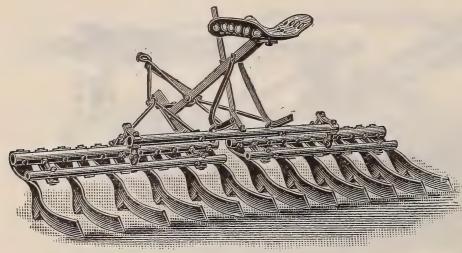

Beware of imitation plows and extras, claiming to be the genuine Oliver or equally good. The genuine plows and repairs, direct from the factory, are for sale in New England only by us and our authorized agents. All others are spurious, and cannot be relied upon to fit well or do good work.

Oliver "Pilgrim" Reversible Sulky Plow.

The Oliver "Pilgrim" Reversible Sulky Plow for Hillside or Level Land Work. Perfect in Design, Construction and Operation. The Leader of Its Class.

Descriptive circulars of the Oliver Plows mailed on application.

All Steel Disc Harrow.

The most practical disc harrow made. The bearings are of chilled iron and are fitted with steel balls running against chilled surface to take end thrust of disc gang. Box is cast solid in one piece, and chilled on inside, and is provided with dirt proof oil cups leading into an oil chamber, which effectually lubricates the bearings at all times.

No. 1. Twelve 16-inch discs, cut 6 feet, complete, with whiffletrees, evener, neck yoke and scrapers.

Mfrs. price, each, \$30.00. Our net price, \$26.00 Also a full line of Spike and Spring Tooth Harrows.

Circulars and prices mailed on application.

Acme Pulverizing Harrow.

Is not a special tool, as some have supposed, but, as its name implies, a general purpose harrow that will do the whole business, viz.: it will crush, cut, lift, turn, smooth and level, all in one operation.

The Coulters all slope backwards, thus presenting the least possible resistance, and as they are ground to an edge, the draft is reduced to a minimum.

Large illustrated catalogue of Acme Harrows mailed on application.

Our net price 10.00

Complete Catalogue of Spraying Pumps, Spraying Materials, etc., mailed on application.

The Brandt Compressed Air Sprayer.

The "Brandt" Sprayer is made on a new principle, and is the first and only knapsack compressed air sprayer on the market that gives continuously uniform pressure. The trouble with all compressed air sprayers hitherto offered has been the necessity of pumping them ahead. This makes the pressure too high in the beginning and too low at the end. The result is an uneven spray. In the "Brandt," the pumping is done during the progress of the work, thus filling in with pressure as the liquid is discharged, about one stroke with the pump for each 15 to 25 hills of potatoes. The pressure is at all times under perfect control, and an even spray is always maintained from the nozzle. This is a very important

feature, and is found in no other sprayer. The solution is distributed evenly and economically, and one filling of three gallons with Paris green mixture will cover and do good work on a row one mile long.

The "Brandt" Sprayer works perfectly with Paris green, Bordeaux mixture, Paris green and Bordeaux compound, white arsenic, soda Bordeaux, kerosene emulsion, tobacco infusion, and all other liquid applications, also for whitewashing and disinfecting poultry houses, barns, cellars, etc.

New Samson.

For all kinds of heavy Trucks, Fire Engines, etc. Strongest Jack made. Lowers automatically. Made of the best quality malleable iron. No. 5 Will raise vehicle weighing 6 tons. Weight 25 lbs. . \$5.00 " 6 " " 28 " . 7.00

The practical advantages of this lamp may be summarized as follows:

It throws its entire volume of light straight ahead for a distance of 200 feet or more.

It burns with a clear, white, penetrating flame. It does not smoke and is free from odor. It burns common kerosene oil.

It is handsome and durable.

It will not blow nor jar out, however rough the road.

Union Driving Lamp, japanned black . . . each, \$3.00

Horse Mowers, Rakes, Hay Tedders, and Hay Carrier Outfits.

Our limited space does not permit of a lengthy description of this class of machinery. We are agents for the celebrated Worcester Buckeye Mowers, Worcester Horse Rakes, Bullard Tedders, and Porter Hay Carriers. Descriptive circulars and prices mailed on application.

Ruddy Harvester Oil is made especially for mowing machines, reapers and other kinds of farm machinery and has never failed to give satisfaction. The oil is pure, free from grit, and is warranted not to gum or injure the finest machinery. Beware of the so-called mowing machine oils usually offered by agents. By using them you will damage your machinery.

Ruddy Harvester Oil is put up in convenient cans ready for use, as follows:

Ross Ensilage and Fodder Cutters.

For 50 years the Ensilage and Fodder Cutters built by the E. W. Ross Co., of Springfield, Ohio, have stood ahead of all others for effectiveness, durability and quality. Many improvements have been made, and at the present time there does not seem to be a great deal of room for further improvement. They are built in all sizes, from the small hand machine to the immense machines requiring 10 to 15 horse power to run them, and having a capacity of 35 tons of ensilage per hour. Be sure to see them before purchasing.

Cutters at all prices ranging from \$4.00 to \$500.00. Descriptive catalogue mailed on application.

Mann's Bone Cutter.

The Mann's Green Bone Cutter is offered to the poultry world on a warranty to produce a perfectly edible poultry food, with no waste, from any average lot of butcher's

bones with less labor and less annoyance than any other bone cutter.

The silo is beyond the experimental stage and is recognized to-day as the best

investment in reach of the farmer. It has been demonstrated that it will yield larger dividends and pay for itself quicker than almost any other practical aid to successful farming. A silo will increase by 20 per cent. yearly the profit on each milch cow wintered.

If you are interested in the silo question, we have a catalogue giving silo facts and comparisons, and listing sizes, which we will be glad to mail you on application.

The Green Mountain Silos are perfect in construction, only the very best material being used.

Not included in our Special Offers. Correspondence solicited.

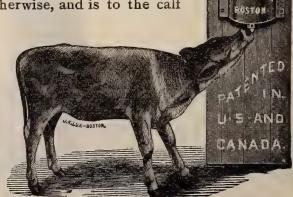

Small's Calf Feeder.

This article was designed and has been perfected by the inventor for feeding milk to young calves in a natural way before they are old enough to eat and drink otherwise, and is to the calf what the nursing bottle is to the babe, a substitute for nature.

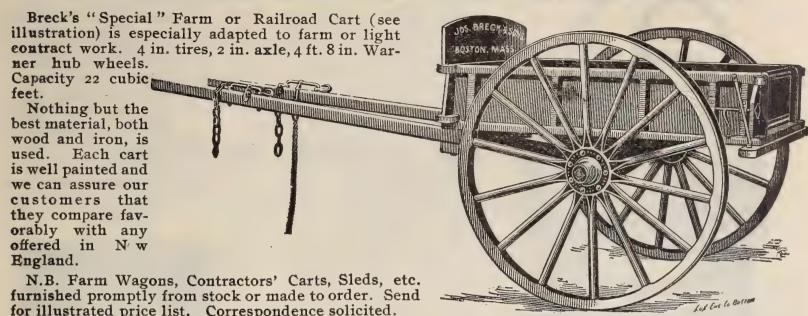

Since the time when first brought out nearly forty thousand have been made and sold.

It is no longer an experiment; years of constant use have proved it to be a very perfect and much needed article by all progressive farmers and stock raisers who have tried it.
